(57) CLAIM

The ornamental design for a lighting device for a work vehicle, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a lighting device for a work vehicle according to an exemplary embodiment of the present subject matter.
FIG. 2 is a front view of the lighting device for a work vehicle.
FIG. 3 is a rear view of the lighting device for a work vehicle.
FIG. 4 is a first side view of the lighting device for a work vehicle.
FIG. 5 is a second side view of the lighting device for a work vehicle.
FIG. 6 is a top view of the lighting device for a work vehicle.
FIG. 7 is a bottom view of the lighting device for a work vehicle.
FIG. 8 is another front perspective view of the lighting device for a work vehicle, particularly illustrating an environmental view, in broken lines, of the lighting device for a work vehicle installed relative to a hood of a work vehicle, such as an engine hood; and,
FIG. 9 is a front perspective view of a lighting device for a work vehicle configured to be installed on the opposite side of the work vehicle as the lighting device for a work vehicle shown in FIGS. 1-8 (e.g., a right-side lighting device for a work vehicle as opposed to a left-side lighting device for a

(Continued)

work vehicle), with the lighting device for a work vehicle of FIG. 9 being a mirror image of the lighting device for a working vehicle shown in FIGS. 1-8.

The broken lines contained within the figures, including, but not limited to, any dash-dot broken lines and/or dash-dash broken lines, represent portions of the lighting device for a work vehicle that form no part of the claimed design. Additionally, contour lines and/or surface shading are illustrated simply for purposes of highlighting the solid-rendering, and, thus, form no part of the claimed design.
