Primary Examiner — John M Otte

(57) **CLAIM**

The ornamental design for a smartphone display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of our design for a smartphone display screen or portion thereof with transitional graphical user interface;
FIG. 2 is a front view of a second image in the sequence thereof; and,
FIG. 3 is a front view of a third image in the sequence thereof.
The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 through 3. The process or period in which one image transitions to another image forms no part of the claimed design.
The outermost broken line rounded rectangle showing an electronic device illustrates environmental subject matter. The broken line showing a display screen, and all other broken lines showing portions of the graphical user interface illustrate portions of the article. None of the aforementioned broken line subject matter forms part of the claimed design. Thus, the area between the broken line showing the display screen, excluding all other broken lines, form the claimed design.

1 Claim, 3 Drawing Sheets
