[57] CLAIM

The ornamental design for a hemodialysis reservoir or the like, as shown and described.

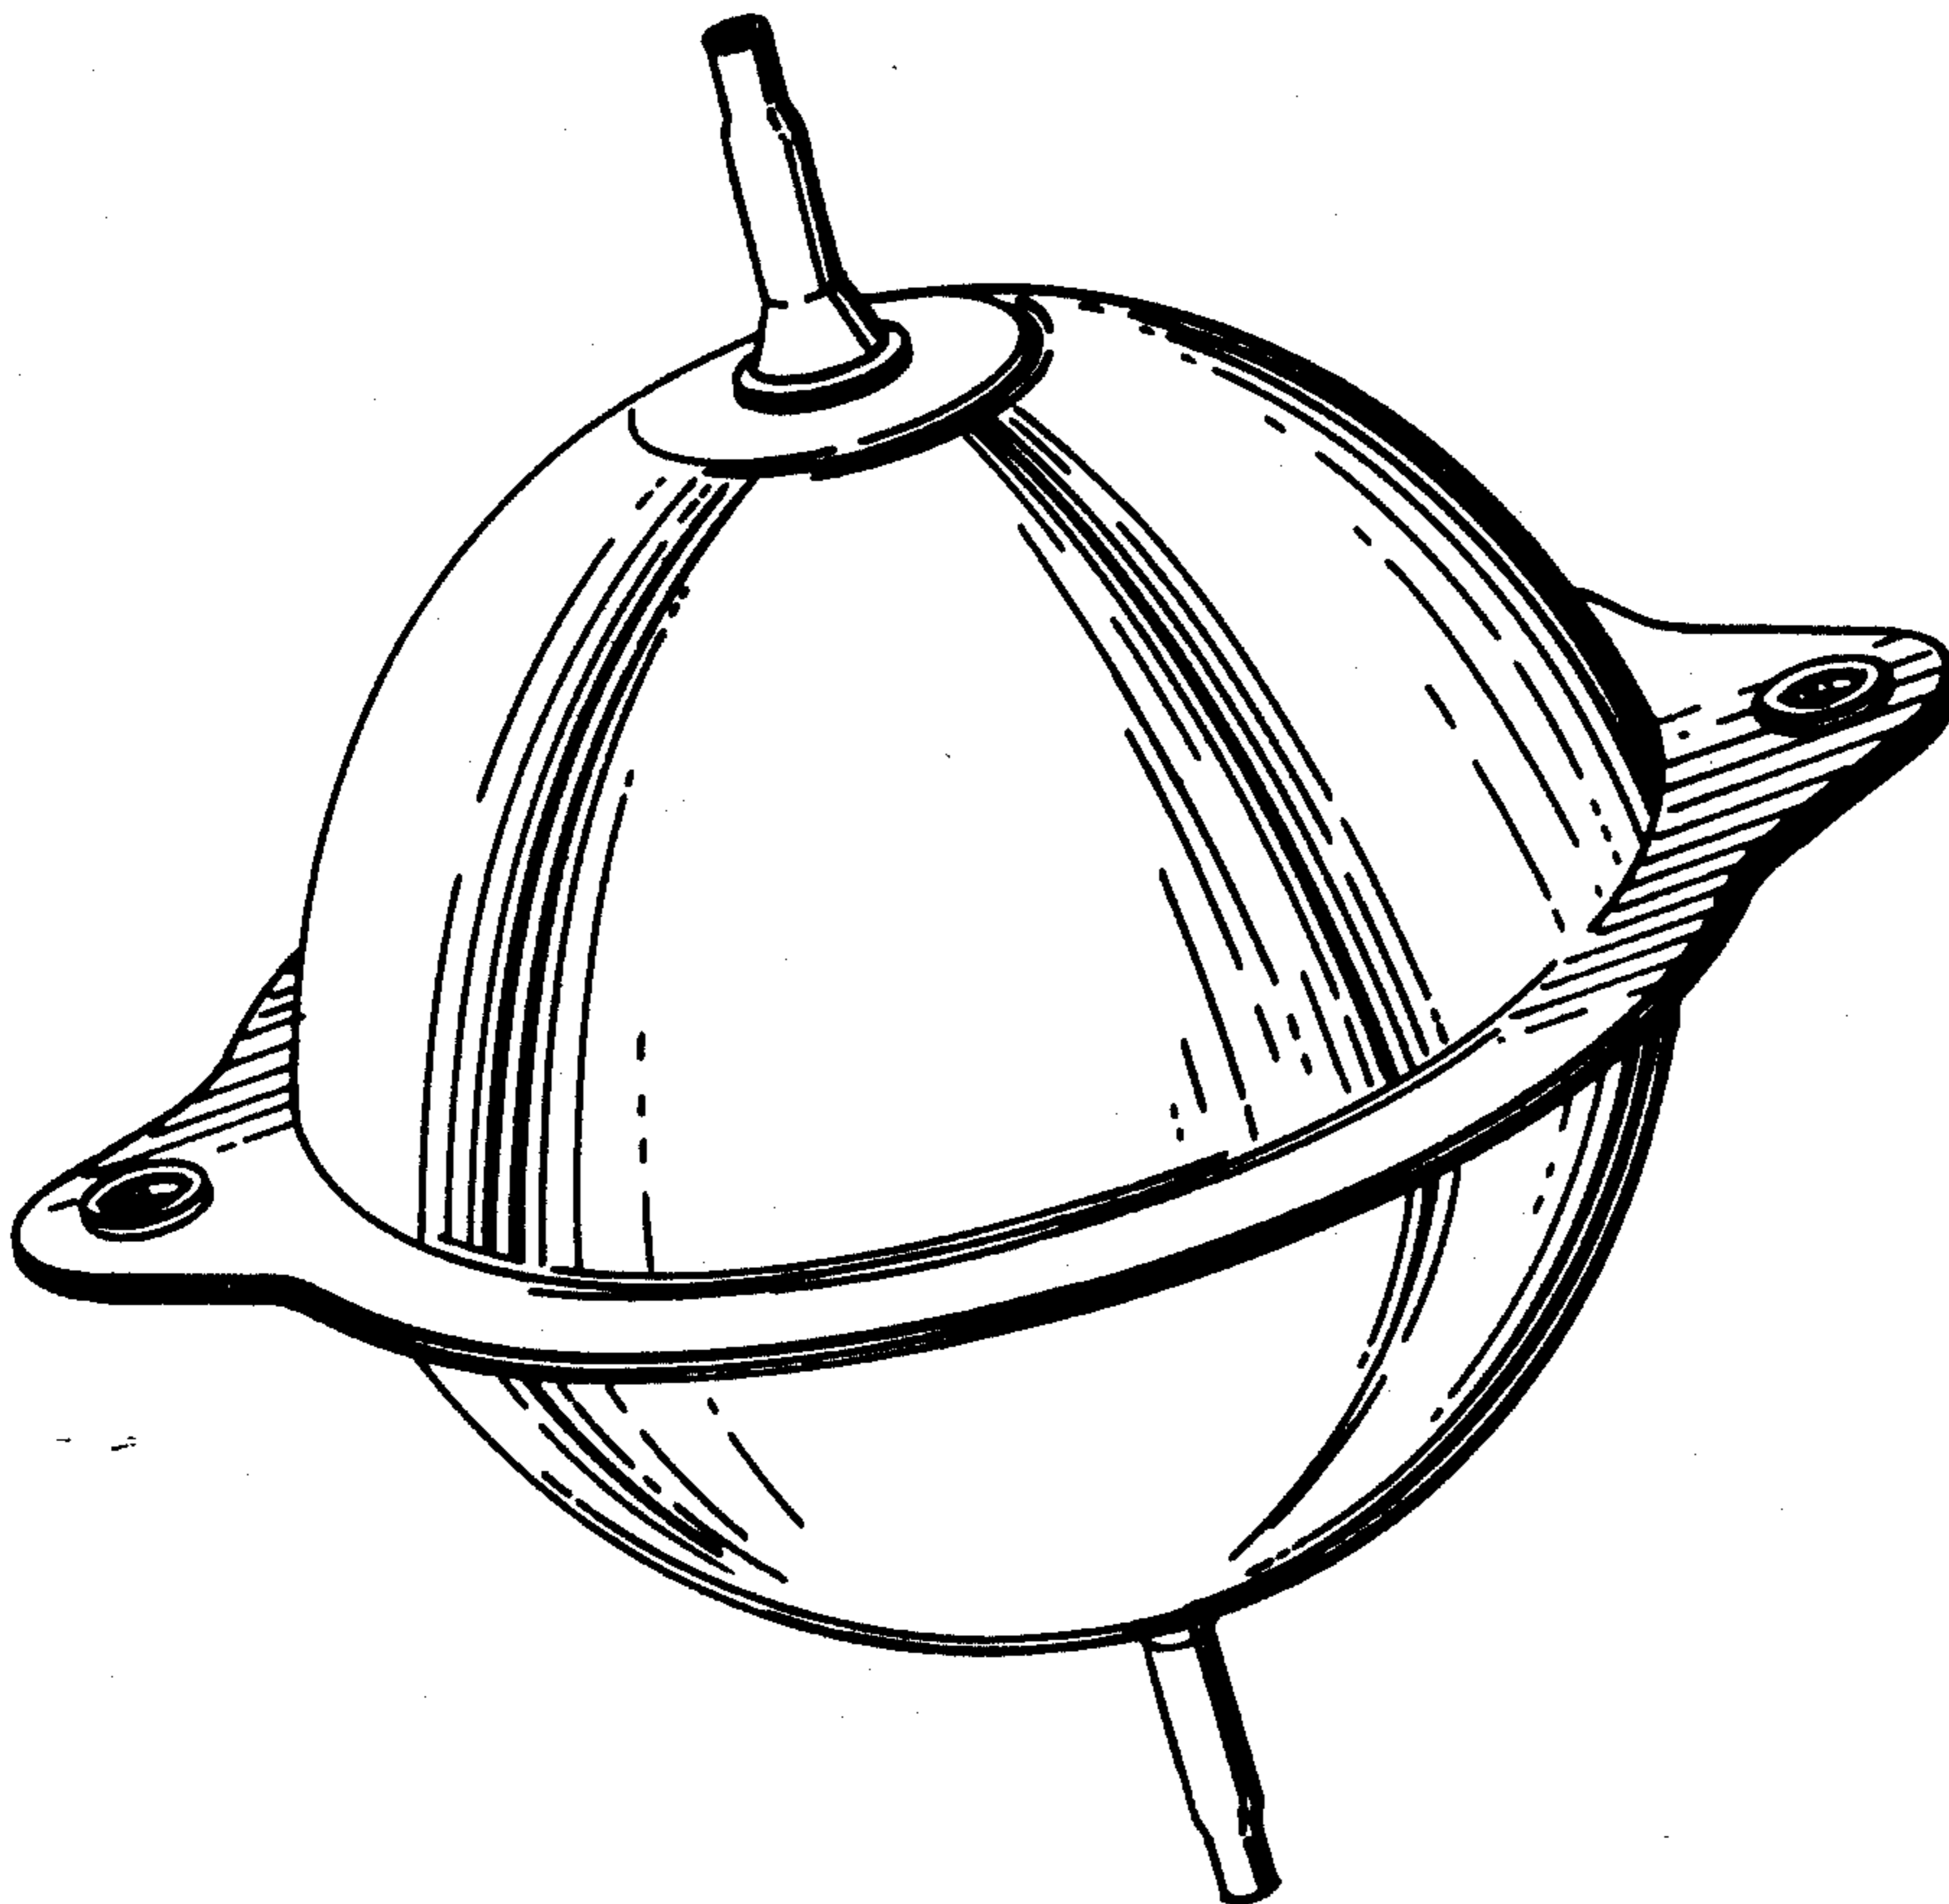

DESCRIPTION

FIG. 1 is an isometric view of the reservoir which is especially for biological liquid;

FIG. 2 is a top view of said reservoir, which view would be substantially identical to a bottom view thereof;

FIG. 3 is a front or face view of said reservoir, which would be substantially identical for either face of the reservoir.

