UNITED STATES PATENT OFFICE.

THOMAS B. ATTERBURY, OF PITTSBURG, PA., ASSIGNOR TO THE HARDEN
HAND FIRE EXTINGUISHER COMPANY, OF CHICAGO, ILL.

DESIGN FOR A BOTTLE.

SPECIFICATION forming part of Design No. 16,159, dated July 14, 1885.

Application filed June 8, 1885. Term of patent 7 years.

To all whom it may concern:

Be it known that I, THOMAS B. ATTERBURY, a citizen of the United States, residing at Pittsburg, in the county of Allegheny and State of Pennsylvania, have invented and produced a new and original Design for Bottles, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof, in which a side elevation of the bottle is shown.

A indicates the main portion or body of the bottle, which is almost round in general outline, the lower portion being flattened to form a base, *b*, while the upper portion is extended to form the neck *c* of the bottle. The bottle is composed of the upper and lower portions, 1 2, which are separated by the annular bead or raised portion C. The upper and lower

portions, 1 2, of the bottle are ribbed or corrugated, as shown at *a*, said ribs being wider at their ends which are nearest the bead C, and gradually taper off toward the neck and base of the bottle.

The neck of the bottle is provided with a bead or raised portion, *d*, at or near its top.

I claim—

The design for a bottle herein described, the same consisting of a spherical-shaped body having a central annular rib or projection, the portions above said rib to the neck and the portions below to the base being fluted or ribbed, as set forth.

THOS. B. ATTERBURY.
