(57) CLAIM

The ornamental design for a combined anesthesia machine and breathing device, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a design for a combined anesthesia machine and breathing device according to the present invention.

FIG. 2 is a back view of the combined anesthesia machine and breathing device.

FIG. 3 is a top view of the combined anesthesia machine and breathing device.

FIG. 4 is a bottom view of the combined anesthesia machine and breathing device.

FIG. 5 is a right side view of the combined anesthesia machine and breathing device.

FIG. 6 is a left side view of the combined anesthesia machine and breathing device.

FIG. 7 is a back-left perspective of the combined anesthesia machine and breathing device; and,

FIG. 8 is a front-right perspective view of the combined anesthesia machine and breathing device.

The solid lines in FIGS. 1-8 illustrate a combined anesthesia machine and breathing device according to the present invention. In the drawings, the dash-dash broken lines are for the purpose of illustrating portions of the combined anesthesia machine and breathing device that form no part of the claimed design. The dash-dot broken lines in the drawings define the bounds of the claimed design and form no part thereof.

1 Claim, 8 Drawing Sheets