The characteristic feature of my design resides in the specific configuration of the mounting bracket in combination with the spherical reservoir housing.

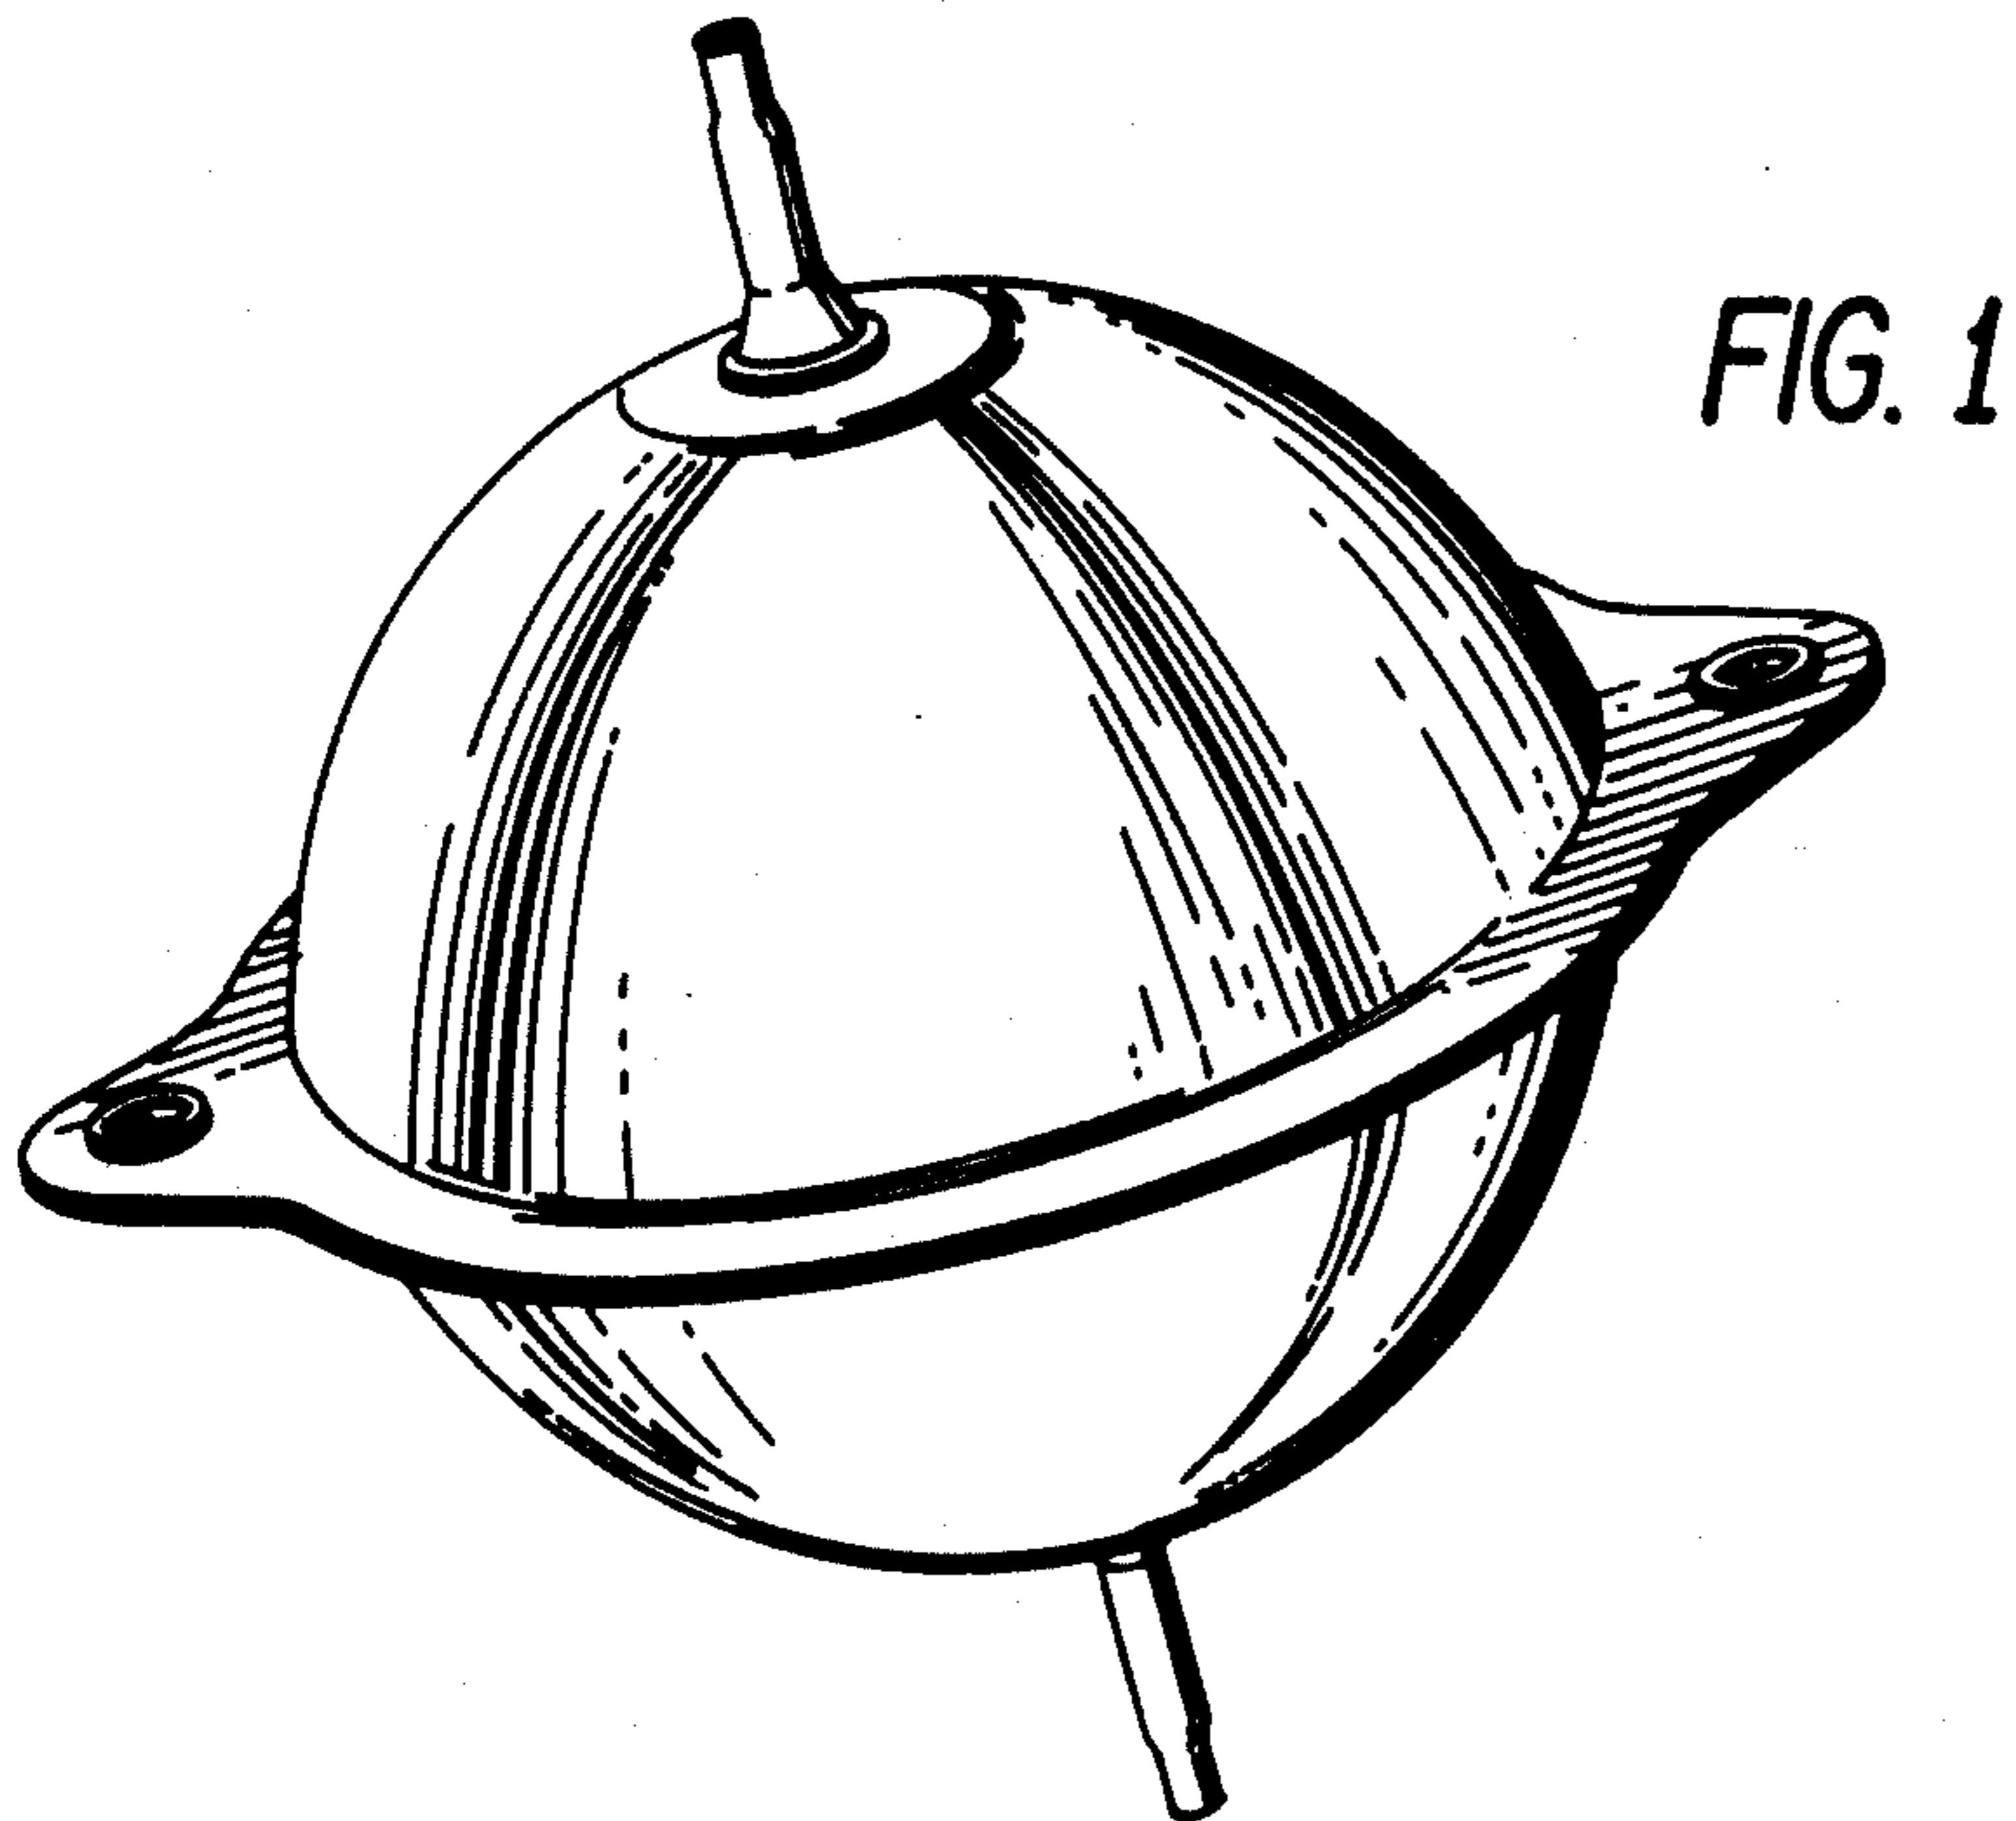

FIG. 2
