CLAIM

I claim the ornamental design for a display screen with an animated graphical interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a first embodiment;

FIG. 2 is a front view of a second image in the transitional sequence according to the first embodiment;

FIG. 3 is a front view of a third image in the transitional sequence according to the first embodiment;

FIG. 4 is a front view of a fourth image in the transitional sequence according to the first embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a second embodiment;

FIG. 5 is a front view of a second image in the transitional sequence according to the second embodiment;

FIG. 6 is a front view of a third image in the transitional sequence according to the second embodiment;

FIG. 7 is a front view of a fourth image in the transitional sequence according to the second embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a third embodiment;

FIG. 8 is a front view of a second image in the transitional sequence according to the third embodiment;

FIG. 9 is a front view of a third image in the transitional sequence according to the third embodiment;

FIG. 10 is a front view of a fourth image in the transitional sequence according to the third embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a fourth embodiment;

FIG. 11 is a front view of a second image in the transitional sequence according to the fourth embodiment;

FIG. 12 is a front view of a third image in the transitional sequence according to the fourth embodiment;

FIG. 13 is a front view of a fourth image in the transitional sequence according to the fourth embodiment;

FIG. 14 is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a fifth embodiment;

FIG. 15 is a front view of a second image in the transitional sequence according to the fifth embodiment;

FIG. 16 is a front view of a third image in the transitional sequence according to the fifth embodiment;

FIG. 17 is a front view of the fourth image in the transitional sequence according to the fifth embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a sixth embodiment;

FIG. 18 is a front view of a second image in the transitional sequence according to the sixth embodiment;

FIG. 19 is a front view of a third image in the transitional sequence according to the sixth embodiment;

FIG. 20 is a front view of a fourth image in the transitional sequence according to the sixth embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to a seventh embodiment;

FIG. 21 is a front view of a second image in the transitional sequence according to the seventh embodiment;

FIG. 22 is a front view of a third image in the transitional sequence according to the seventh embodiment;

FIG. 23 is a front view of a fourth image in the transitional sequence according to the seventh embodiment and is a front view of a first image in a transitional sequence for a display screen with an animated graphical interface according to an eighth embodiment;

FIG. 24 is a front view of a second image in the transitional sequence according to the eighth embodiment;

FIG. 25 is a front view of a third image in the transitional sequence according to the eighth embodiment; and,

FIG. 26 is a front view of a fourth image in the transitional sequence according to the eighth embodiment.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-4 in the first embodiment, FIGS. 4-7 in the second embodiment, FIGS. 7-10 in the third embodiment, FIGS. 10-13 in the fourth embodiment, FIGS. 14-17 in the fifth embodiment, FIGS. 17-20 in the sixth embodiment, FIGS. 20-23 in the seventh embodiment, and FIGS. 23-26 in the eighth embodiment.

The outermost broken-line rectangle illustrates the perimeter of a display screen and forms no part of the claimed design. The remaining broken lines illustrate portions of an animated graphical interface that form no part of the claimed design.

Areas of the design shown with a stipple fill illustrate a contrast in visual appearance.
