(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface for an electro-anatomical mapping study viewer application, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a display screen with transitional graphical user interface for an electro-anatomical mapping study viewer application showing our new design;
FIG. 2 is a second image thereof;
FIG. 3 is a third image of thereof; and,
FIG. 4 is a fourth image thereof.
The appearance of the image transitions sequentially between the images shown in FIGS. 1 through 4. The process or period in which one image transitions to another forms no part of the claimed design. The dashed broken lines showing the outermost broken line rectangle illustrates a display screen and forms no part of the claimed design. The dash-dash broken lines and the dot-dash broken lines, illustrating portions of the graphical user interface, form no part of the claimed design. The broken lines shown with gray overlap and the vertically oriented broken lines, illustrating portions of the graphical user interface, form no part of the claimed design.
