CLAIM

The ornamental design for a pair of temple bars for eyeglasses, substantially as shown and described.

DESCRIPTION

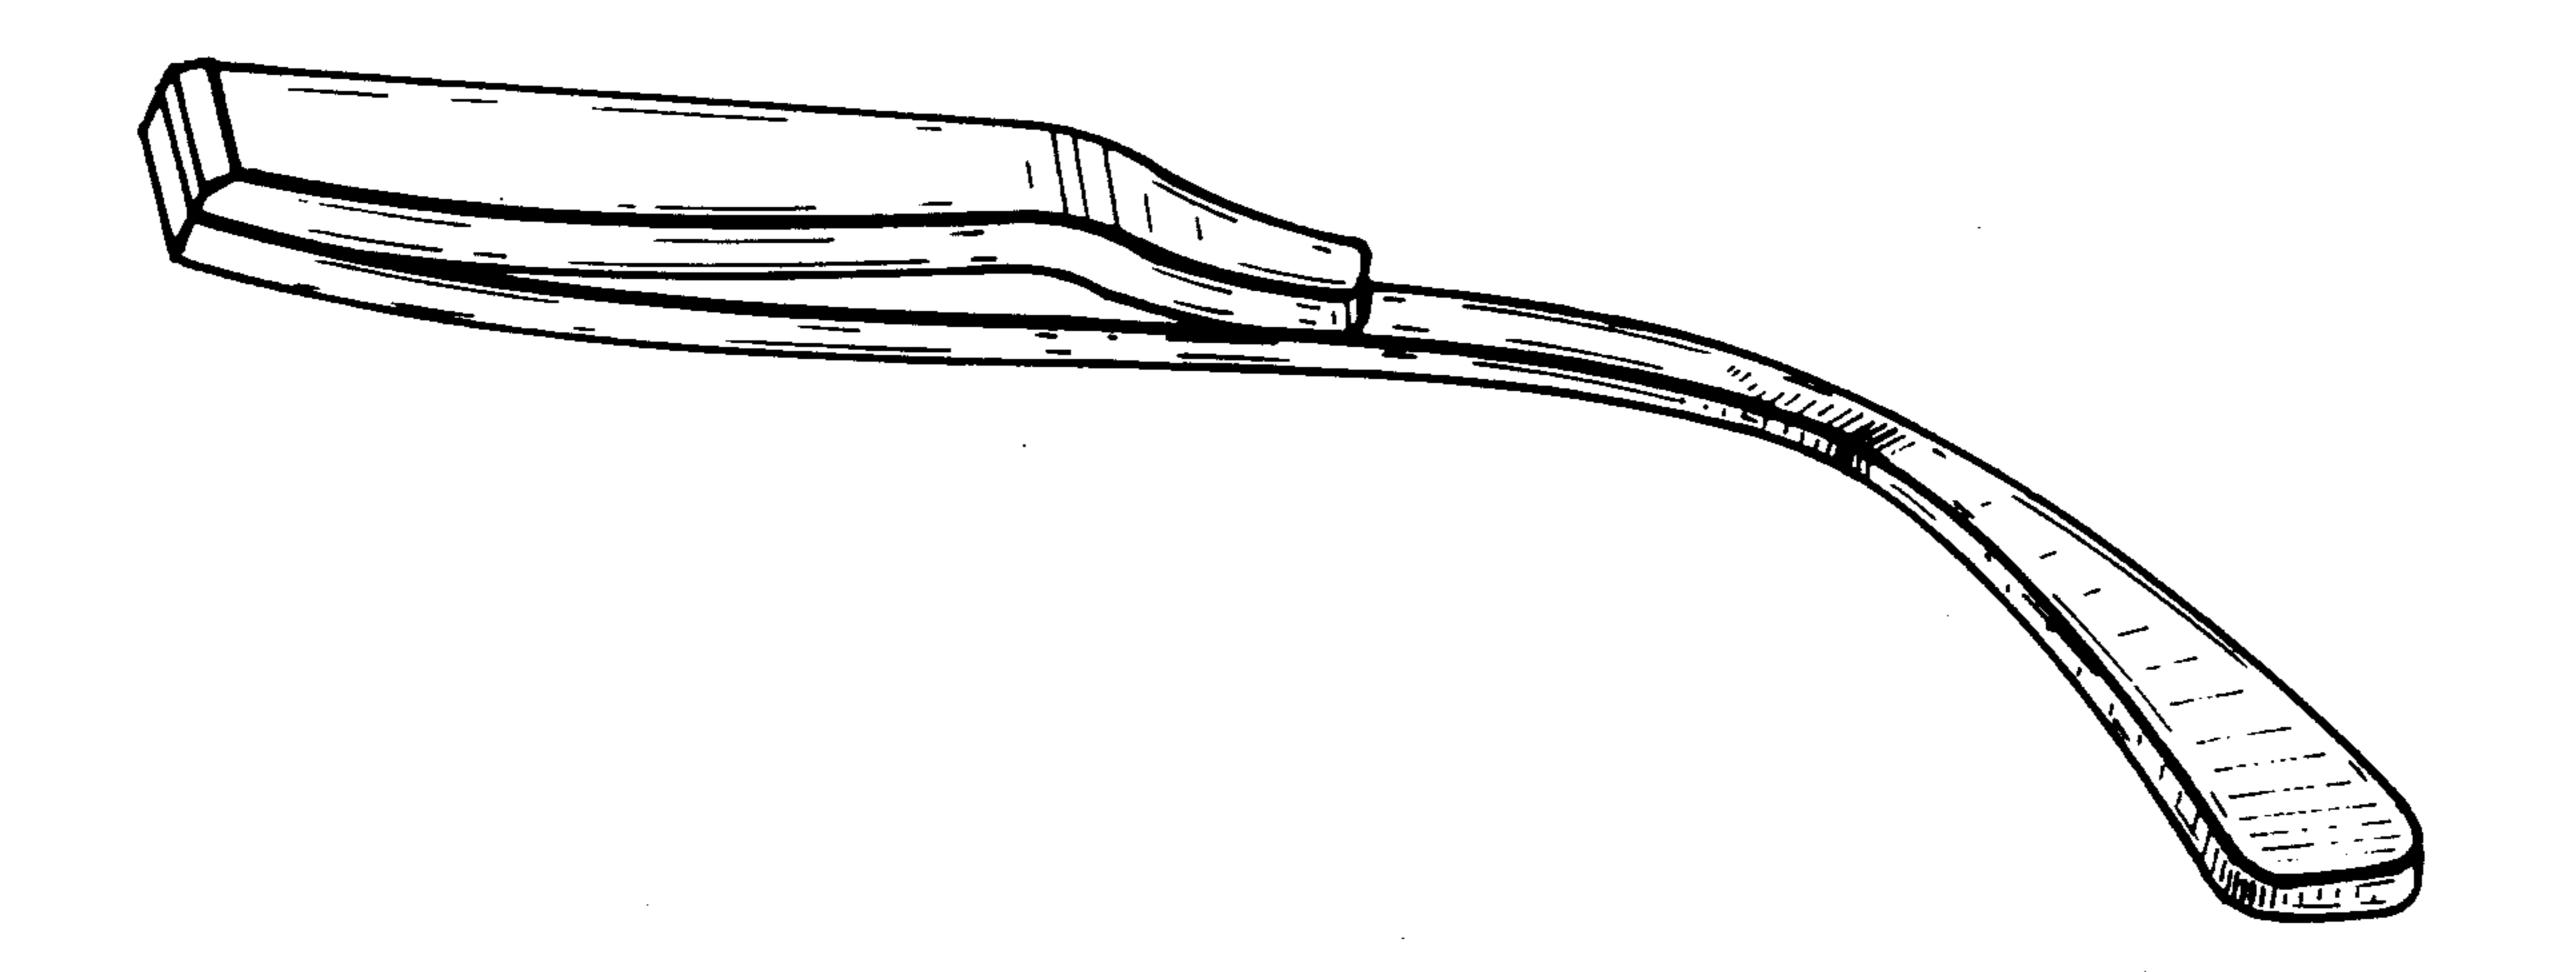

FIG. 1 is a perspective view, looking obliquely downward, of the left temple bar of the pair of temple bars, showing my new design;

