3.8 : Reference

3.9 : Reference

3.10 : Enlarged

The claimed designs are for a holder for fishing tackle, which makes the plural fish hooks be spaced apart at a certain distance horizontally to prevent entanglement by

(Continued)

fixing the wire supports of fishing tackle; the wire supports bent and opened wider than the holder in both directions can be inserted and combined with the narrower fixing part of this holder design in order to prevent the wire from being bent back and forth or left and right by the elastic recovery of the wire in both directions and fixation power of the holder, and to make the wire supports be fixed in a stable bent shape; reproductions 1.8, 2.8, and 3.8 are reference views showing how to combine and fix the wire support by using the claimed design; reproductions 1.9, 2.9, and 3.9 are reference views showing the state in use of the claimed design in which the fishing tackle is completed by fixing the wire supports; reproductions 1.10, 2.10, and 3.10 are enlarged views of the claimed design showing a portion of reproductions 1.9, 2.9, and 3.9.

1 Claim, 30 Drawing Sheets
