# UNITED STATES PATENT OFFICE.

STEPHEN PALMER, OF LANSINGBURG, NEW YORK.

## DESIGN FOR A WEEDING-HOOK.

SPECIFICATION forming part of Design No. 19,480, dated December 10, 1889.

Application filed November 18, 1889. Serial No. 330,801. Term of patent 7 years.

*To all whom it may concern: .*

Be it known that I, STEPHEN PALMER, a citizen of the United States, residing at the village of Lansingburg, in the county of Rensselaer and State of New York, have invented and produced a new and original Design for Weeding-Hooks, of which the following is a specification, reference being had to the accompanying drawings, forming a part thereof.

10 Figure 1 is a top plan view of the hook. Fig. 2 is a side elevation of the same. Fig. 3 is a cross-section of the handle, taken on the broken line 3 3 in Fig. 1.

15 The leading feature of my design consists in the contour of the handle and hook and handle connecting shank.

The head A is provided with a plurality of

hooks A', radiating therefrom, and is connected with the concavo-convex handle B by a neck or shank C. The boundary outlines 20 along the handle, neck, head, and hooks to the bends or angles A<sup>2</sup> are continuous and unangular, forming a smooth surface extending from the hooks to the free end of the handle.

What I claim is—

25 The design for a weeding-hook herein shown and described.

In testimony whereof I have hereunto set my hand this 12th day of November, 1889.

STEPHEN PALMER.
