The ornamental design for a can opener for opening dual aperture pop-top cans, as shown and described.

DESCRIPTION

FIG. 1 is a side elevational view of a can opener for opening dual aperture pop-top cans showing my new design, the fragmentary broken line disclosure of a can being for purposes of illustrating environmental structure only;

FIG. 2 is a top view thereof;

FIG. 3 is a rear elevational view thereof;

FIG. 4 is a front elevational view thereof;

FIG. 5 is an elevational view thereof depicting a side opposite the side shown in FIG. 1, illustrating the centrally located gripping projection, the air vent opener and the terminally located, oval shaped drinking aperture opener; and

FIG. 6 is a view thereof from below, illustrating the extension of the drinking aperture opener beyond the end of the handle.
