[57] CLAIM

The ornamental design for a combined record jacket and detachable erectable pyramid, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a combined record jacket and detachable erectable pyramid showing my new design, the opposite side being plain and unornamented. FIG. 2 is an enlarged scale fragmentary cross-sectional view taken along line 2-2 of FIG. 1;

FIG. 3 is a front elevational view similar to FIG. 1 but with the pyramid blank removed and a portion of the record jacket broken away and omitted for convenience of illustration; and

FIG. 4 is a top plan view of the pyramid in an erected condition.

The edges of the record jacket are of conventional thickness and the top edge of FIG. 1 is open.

The design is particularly characterized by the specific shape of the detachable, erectable pyramid blank on the record jacket as shown.
