(57) **CLAIM**

The ornamental design for a deformable medical compression device, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a deformable medical compression device in accordance with a first embodiment of my new design;

FIG. 2 is a bottom perspective view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a front elevation view thereof;

FIG. 5 is a right side elevation view thereof;

FIG. 6 is rear elevation view thereof;

FIG. 7 is a left side elevation view thereof;

FIG. 8 is a bottom plan view thereof;

FIG. 9 is a perspective view of the deformable medical compression device of FIG. 1 in a state of use as a threaded fastener with the deformable medical compression device therearound is advanced into a bone;

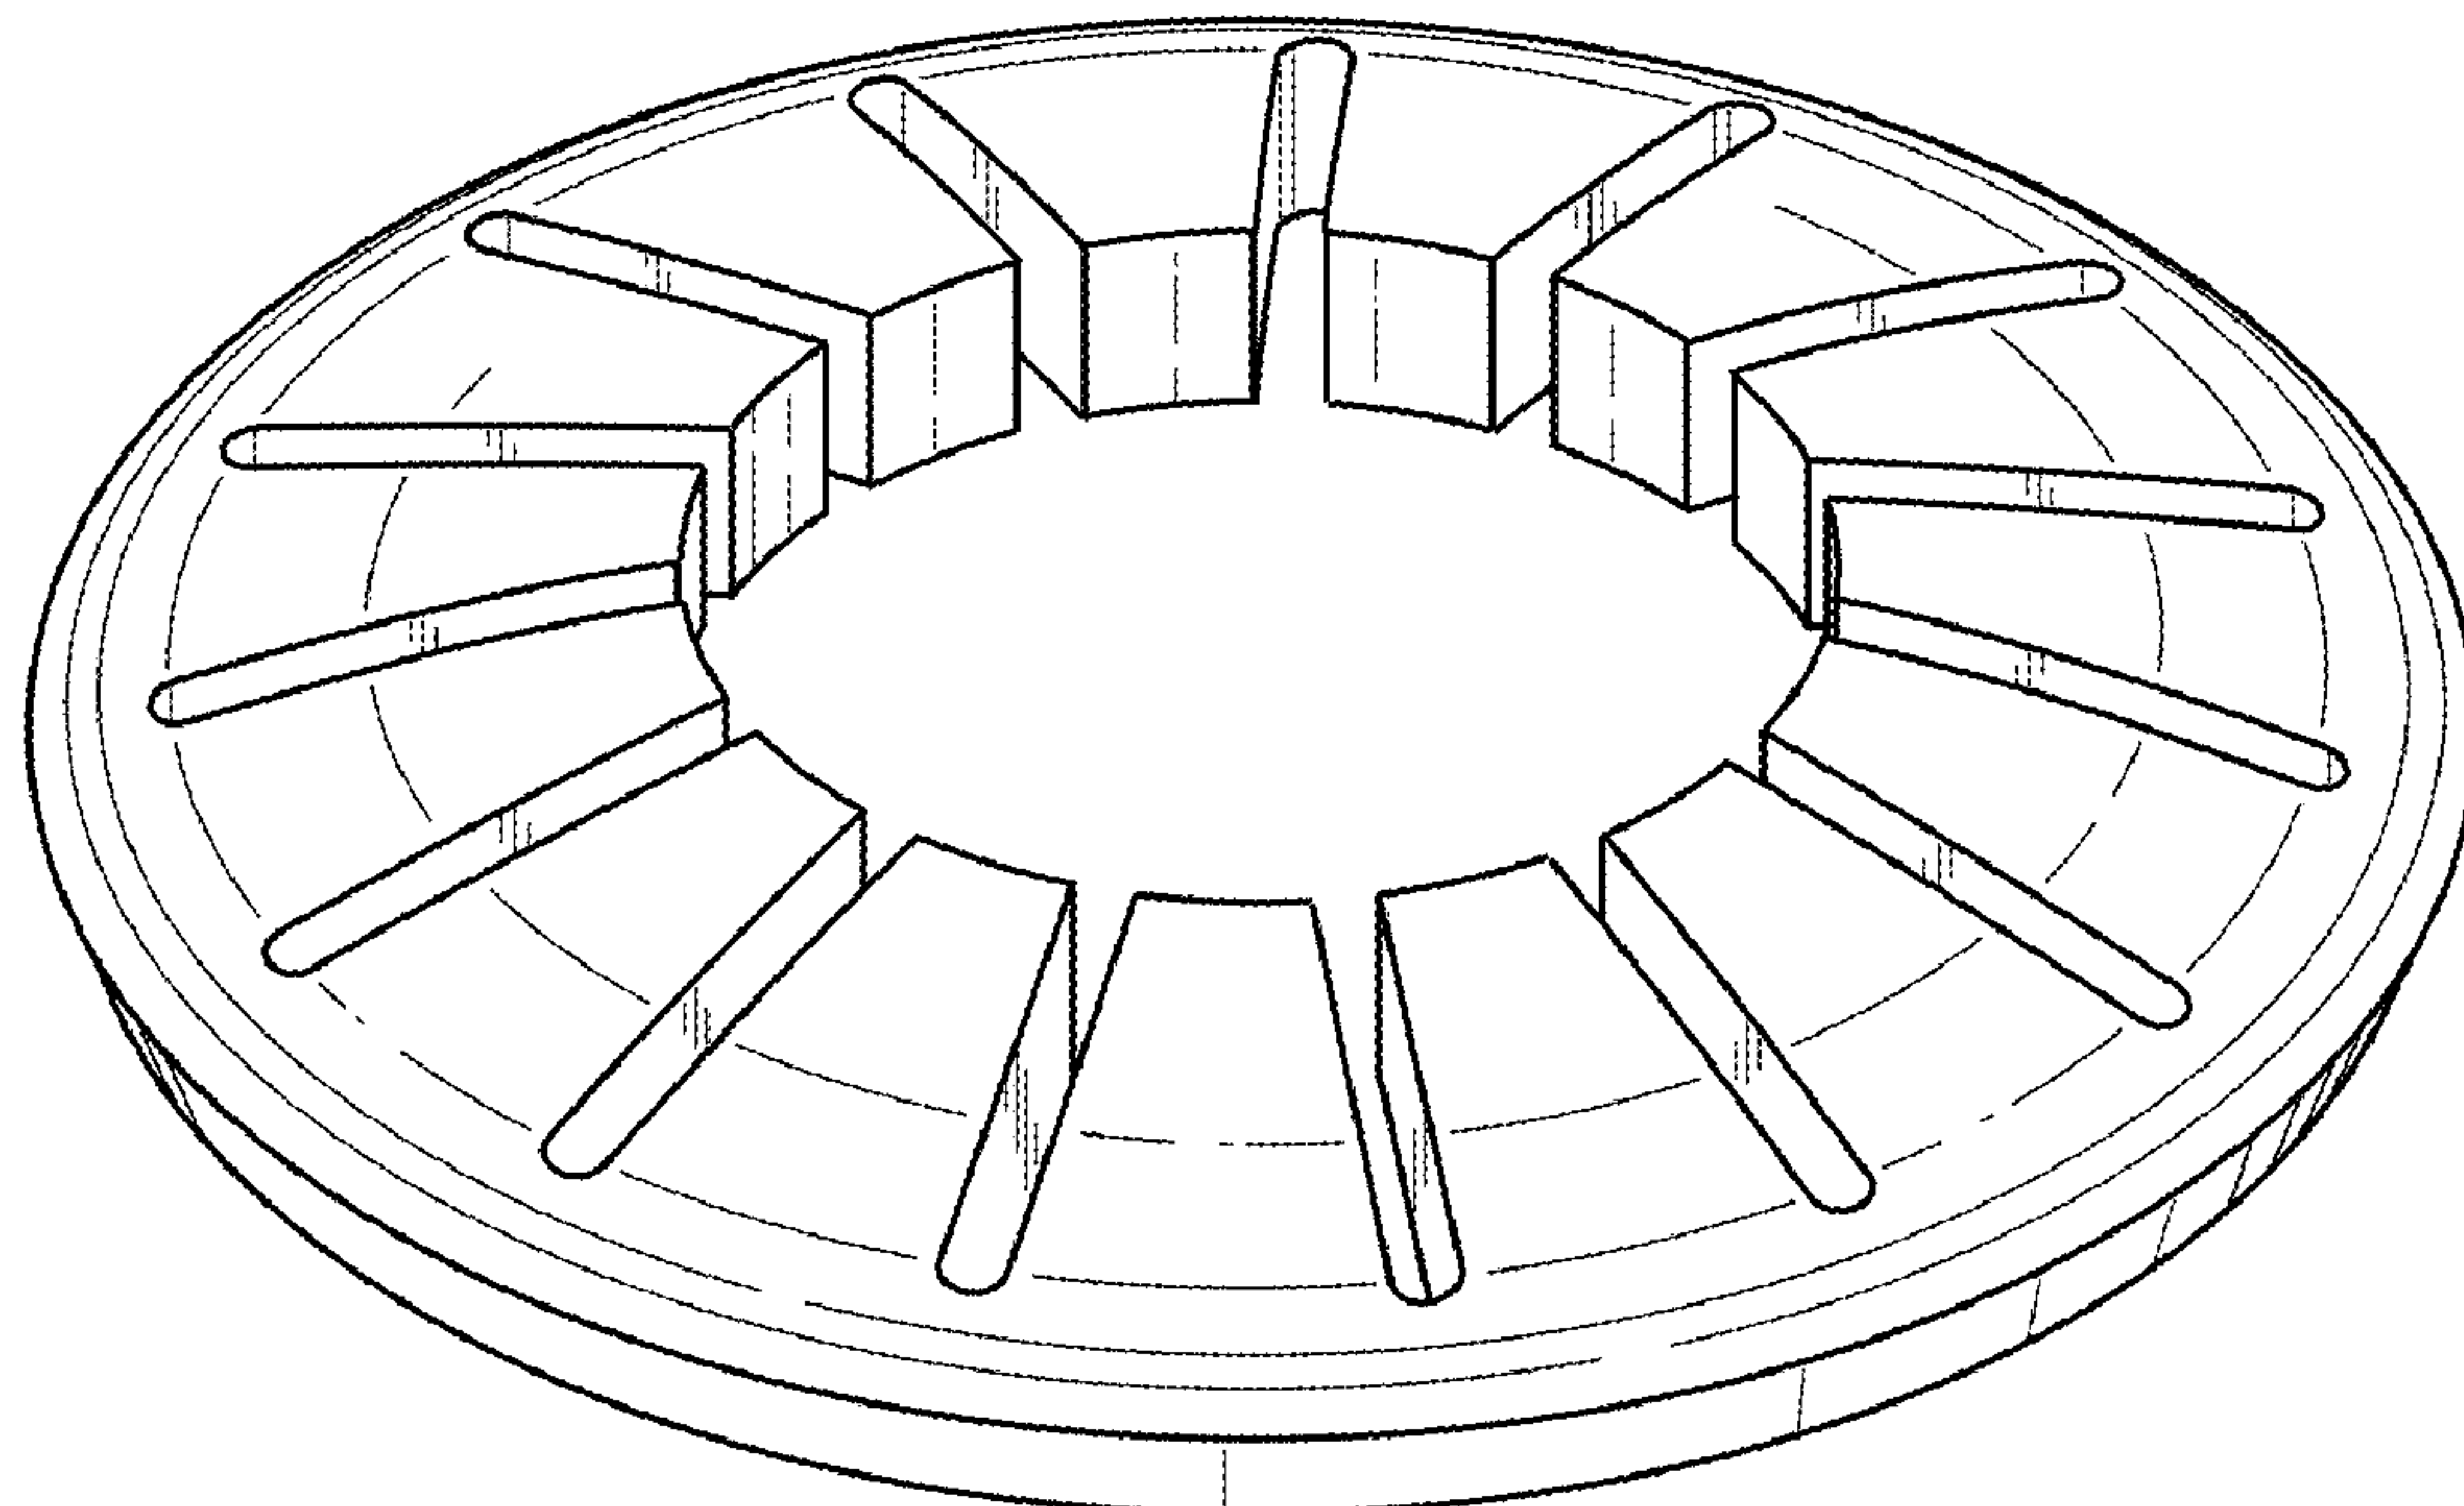

FIG. 10 is a perspective view thereof showing the deformable medical compression device in a first compressed configuration in a state of use as the threaded fastener with the deformable medical compression device therearound is further advanced into a bone; and,

FIG. 11 is a perspective view thereof showing the deformable medical compression device in a second compressed configuration in a state of use as the threaded fastener with the deformable medical compression device therearound is further advanced into a bone.

The broken line showing of a threaded fastener in FIGS. 9-11 depicts unclaimed subject matter and forms no part of the claim. The dot-dot-dash lines showing of bones in FIGS. 9-11 is directed to environment and is for illustrative purposes only and form no part of the claimed design.

It is contemplated that other embodiments of the design may include any part, portion, element, or any combination thereof shown in the figures. It is specifically contemplated that any and all solid lines and portions thereof may be converted to broken lines, whether in a subsequent divisional or continuation application and/or by amendment.
