(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen or portion thereof with transitional graphical user interface showing our new design;

FIG. 2 is a front view of second image thereof;

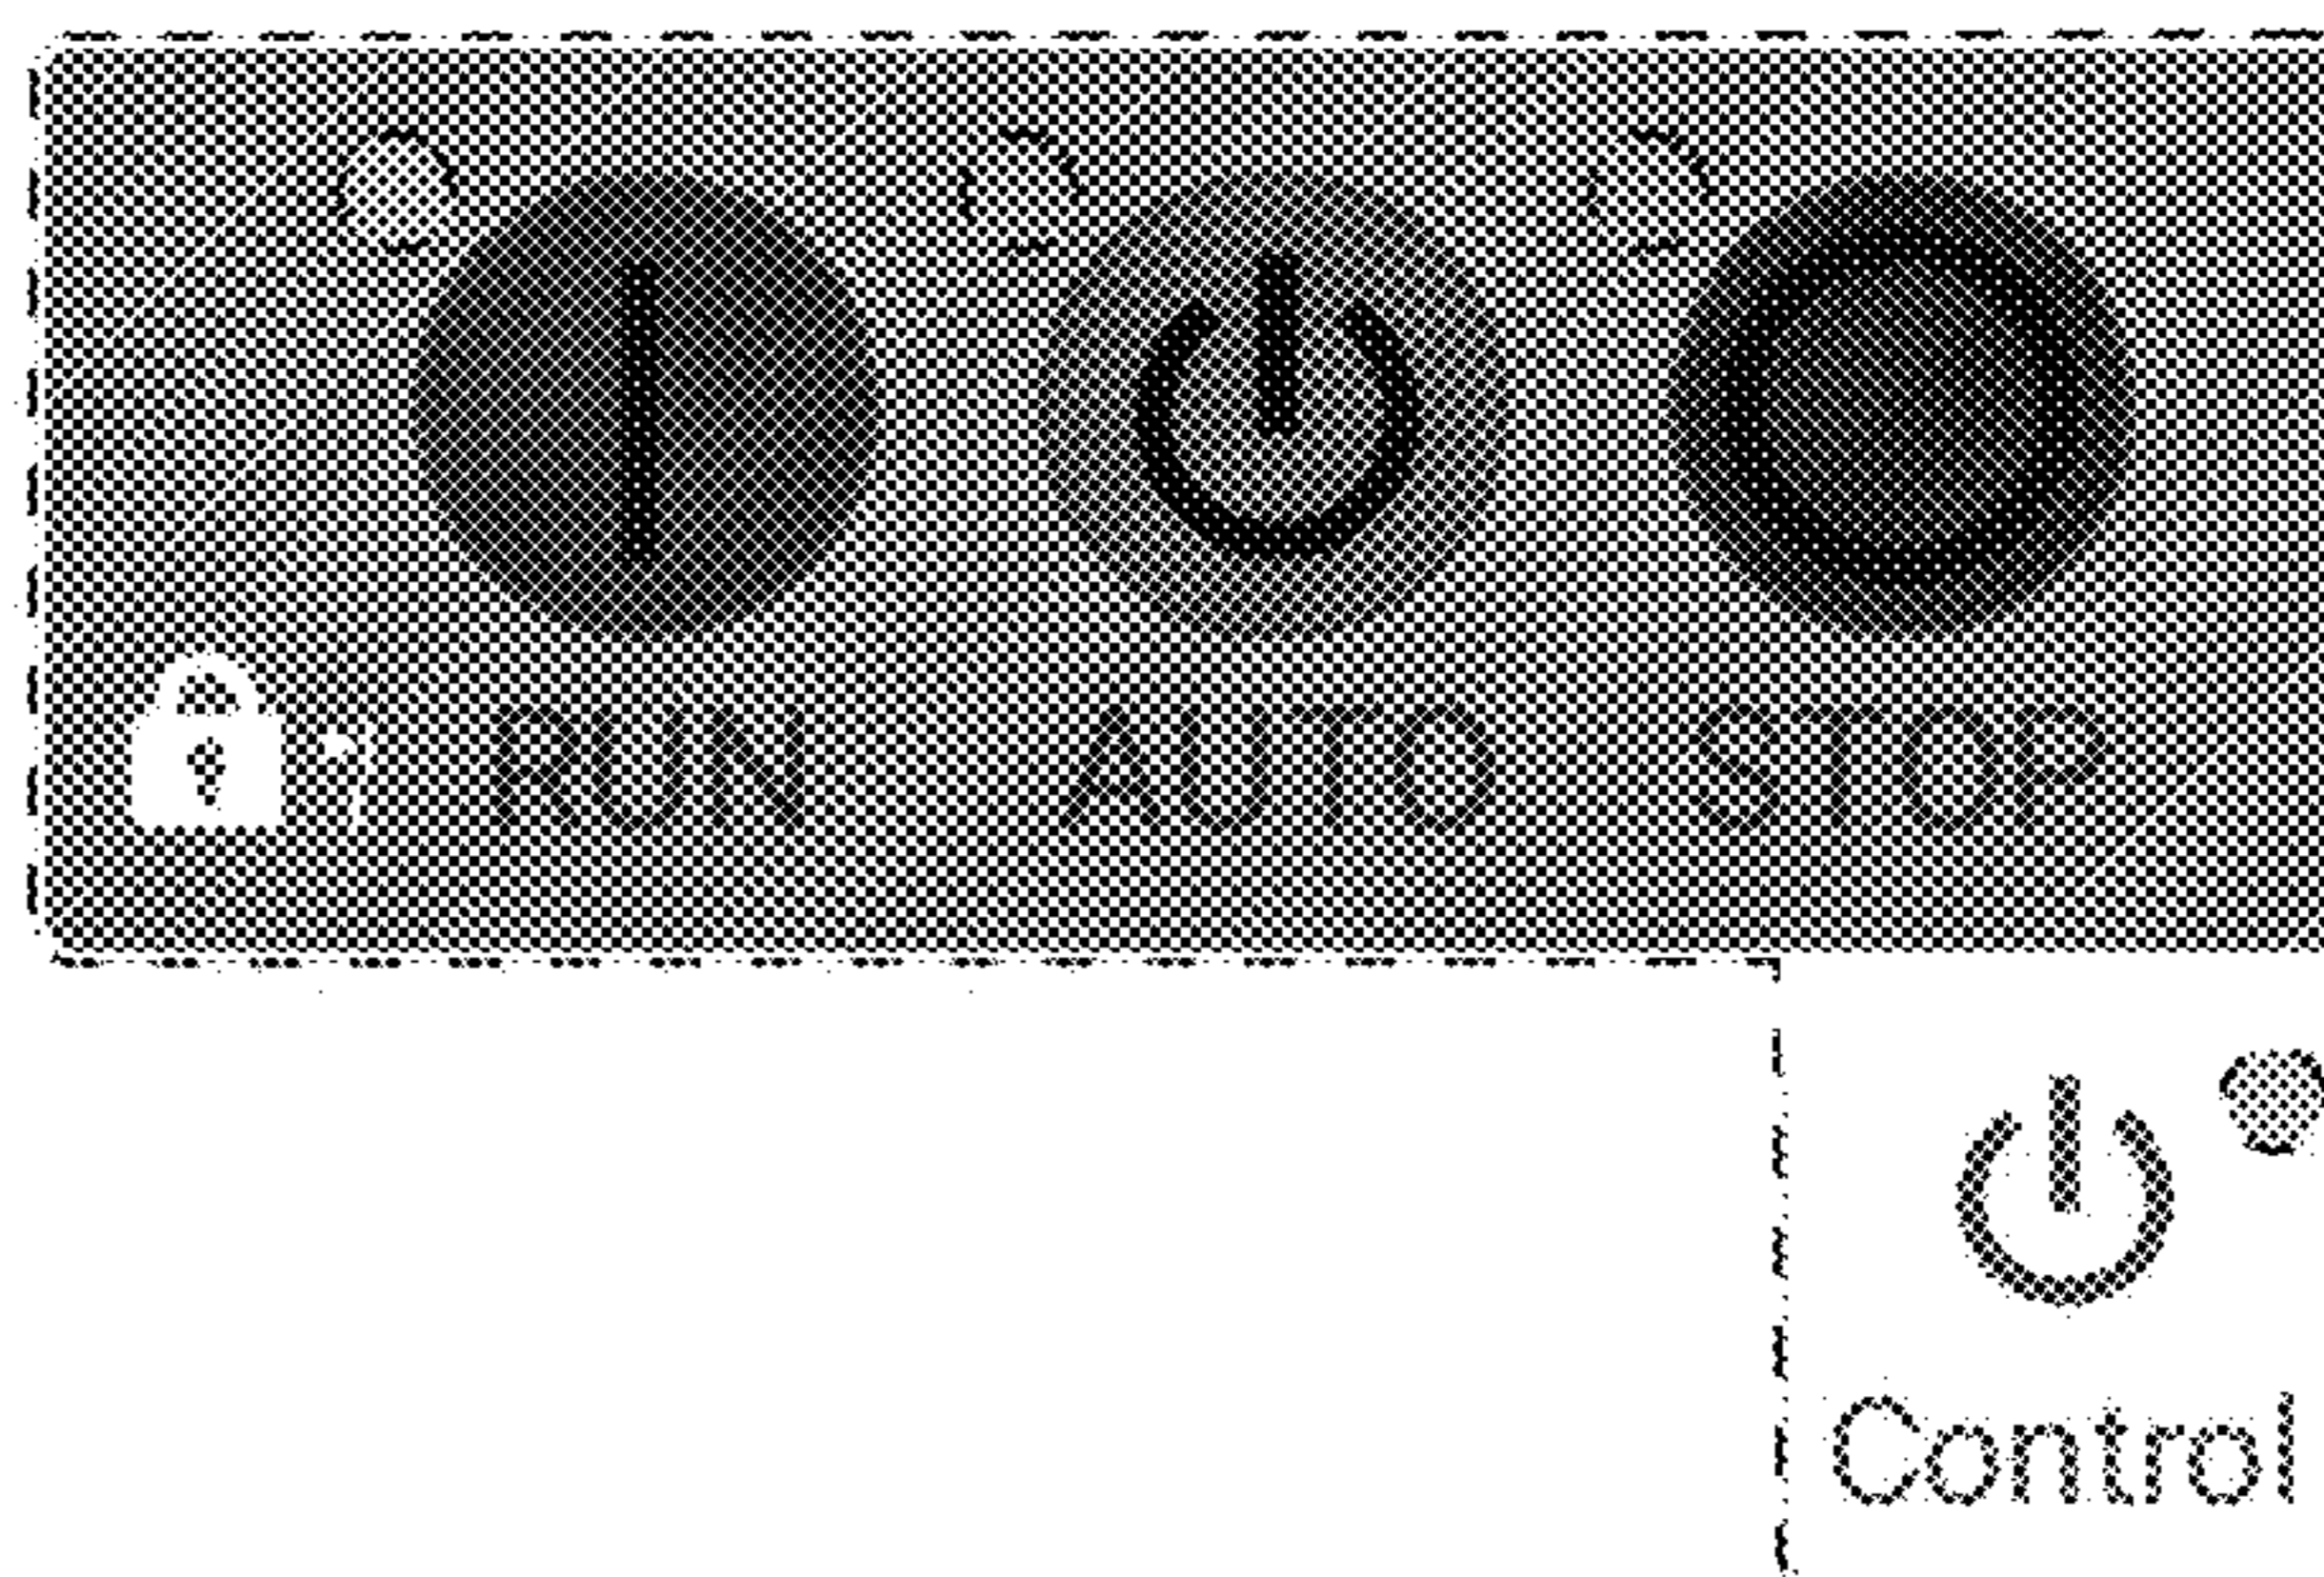

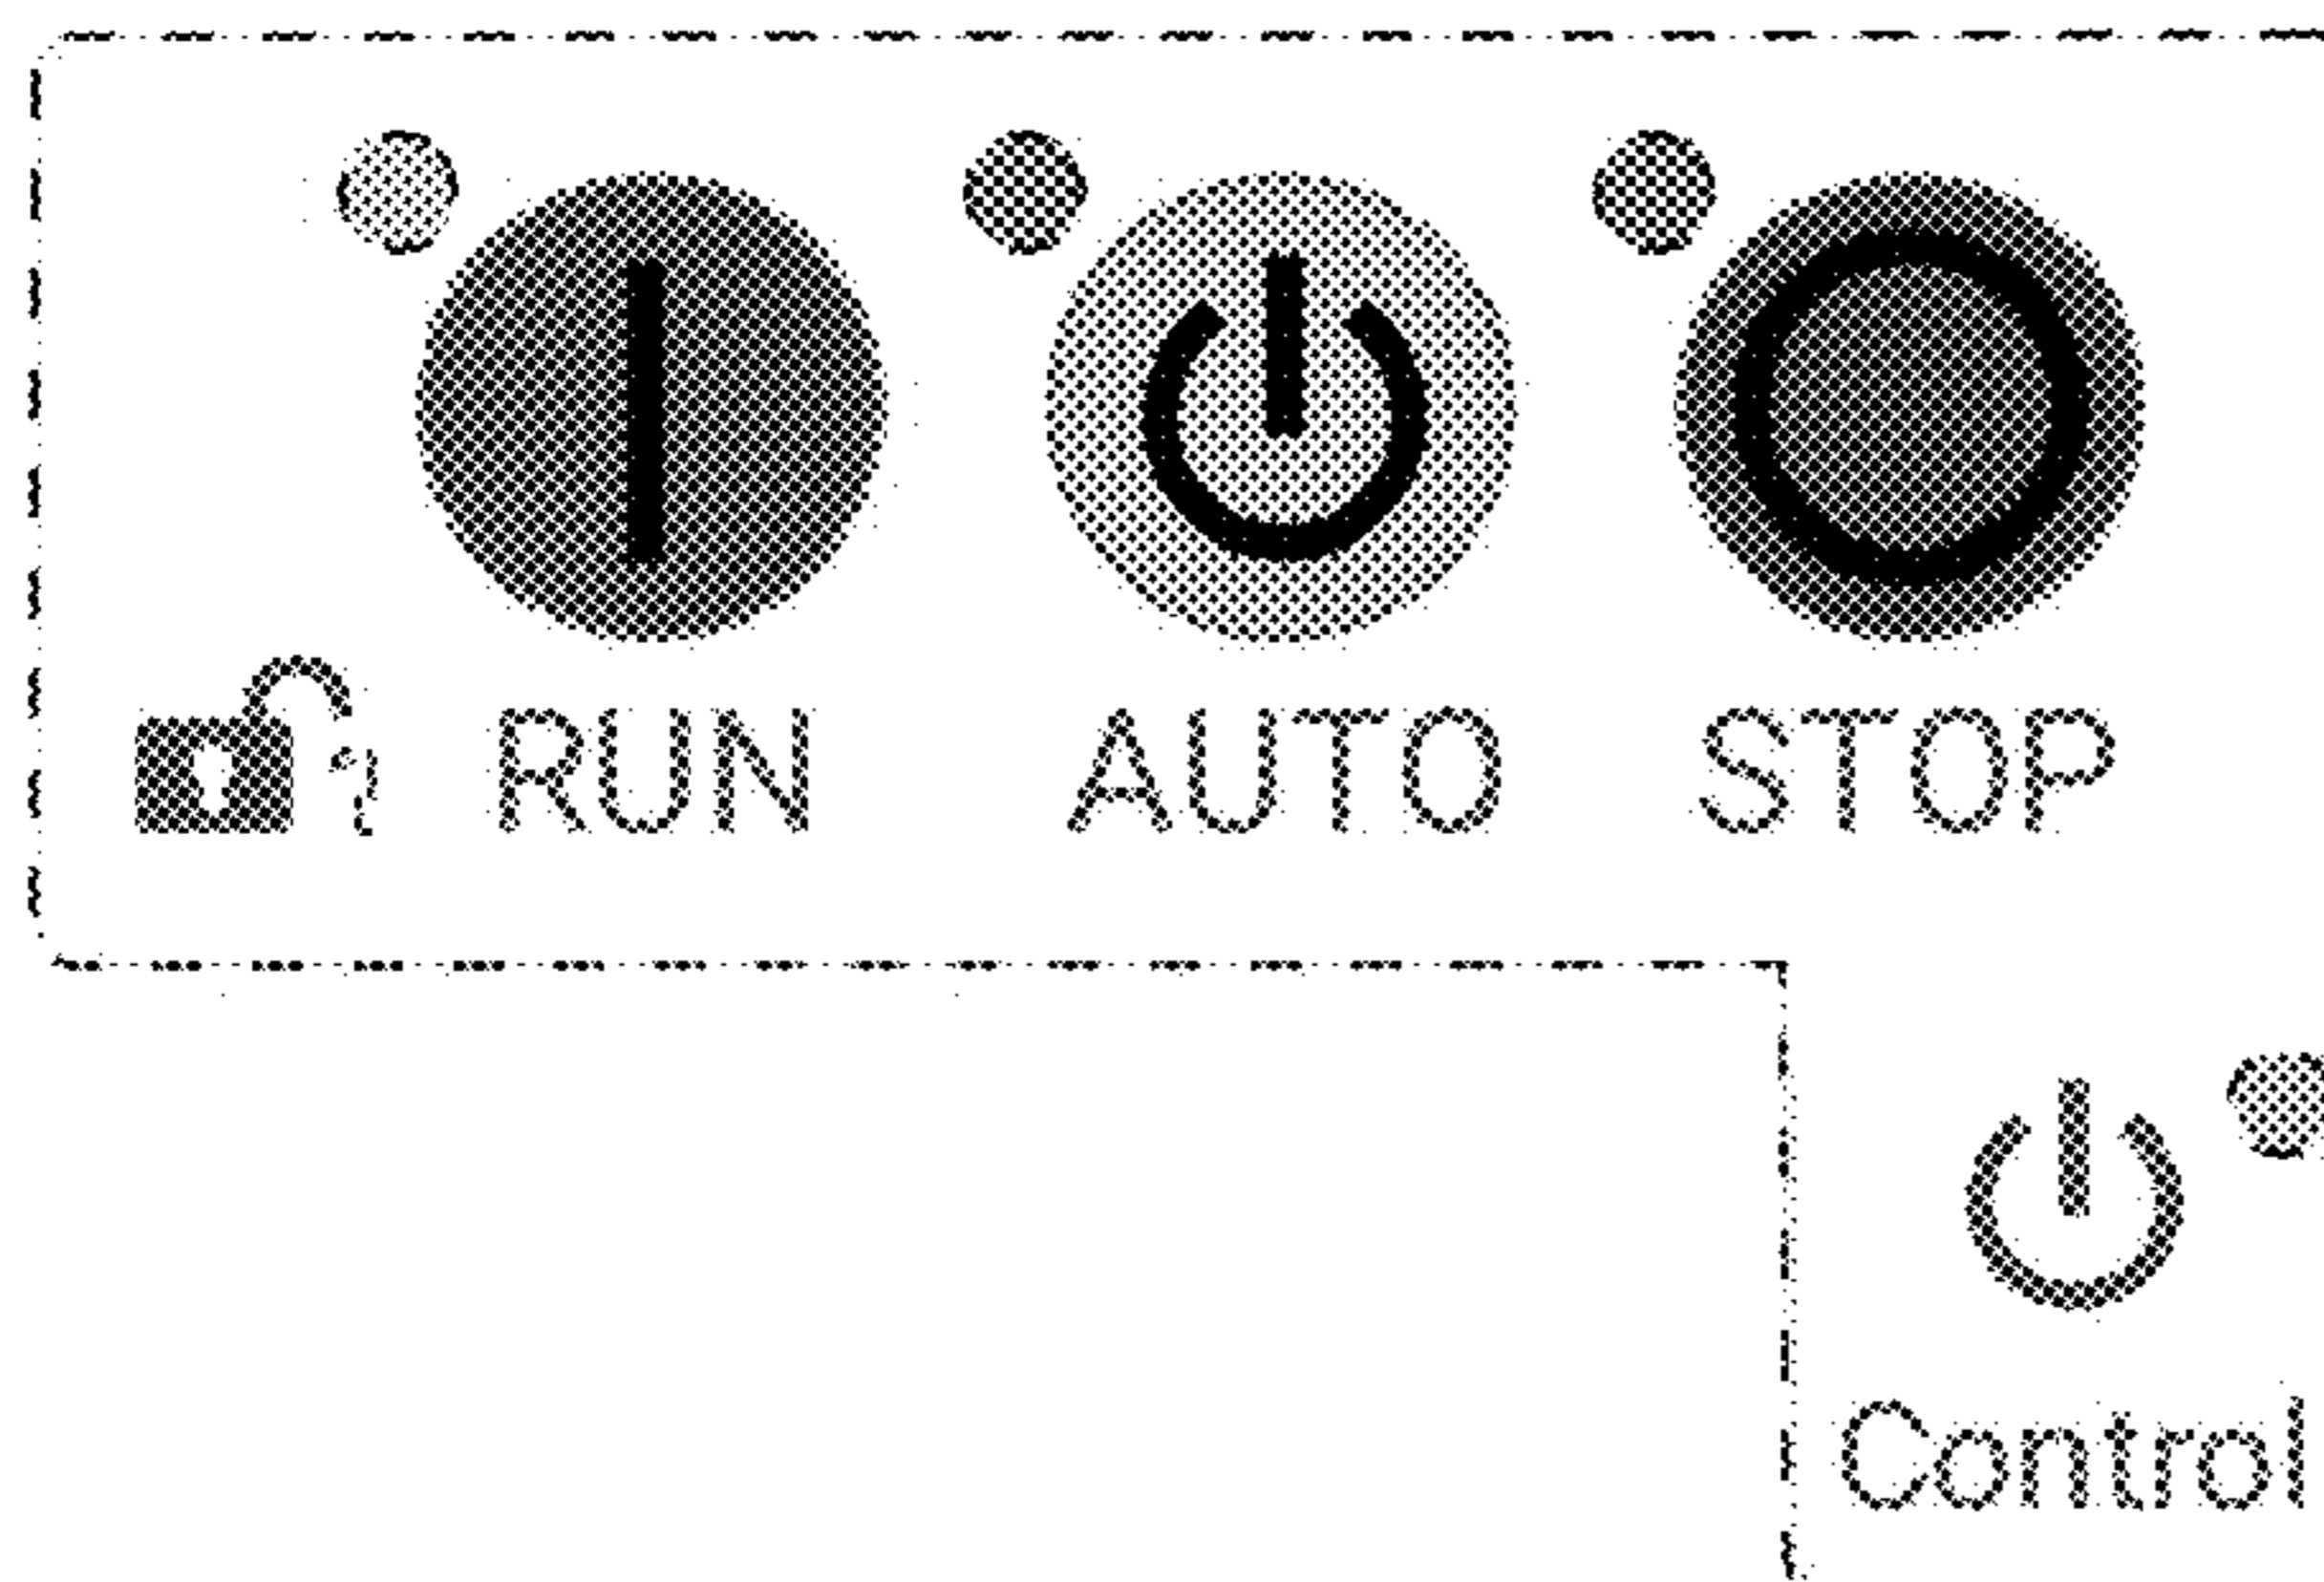

FIG. 3 is a front view of another embodiment of a display screen or portion thereof with transitional graphical user interface; and,

FIG. 4 is a front view of second image thereof.

The peripheral dashed broken lines depict a display screen or portion thereof, and form no part of the claimed design. The interior broken lines and shaded portions within interior broken lines depict portions of the graphical user interface which form no part of the claimed design.

The appearance of the graphical user interface transitions between the images shown in FIGS. 1-2 and FIGS. 3-4. The process in which one image transitions to another forms no part of the claimed design.