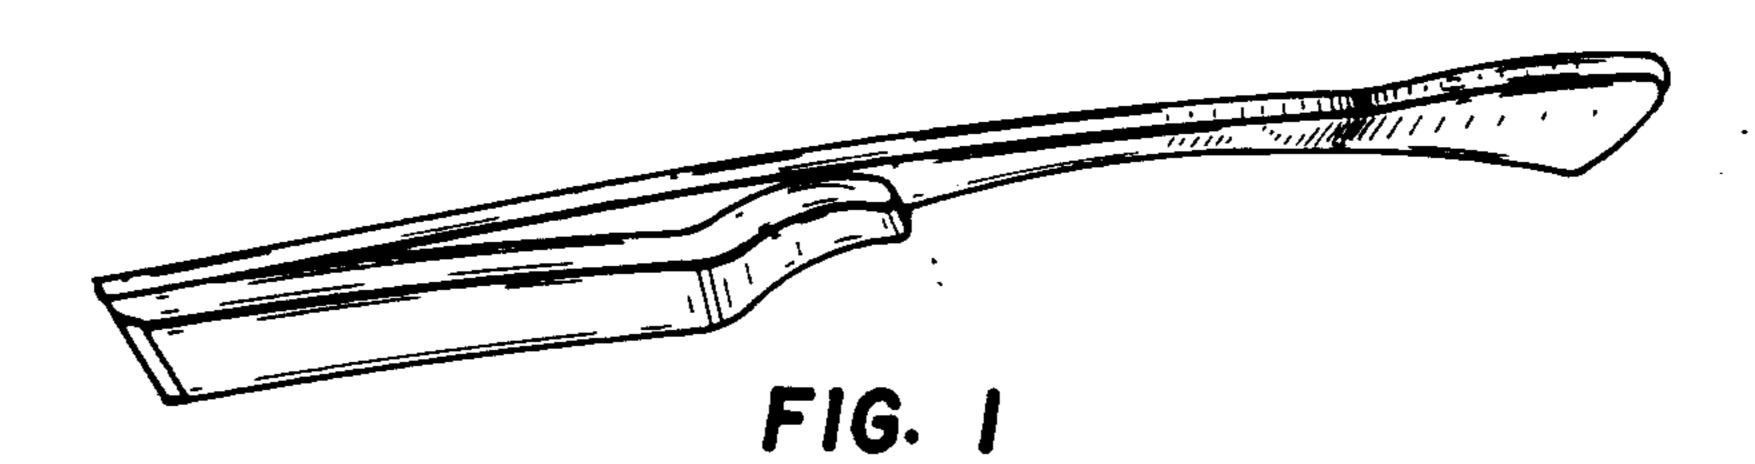

FIG. 2 is an oblique upward perspective view of the same left temple bar;

FIG. 3 is a side elevational view of the right temple bar; and

FIG. 4 is a top plan view of the right temple bar.

The right and left temple bars are reverse duplicates or mirror images of each other, so that FIGS. 1 and 2, which show specifically the left temple bar, apply equally to the right temple bar as a reverse duplicate of what is shown in FIGS. 1 and 2, while FIGS. 3 and 4, which show specifically the right temple bar, apply equally to the left temple bar which would be a reverse duplicate of what is shown in FIGS. 3 and 4.

