(57) **CLAIM**

We claim the ornamental design for an circular interface for aerosol generator, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing /photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. **1** is a front view of an circular interface for aerosol generator; and,

FIG. **2** is an enlarged detail front elevation view.

The dot dash broken lines within FIG. **1** and surrounding FIG. **2** denote boundaries of the detail areas and form no part of the claimed design. Each of FIGS. **1** and **2** is a view of the interface button and display portion of the aerosol generator, surrounded by dot dash broken lines, with the rest of the aerosol generator shown in de-emphasized, reduced tonal value so as to illustrate environmental structure. The elements shown outside the dot dash broken lines form no part of the claimed design and are merely included to show environmental aspects thereof.

The circular interface for aerosol generator as shown in the figures lacks appreciable depth or thickness that can be depicted and accordingly, the front and enlarged detail views are solely presented herein.
