[57] CLAIM

The design for an adjustable suspender, substantially as shown and described.

DESCRIPTION

FIG. 1 is a rear perspective view of an adjustable suspender showing my new design; FIG. 2 is a front perspective view thereof; and FIG. 3 is a perspective view thereof, shown in a configuration assumed in normal use.

My design is characterized by a suspender with a doubled back hook-in-hole adjustor wherein the hook-receiving holes are formed by a row of sewn elongated button holes, each extending in a direction along the length of the suspender.
