(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first image in a sequence of a display screen with animated graphical user interface showing my design;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a third image thereof; and,

FIG. 4 is a front view of a fourth image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 to 4. The process or period in which an image transitions to another image forms no part of the claimed design.

The outermost broken lines of even length showing the display screen form no part of the claimed design. The remaining broken lines showing the graphical user interface, such as text, form no part of the claimed design.

The tonal differences in the drawings illustrate a contrast in appearance.
