CLAIM

The ornamental design for a compressor wheel, as shown
and described.

DESCRIPTION

FIG. 1 is a top perspective view of a compressor wheel in
accordance with one embodiment of the present invention;
FIG. 2 is a top plan view of the compressor wheel in FIG.
1; and,
FIG. 3 is an elevational side view, which is identical to the
front and rear views, of the compressor wheel in FIG. 1.
The dot-dot-dash broken lines shown in the drawings depict
the surface contouring of the compressor wheel.
