CLAIM

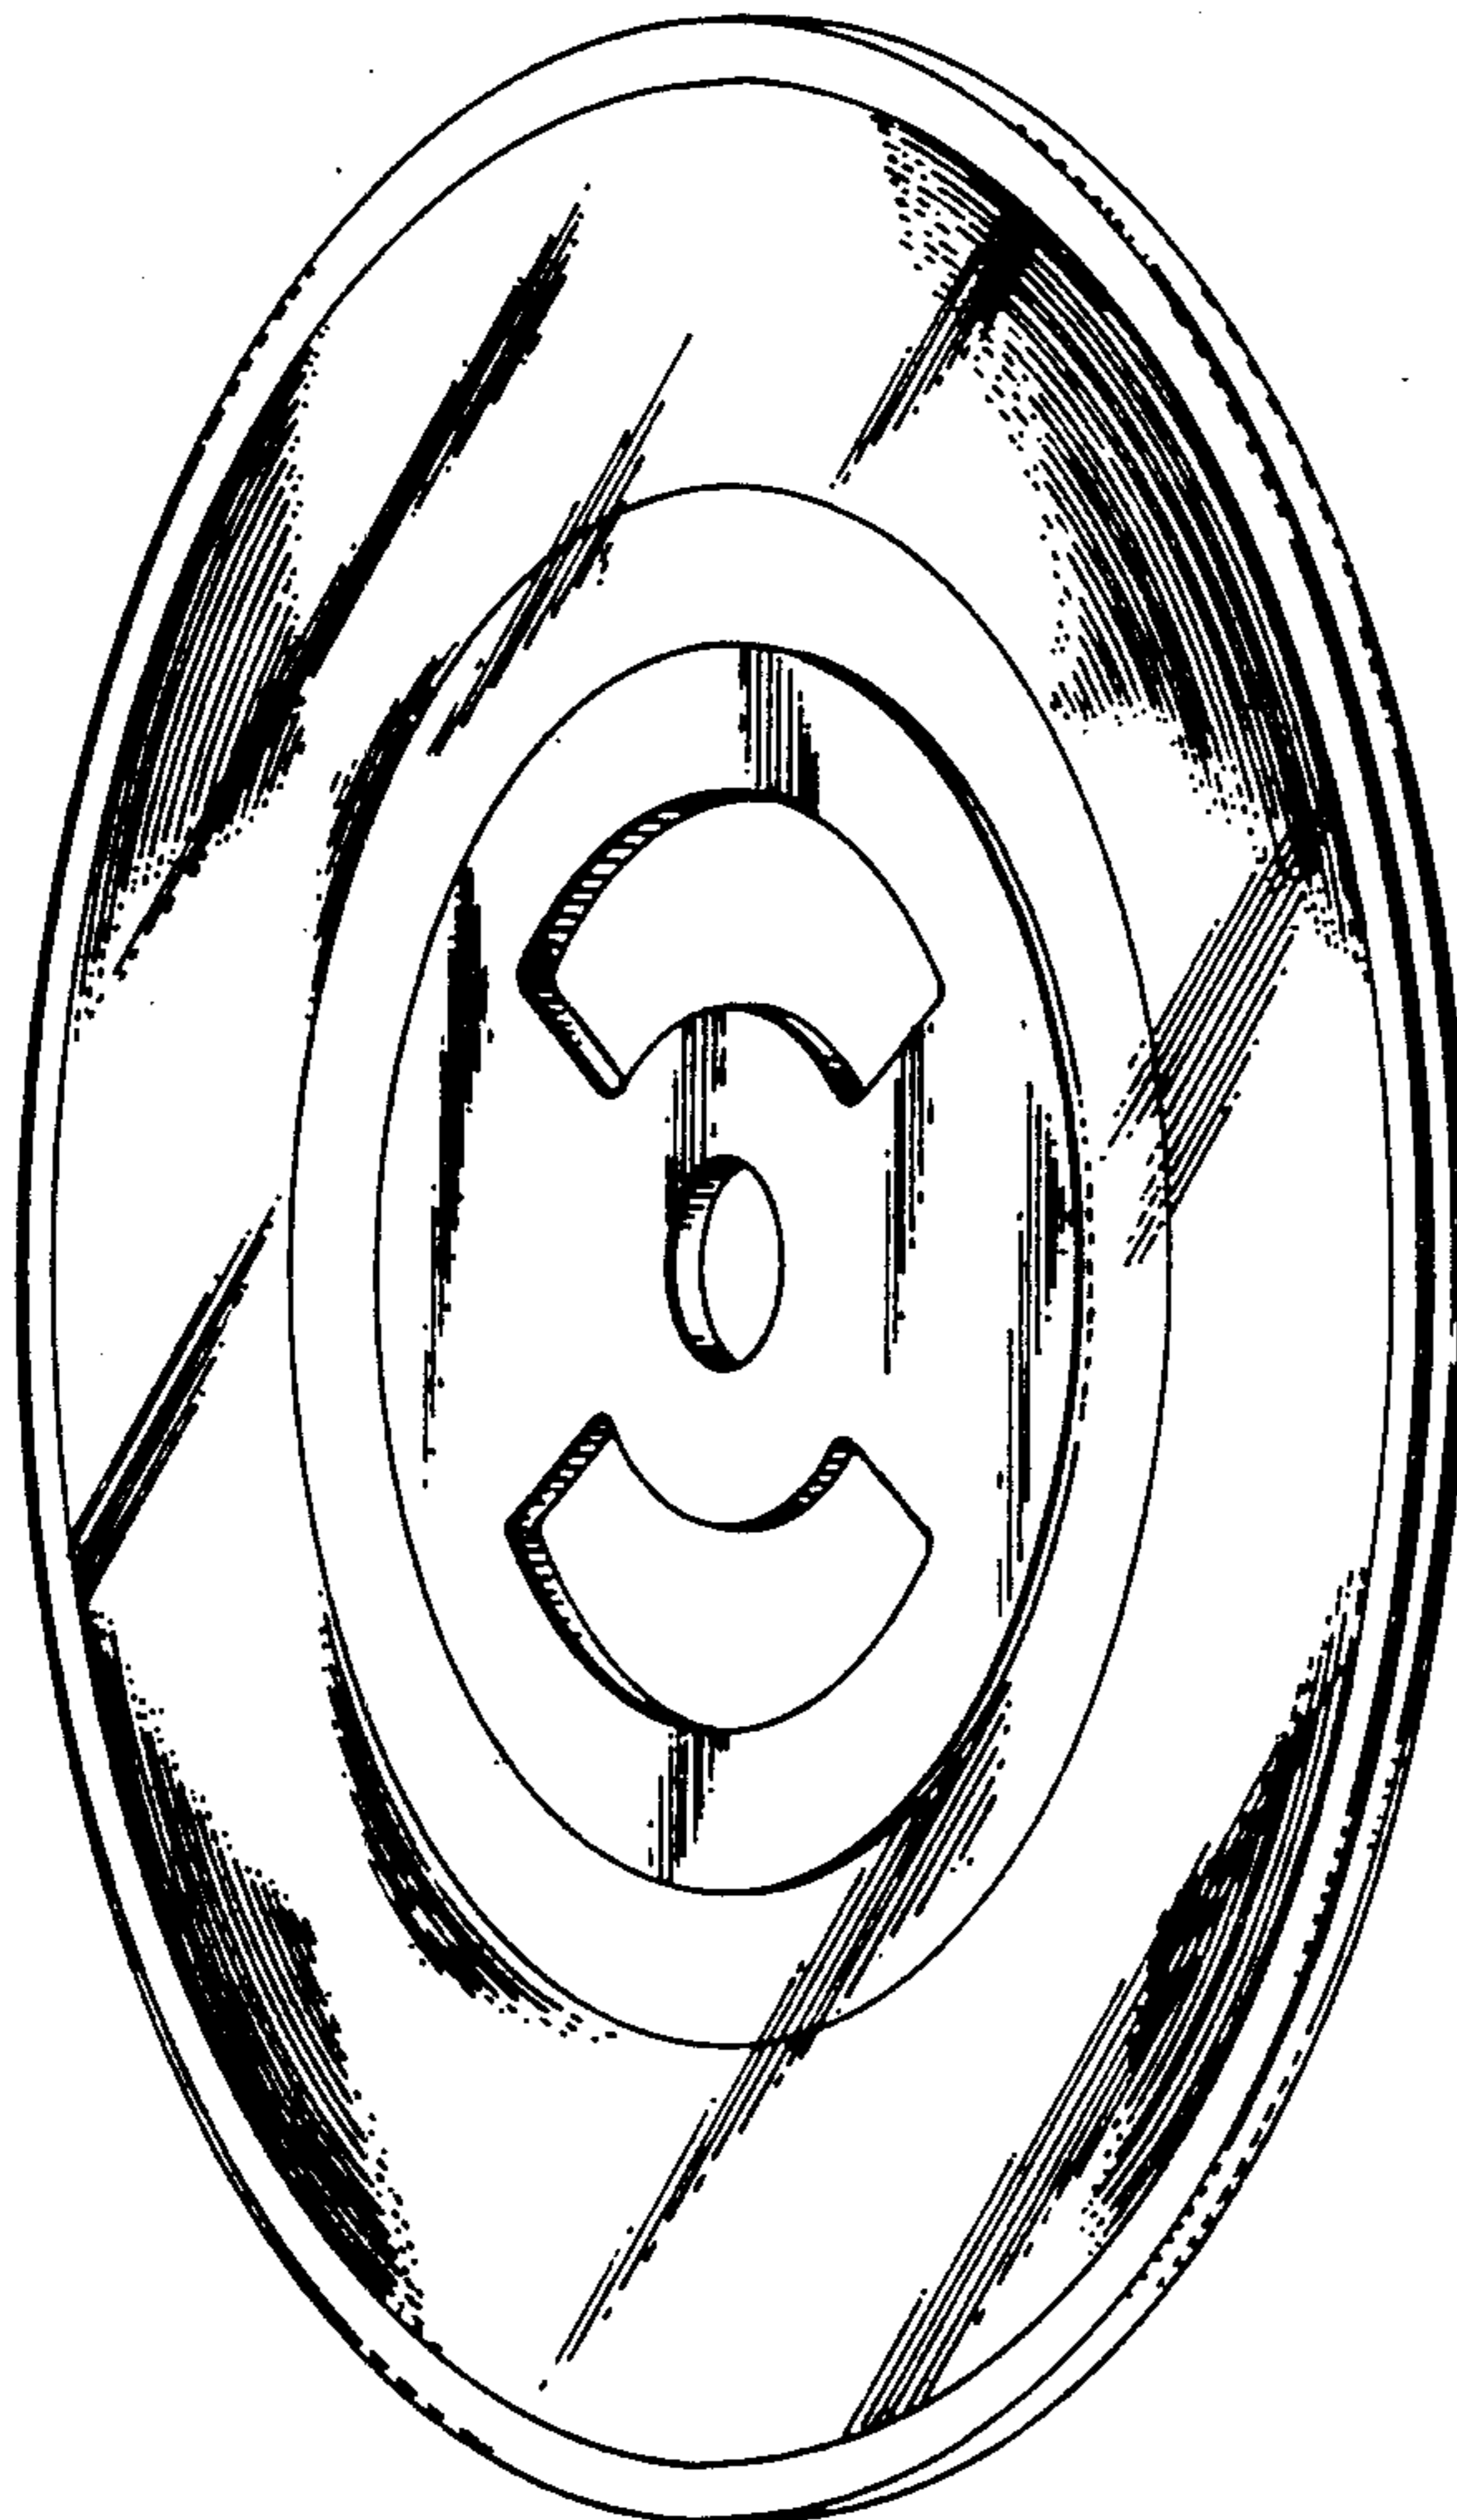

The ornamental design for a record, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a record, showing my design; and

FIG. 2 is a front elevation view thereof.

As illustrated in the accompanying drawings, the dominant features of this design are characterized primarily by a pair of fan shaped finger holes having a balanced appearance due to symmetry and alignment of the opposite radial edges of the two finger holes.

