

(10) **Patent No.:** US D1,065,417 S
(45) **Date of Patent:** ** Mar. 4, 2025

The diagram illustrates a cross-sectional view of a circular mechanical component, possibly a turbine or compressor. It features a central shaft assembly with a series of horizontal vanes or blades arranged radially. The outer casing is defined by a dashed circular line. The internal components are shown with solid lines, indicating their physical structure. The central shaft has a series of small circles, possibly representing bolts or fasteners, along its length. The overall design is symmetrical, suggesting a balanced mechanical structure.
