[57] CLAIM

The ornamental design for a programmable sequence controller, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a programmable sequence controller embodying my new design;  
FIG. 2 is a rear elevational view of the programmable sequence controller shown in FIG. 1;  
FIG. 3 is a front elevational view of the programmable sequence controller shown in FIG. 1;  
FIG. 4 is a top plan view of the programmable sequence controller shown in FIG. 1;  
FIG. 5 is a right side elevational view of the programmable sequence controller shown in FIG. 1, the left side elevational view being a mirror image thereof; and  
FIG. 6 is a bottom plan view of the programmable sequence controller shown in FIG. 1.
