Primary Examiner—Bernard Ansher

[57] **CLAIM**

The ornamental design for an invalid's treatment basin, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of an invalid treatment basin showing my new design; FIG. 2 is a side elevation thereof; FIG. 3 is a bottom plan view thereof; FIG. 4 is an elevation as seen from the right of FIG. 1; and FIG. 5 is a cross-section taken on line 5—5 of FIG. 2. The basin is designed with inward formed top tip to prevent-liquids from splashing. It incorporates a drain for use with or without a flexible hose for ease of draining liquids accumulated in the basin. The basin has pockets on the outside for insertion on a stand which would support the basin.
