[57] CLAIM

The ornamental design for a dispensing carton or similar article, as shown and described.

DESCRIPTION

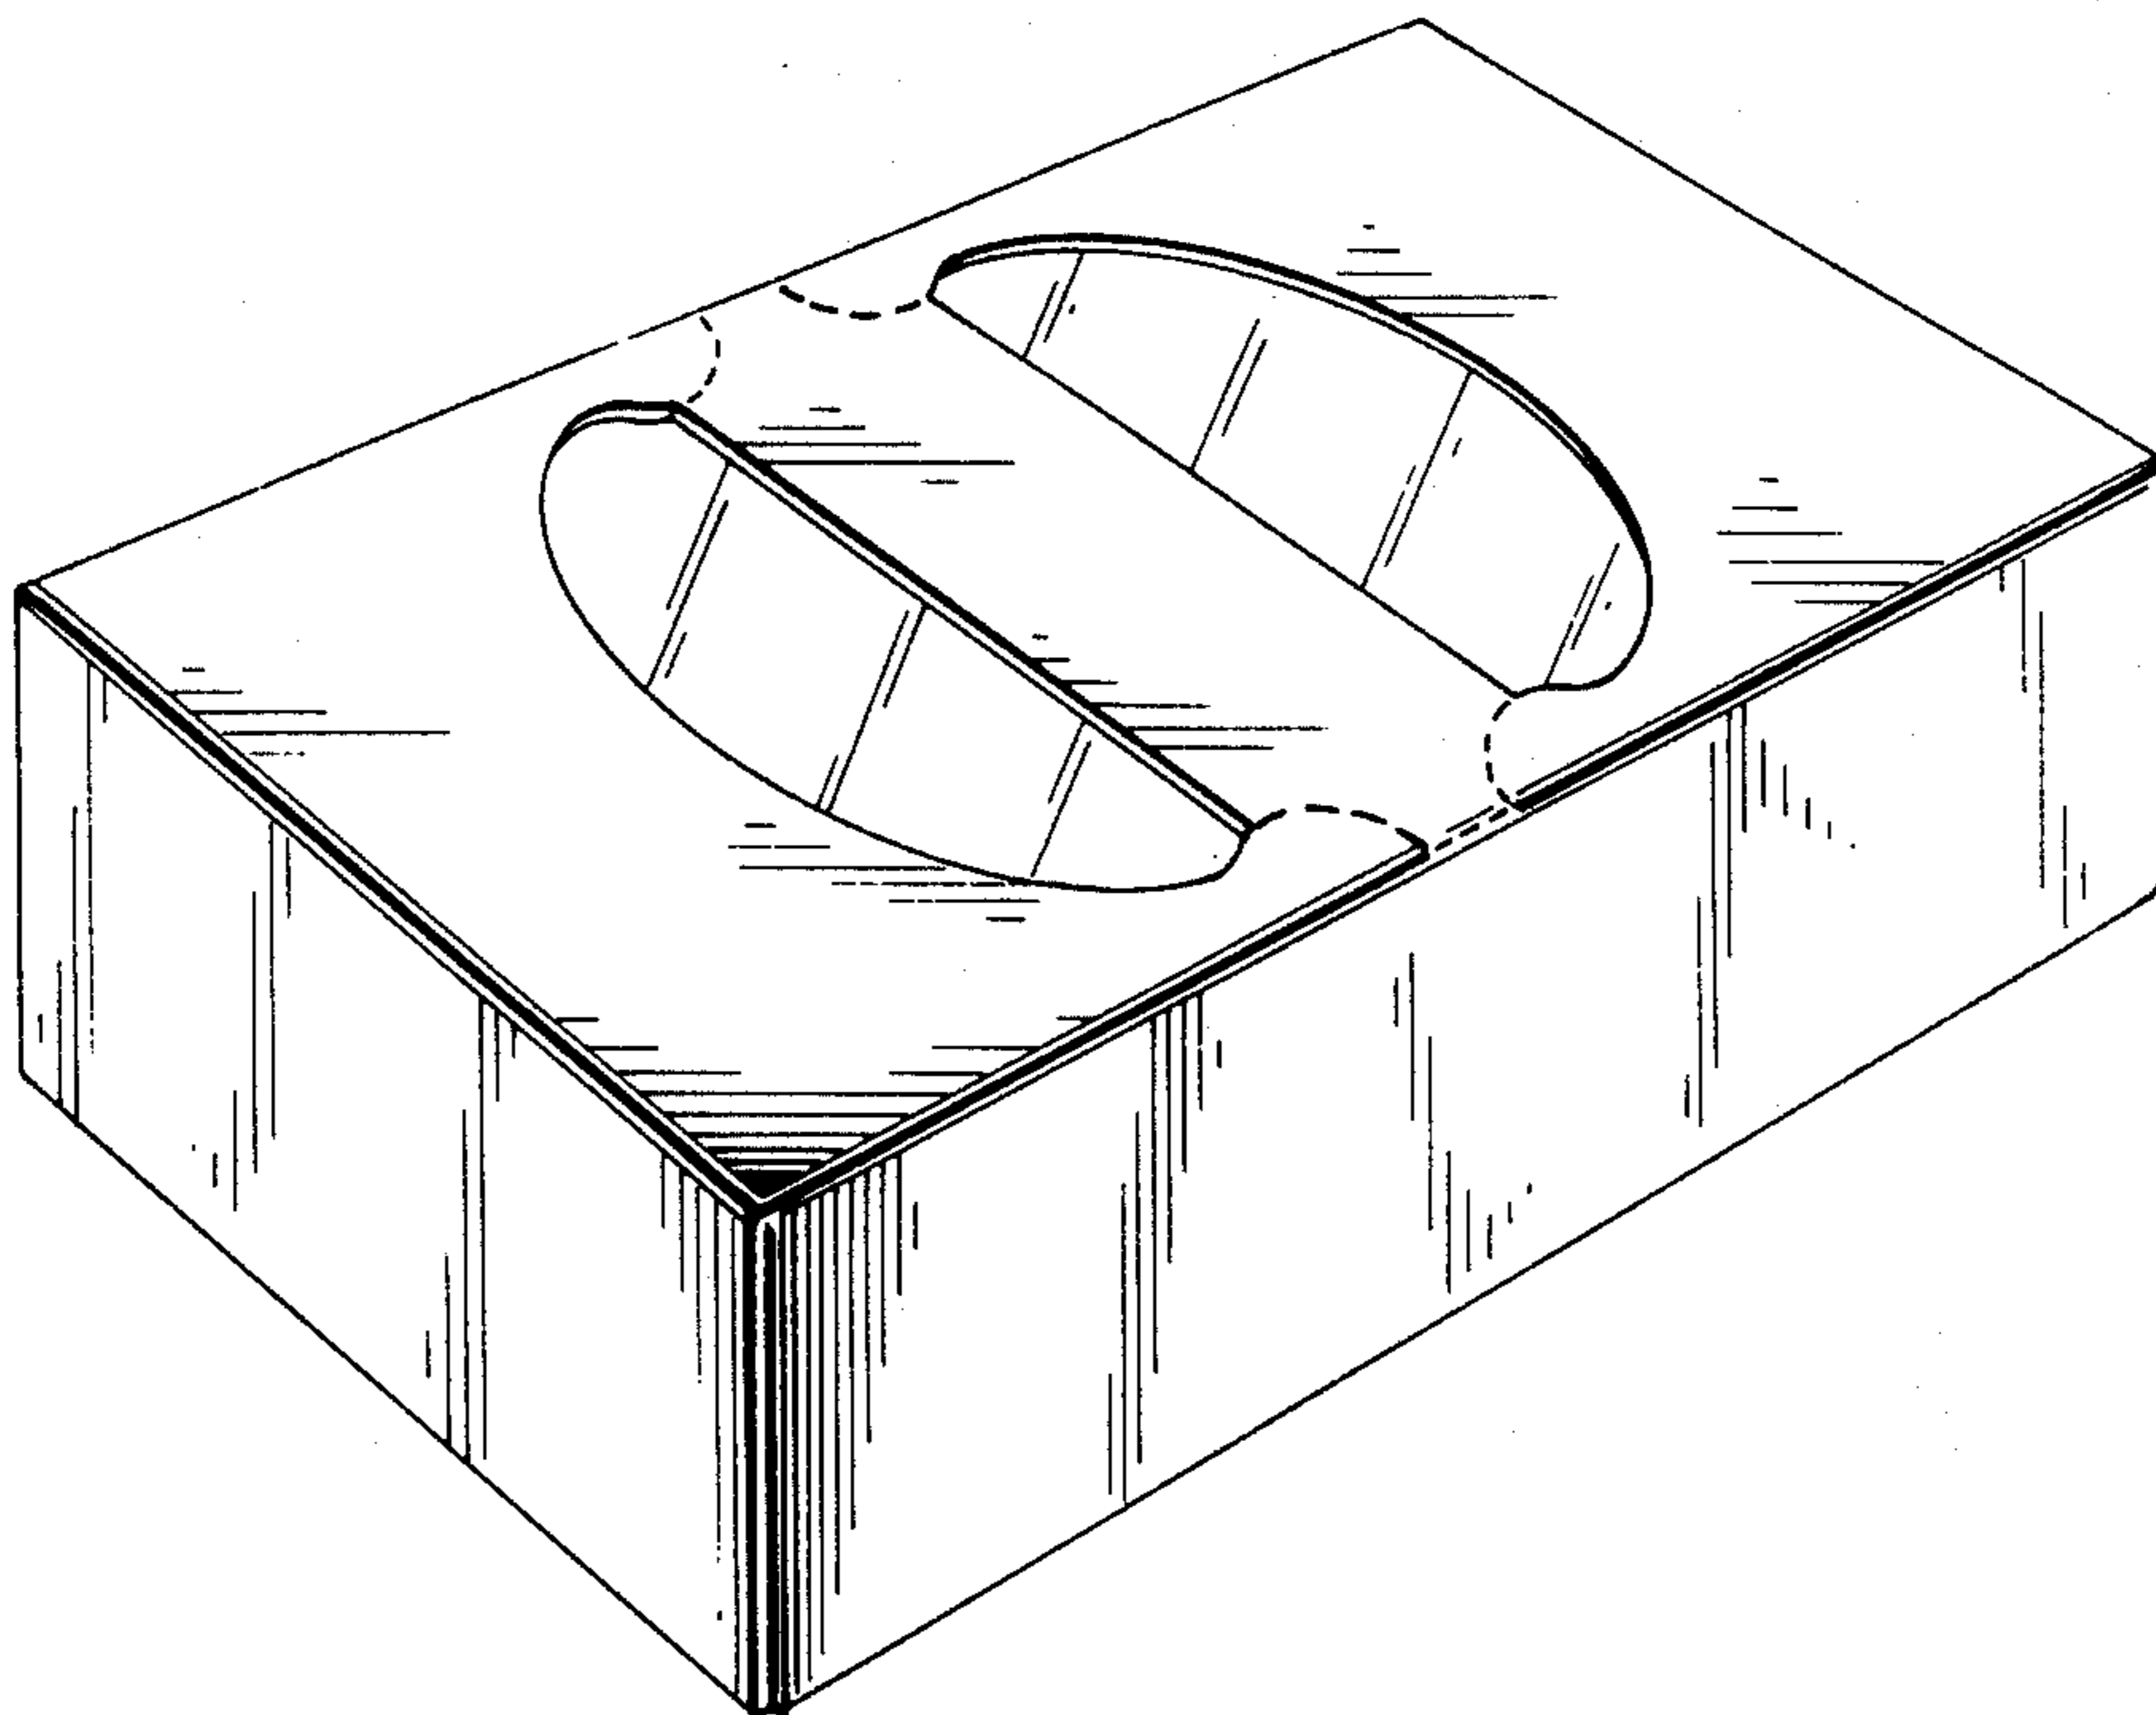

FIG. 1 is a perspective view of a dispensing carton embodying my new design; FIG. 2 is a side elevational view, the opposite side being the same in appearance; and FIG. 3 is an end elevational view, the opposite end being the same in appearance.

The dash lines in FIG. 1 represent score lines. The bottom of the dispensing carton embodying my design is plain and unornamented.

The characteristic feature of my design is the particular configuration of the windows provided in the upper surface of the dispensing carton, which windows are disposed on opposite sides of the removable, straight bar member extending across the width of the dispensing carton.
