[57] CLAIM

The ornamental design for a convertible bench, as shown and described.

DESCRIPTION

FIG. 1 shows an exploded view of the components of my convertible bench which are: four hinged interfacing beveled members, and a base consisting of a horizontal frame and two vertical supporting members.

FIG. 2 is a perspective view disclosing the end and side not shown in FIG. 1 of the convertible bench embodying my new design, the view illustrating the convertible bench when positioned as a for use bench.

FIG. 3 is a second perspective view thereof, the view illustrating the convertible bench when one of the hinged interfaced members is positioned for use as a chair with backrest. When used as a chair, two horizontal members remain in the folded position and two other members are put into a peaked position.
