[57] **CLAIM**

The ornamental design for combined utility and bookholder supporting tray, hold open brace and patient restraint to be removably mounted on the armrests of collapsible wheelchairs, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a combined utility and bookholder supporting tray, hold open brace and patient restraint to be removably mounted on the armrests of collapsible wheelchairs, viewed from a position spaced above and to the rear or patient side thereof; FIG. 2 is a side elevation view thereof, showing a bookholder rack supported thereon indicated in broken lines, the opposite side elevation view being the mirror image thereof; FIG. 3 is a bottom view thereof; and FIG. 4 is a front elevation view thereof.

The outwardly opening depending distorted U-shaped bracket portions fixed to the underside of the rearwardly projecting side legs of the tray fit about the armrests portion of conventional collapsible wheelchairs.