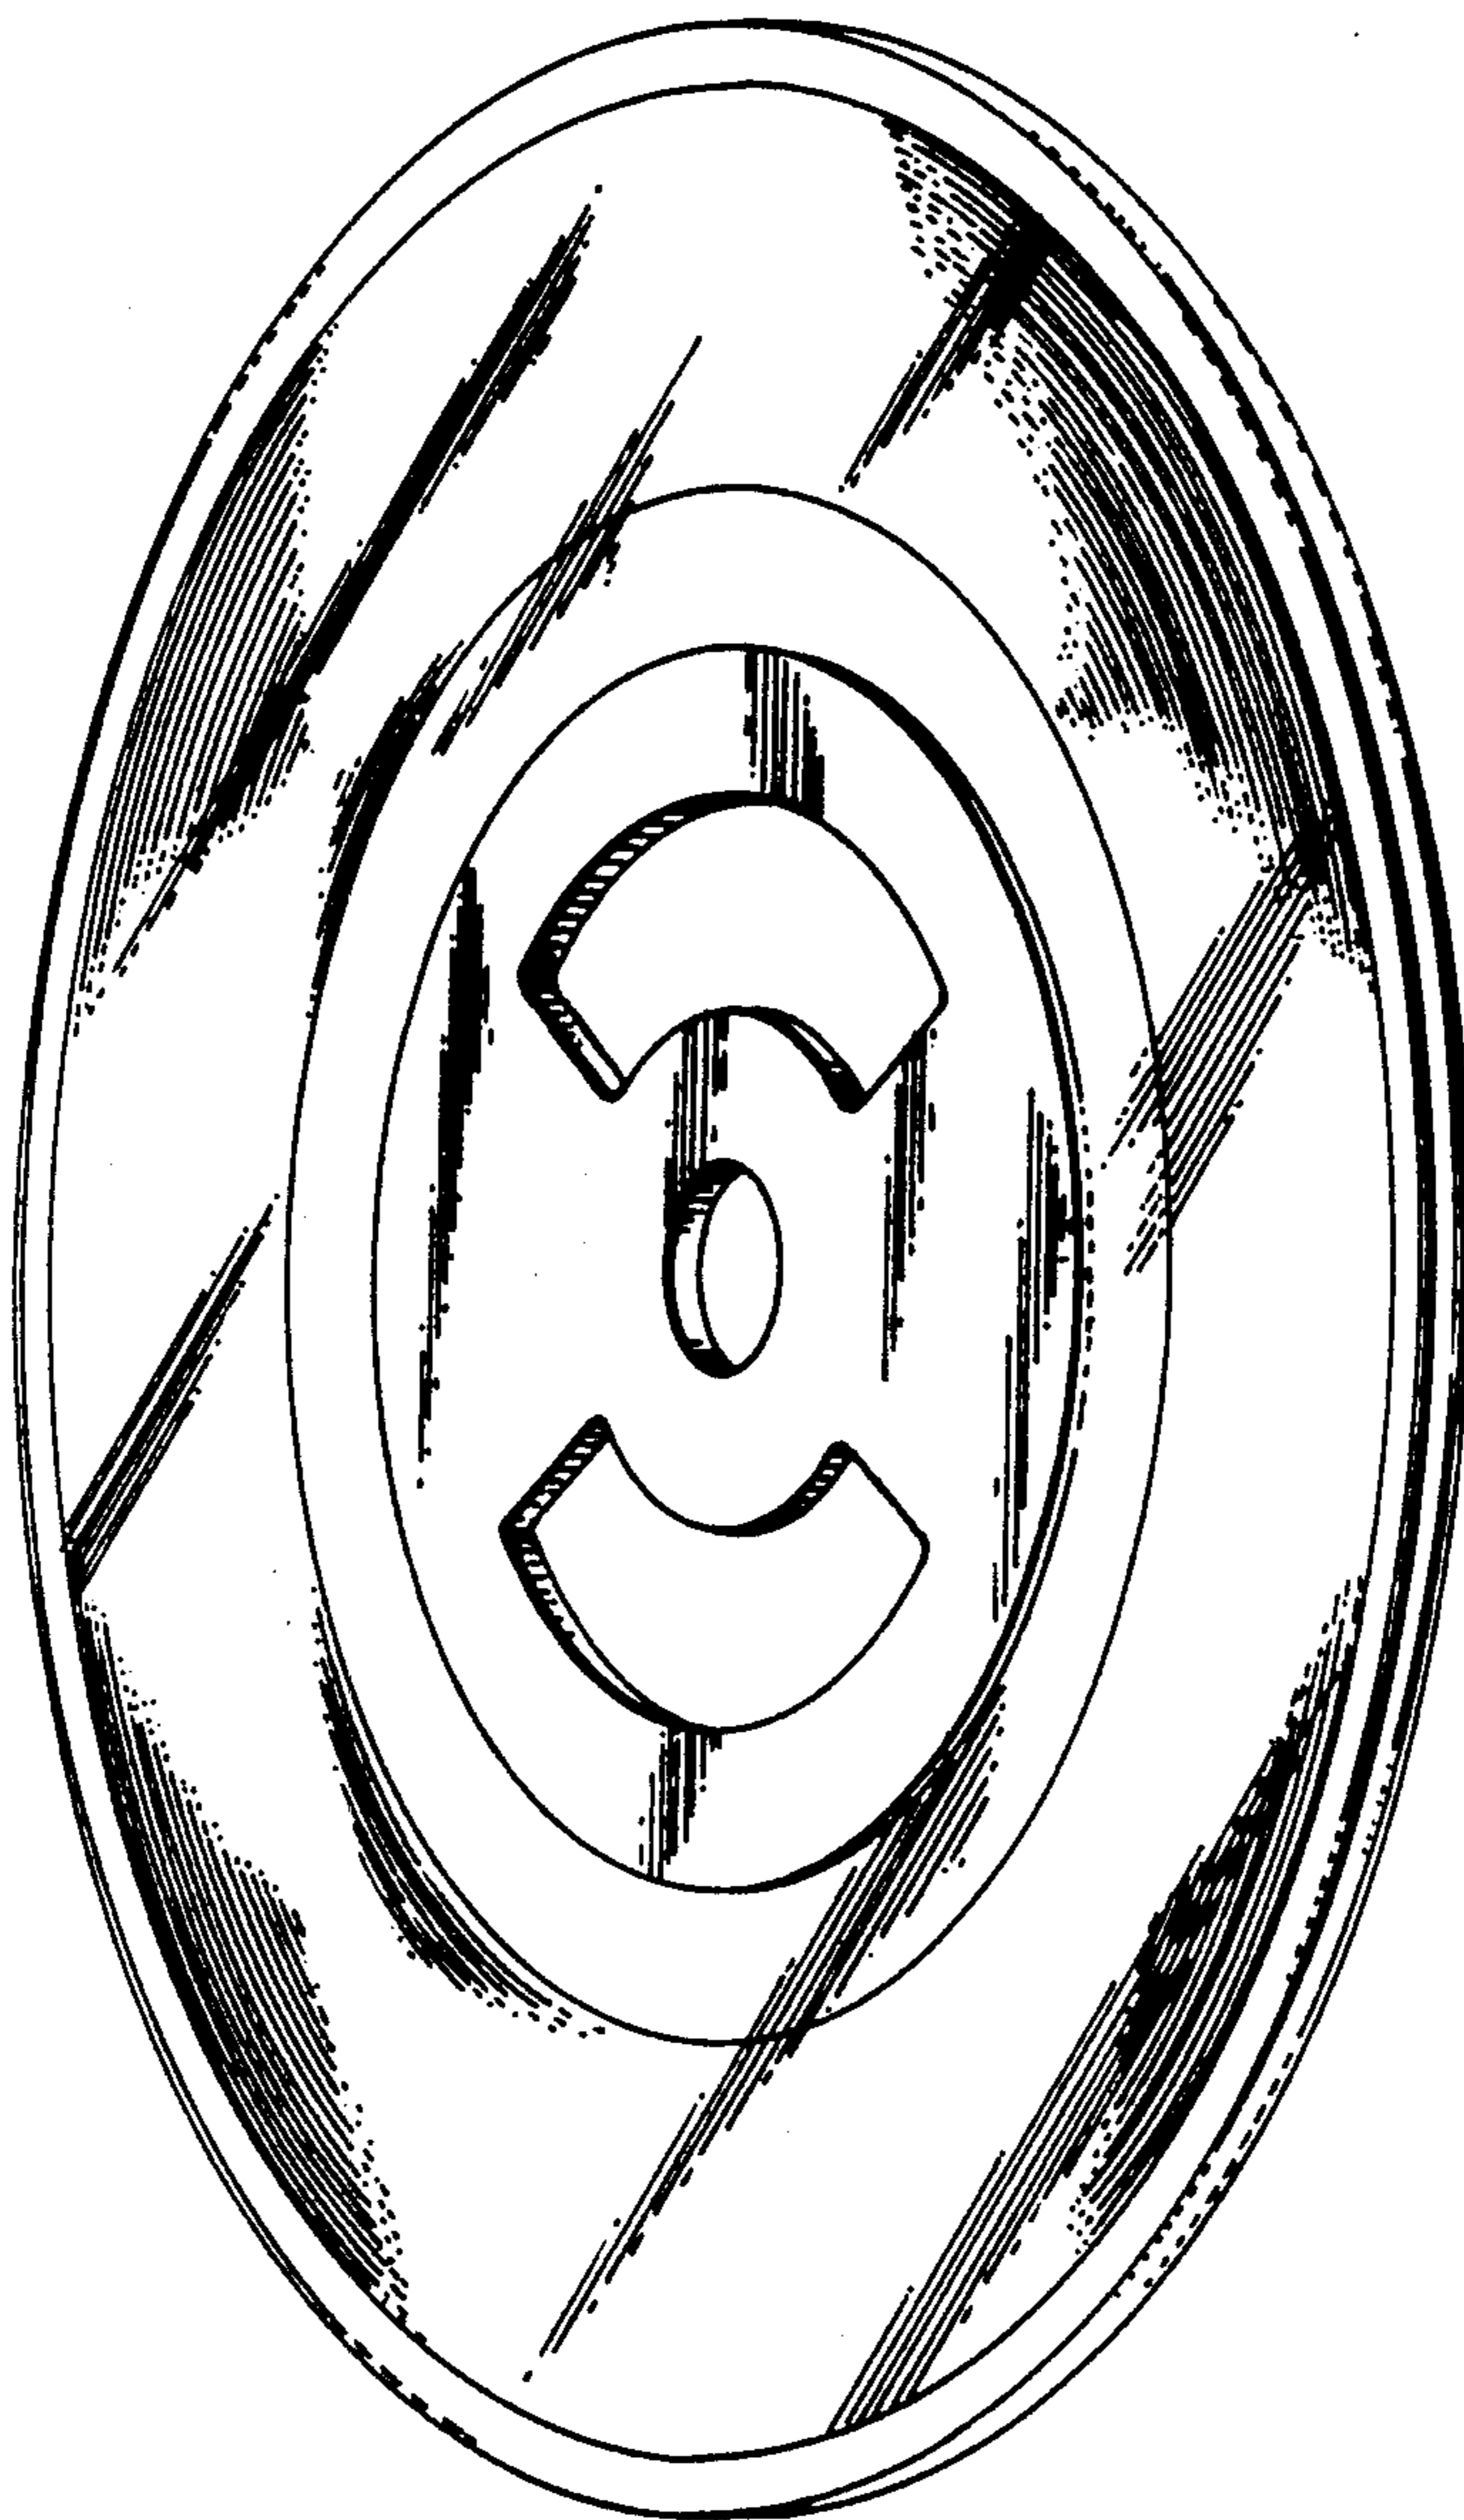