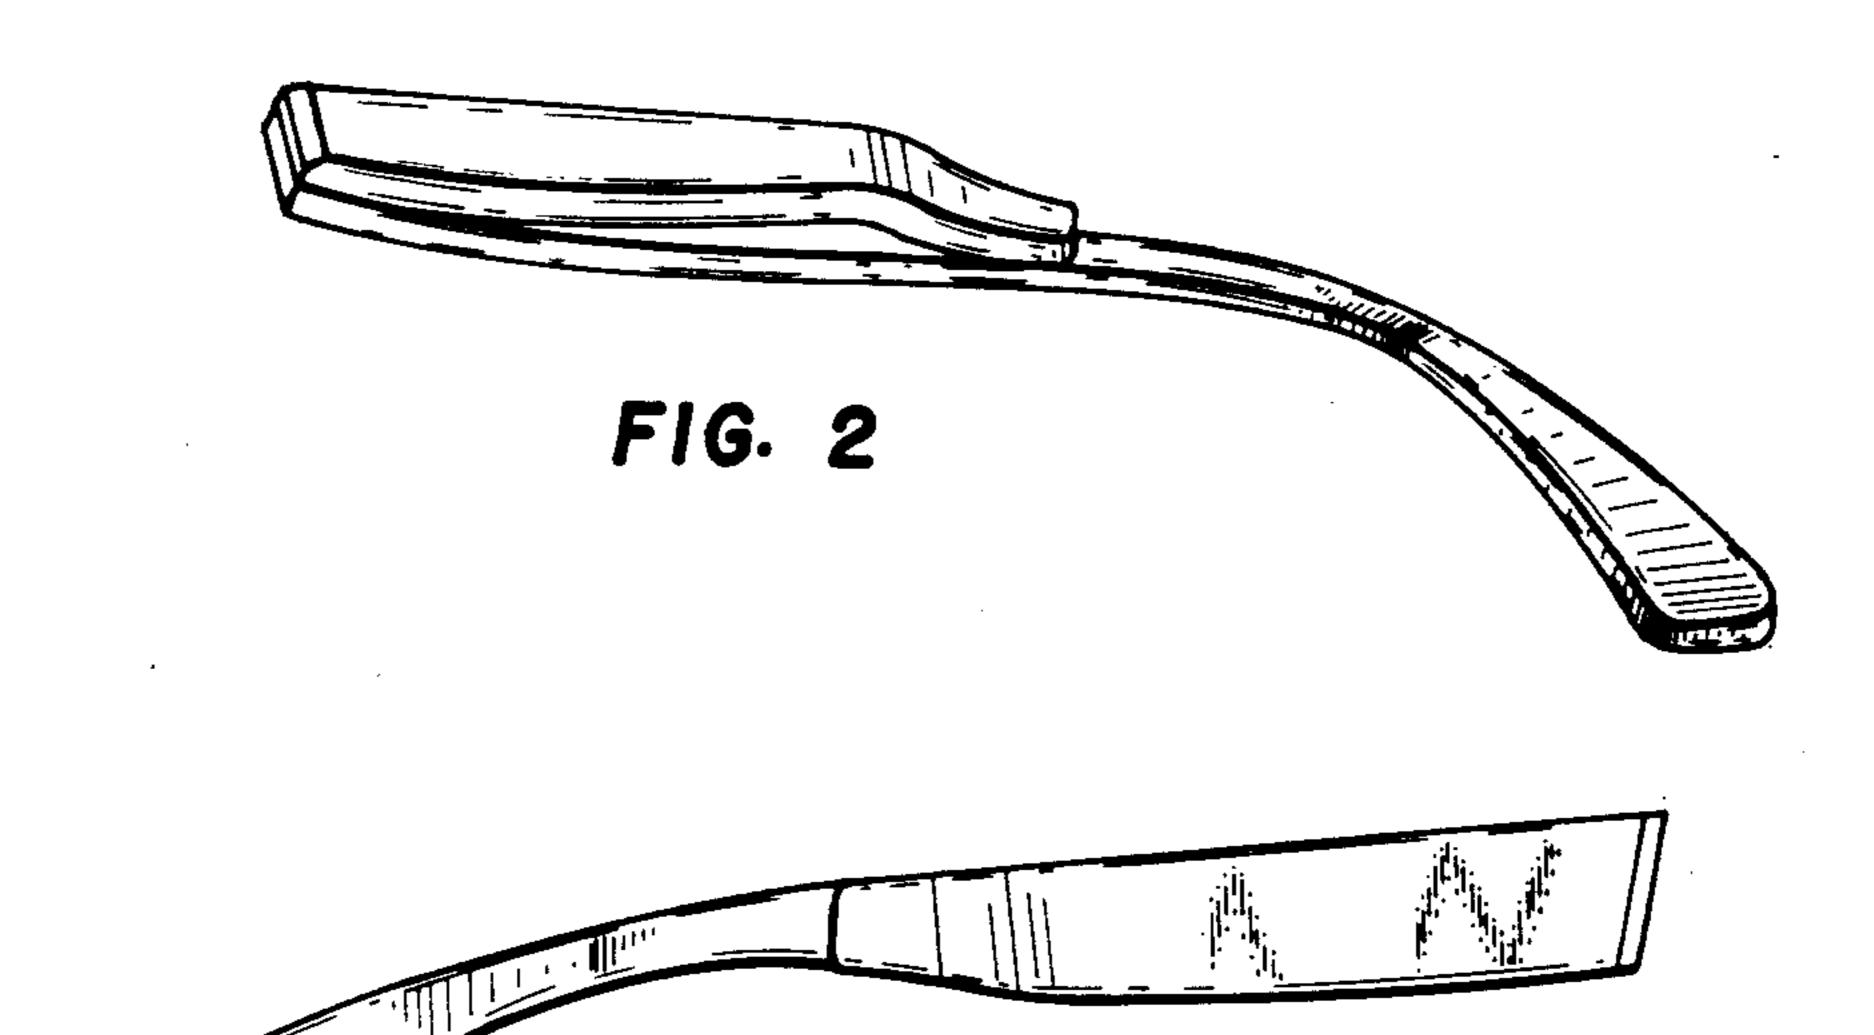

FIG. 3

