The ornamental design for a print head for printers, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Fig. 1 is a perspective view of a print head for printers, showing my new design.

The broken lines show a boundary between claimed and unclaimed features of the print head for printers. The de-emphasized and half-tone portions of the print head for printers form no part of the claimed design. Adjacent portions of the print head for printers having different colors indicates a contrast of color, and does not represent any particular color, materials, texture, or finish.
