[57] CLAIM

The ornamental design for a luggage case, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a luggage case showing my new design in an open condition, the opposite end being a mirror image of the end shown; FIG. 2 is a perspective view thereof in a closed condition; FIG. 3 is an end elevational view of FIG. 1; FIG. 4 is an end elevational view of FIG. 2; FIG. 5 is a side elevational view of FIG. 2; FIG. 6 is a top plan view thereof; and FIG. 7 is a bottom plan view thereof. The characteristic feature of the design resides in the internal V-shaped end members which form end closures when the luggage case is open and also limits the extent to which it may be opened.
