[57] CLAIM

The ornamental design for a sealing liner for a closure,
substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a sealing liner for a
closure showing my new design;
FIG. 2 is a bottom plan view; and
FIG. 3 is a sectional view taken on the line 3—3 of FIG.
1.

The characteristic features of my new design reside in a
sealing liner for a closure having a peripheral vertical
wall which is beveled at its upper outer edge, in
combination with a central boss which has a vertical
wall and has a width of approximately one-third the
diameter of the sealing liner, for a closure and a height
approximately twice the height of the peripheral wall.
