[57] CLAIM  
The ornamental design for a closure and bezel for disk  
recorders and the like, substantially as shown and de-  
scribed.

DESCRIPTION  
FIG. 1 is a front elevational view of a closure and bezel  
for disc recorders and the like, showing my new design;  
FIG. 2 is a similar front elevational view thereof, but  
showing one of the closure members pivoted to an open  
position;  
FIG. 3 is a fragmentary front perspective view thereof;  
FIG. 4 is a fragmentary sectional view thereof, taken  
along line 4-4 of FIG. 1;  
FIG. 5 is a fragmentary sectional view of a second  
embodiment thereof, taken along a line corresponding  
to 4-4 of FIG. 1, the only difference residing in the  
relocation of the bezel and in all other respects being  
identical to the embodiment disclosed in FIGS. 1-4;  
FIG. 6 is a front elevational view of a third embodiment  
thereof, the only difference residing in the fact that this  
embodiment has but one closure;  
FIG. 7 is a rear perspective view of the closure member;  
FIG. 8 is an end elevational view thereof;  
FIG. 9 is a rear elevational view thereof;  
FIG. 10 is a right side elevational view thereof;  
FIG. 11 is a left side elevational view thereof.
