CLAIM

The ornamental design for a dental dual light, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view showing our new design for a dental dual light;
FIG. 2 is a front view thereof;
FIG. 3 is a rear view thereof;
FIG. 4 is a left side view thereof;
FIG. 5 is a right side view thereof;
FIG. 6 is a top plan view thereof; and,
FIG. 7 is a bottom plan view thereof.
The portions shown in broken lines illustrate environmental structures and form no part of the claimed design.

1 Claim, 7 Drawing Sheets

A perspective view of a dental dual light device. The device consists of a handle with a trigger and a light head with two adjustable light sources. The handle is shown in a bent position, and the light head is shown in a bent position. The device is shown in a perspective view, with the handle and light head being the main components. The handle has a trigger and a button. The light head has two light sources and a handle. The device is shown in a perspective view, with the handle and light head being the main components.
