DESIGN.

—o—

J. P. HARRIMAN.

ORNAMENTATION OF KNIT FABRICS.

UNITED STATES PATENT OFFICE.

JEREMIAH P. HARRIMAN, OF WOONSOCKET, RHODE ISLAND.

DESIGN FOR THE ORNAMENTATION OF KNIT FABRICS.

SPECIFICATION forming part of Design No. 18,382, dated June 12, 1888.

Application filed March 10, 1888. Serial No. 266,883. Term of patent 14 years.

To all whom it may concern:

Be it known that I, JEREMIAH P. HARRIMAN, a citizen of the United States, and a resident of Woonsocket, county of Providence, and State of Rhode Island, have invented and produced a new and original Design for Surface Ornamentation of Knitted Fabrics, of which the following is a full, clear, and exact description, reference being had to the accompanying photographic illustration, forming a part thereof, in which is represented a portion of a fabric with my invention applied thereto.

My design is intended for application generally to all forms of knitted fabrics to which it is desired to impart an ornamental appearance; and it consists in a series of pairs of parallel stripes arranged diagonally of the fabric with respect to the successive rows or courses of loops composing the same, with a series of rows of quadrangular figures interposed between the adjacent pairs of such stripes, as shown.

In the photographic illustration the stripes are shown at A A, &c., and the quadrangular figures at B B, &c.

The stripes A A, &c., are of substantially the form shown, and are arranged in pairs parallel to one another and disposed diagonally

of the fabric with respect to the successive rows or courses of loops composing the same, the distance between the adjacent pairs of such stripes being such as to permit of the desired number of quadrangular figures B B, &c., being interposed between them. These figures are so disposed as to bring them into rows, which are arranged both parallel with and at right angles to the stripes A A, and are sufficiently numerous as to substantially cover the entire space between the latter.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent of the United States, is—

The design for ornamentation of knitted fabrics, consisting of a series of pairs of parallel stripes arranged diagonally of the fabric with respect to the successive rows or courses of loops composing the same, with a series of quadrangular figures interposed between the pairs of stripes and arranged in rows, substantially as shown and described.

In testimony whereof I have hereunto set my hand this 27th day of February, 1888.

JEREMIAH P. HARRIMAN.