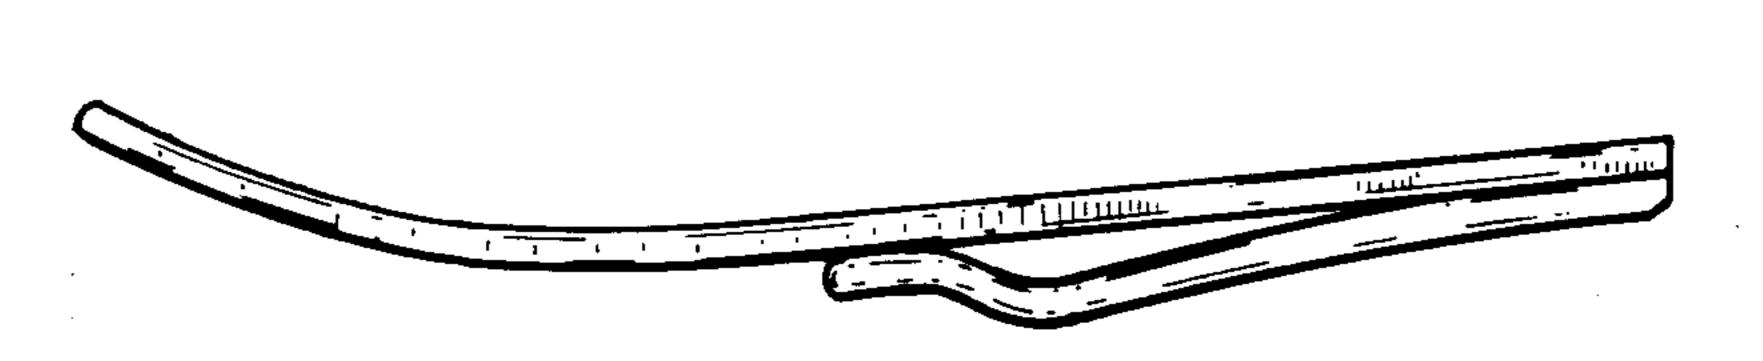

FIG. 4
