[57] CLAIM

The ornamental design of a tool for handling of electrical components, as shown and described.

DESCRIPTION

FIG. 1 is a side elevation view of the tool with the clamping mechanism retracted to the right, the opposite side being identical to that shown;
 FIG. 2 is a top elevation view of the tool as depicted in FIG. 1, the bottom side being identical to the top;
 FIG. 3 is a side elevation view of the tool with the clamping mechanism extended to the left;
 FIG. 4 is a top elevation view of the tool as depicted in FIG. 3, the bottom side being identical to the top;
 FIG. 5 is an end elevation view of the tool as depicted in FIG. 2, taken from the left side; and
 FIG. 6 is an end elevation view of the tool as depicted in FIG. 2, taken from the right side.