Fig. 1.

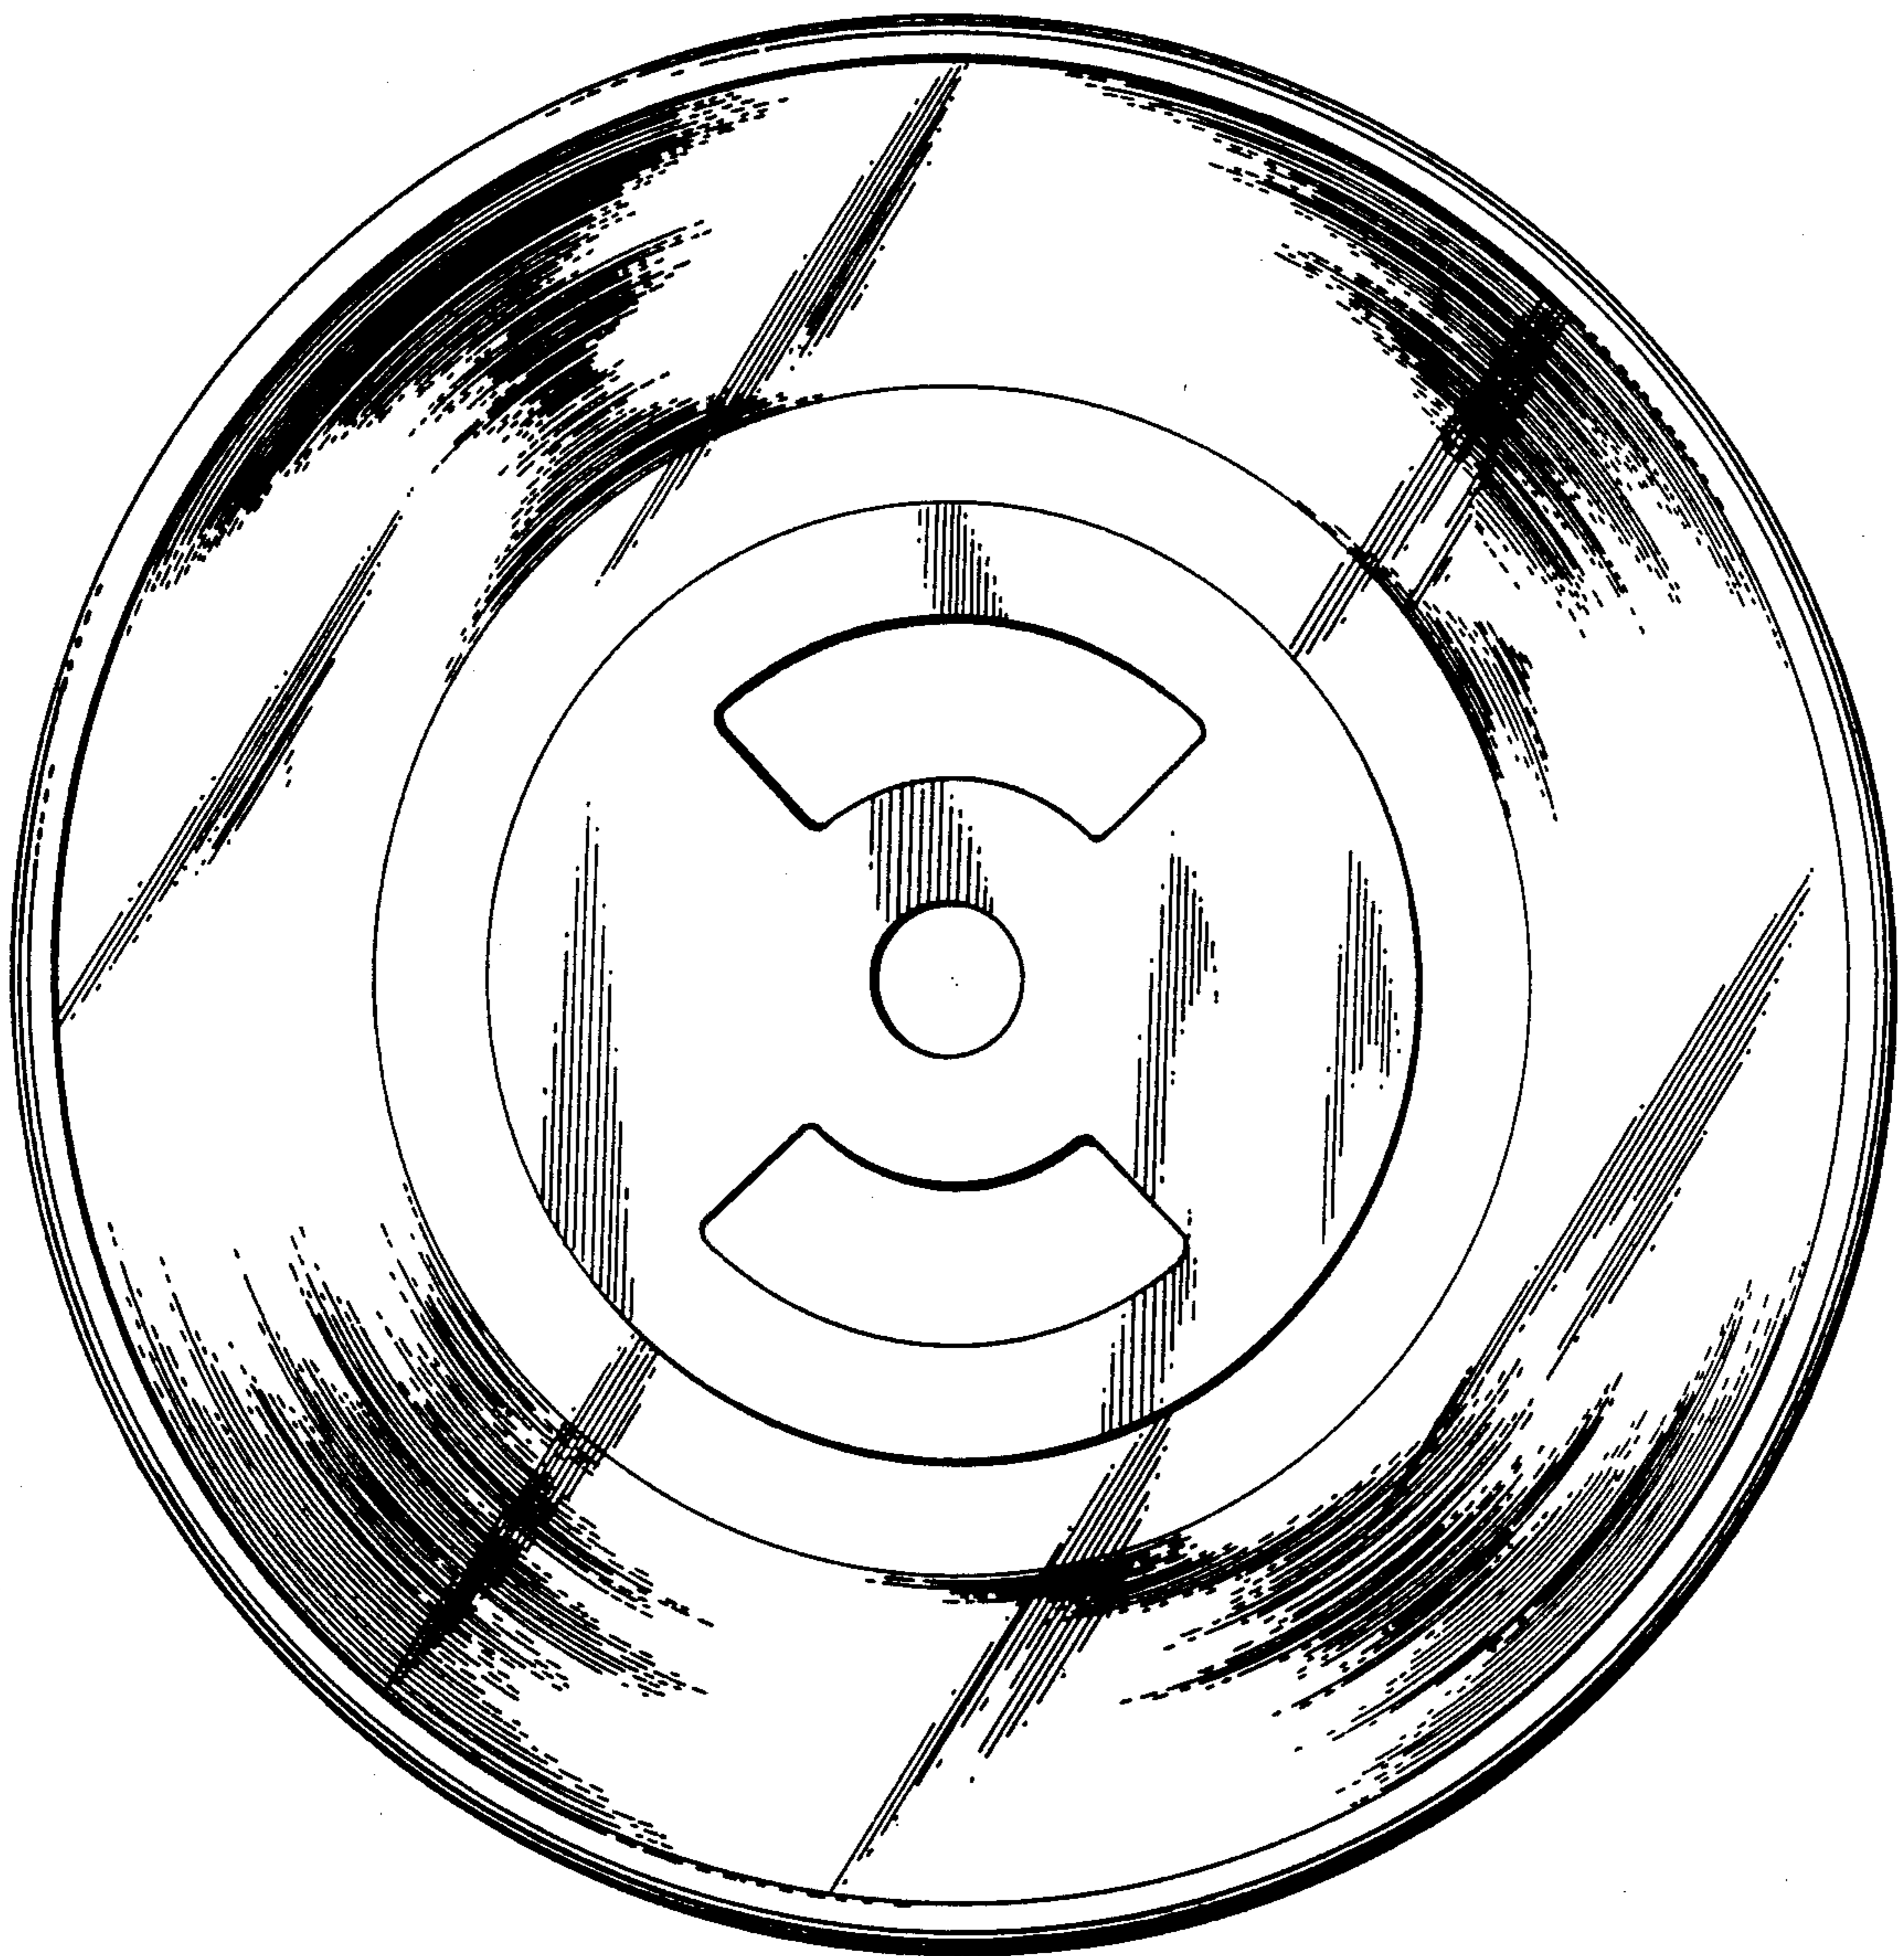

Fig. 2.
