[57] CLAIM

[21] Appl. No.: 766,844

The ornamental design for a reflector concentrator useful for solar energy, substantially as shown.

[22] Filed: Feb. 8, 1977

DESCRIPTION

[51] Int. Cl. D25—03

FIG. 1 is a view in perspective of a reflector concentrator useful for solar energy according to my invention, and representing a view of what may form the front/side, or rear/side, or vice versa, of such reflector collector, but which for ease of description will be designated as a front/side view.
