[57] CLAIM

The ornamental design for a dual display station for a data processing system, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view showing the front, top and right side of a dual display station for a data processing system incorporating my new design;
FIG. 2 is a perspective view showing the front and left side of the same display station;
FIG. 3 is a perspective view showing the rear and top of said display station; and
FIG. 4 is an elevation of the left side of said display station.

FIGS. 1 and 2 show the externally visible surfaces and their intersections within the volume behind the radiused rectangular cutout in the front panel. The surfaces behind the corresponding cutout in the rear panel are enantiomorphic with respect to those behind the front panel cutout.

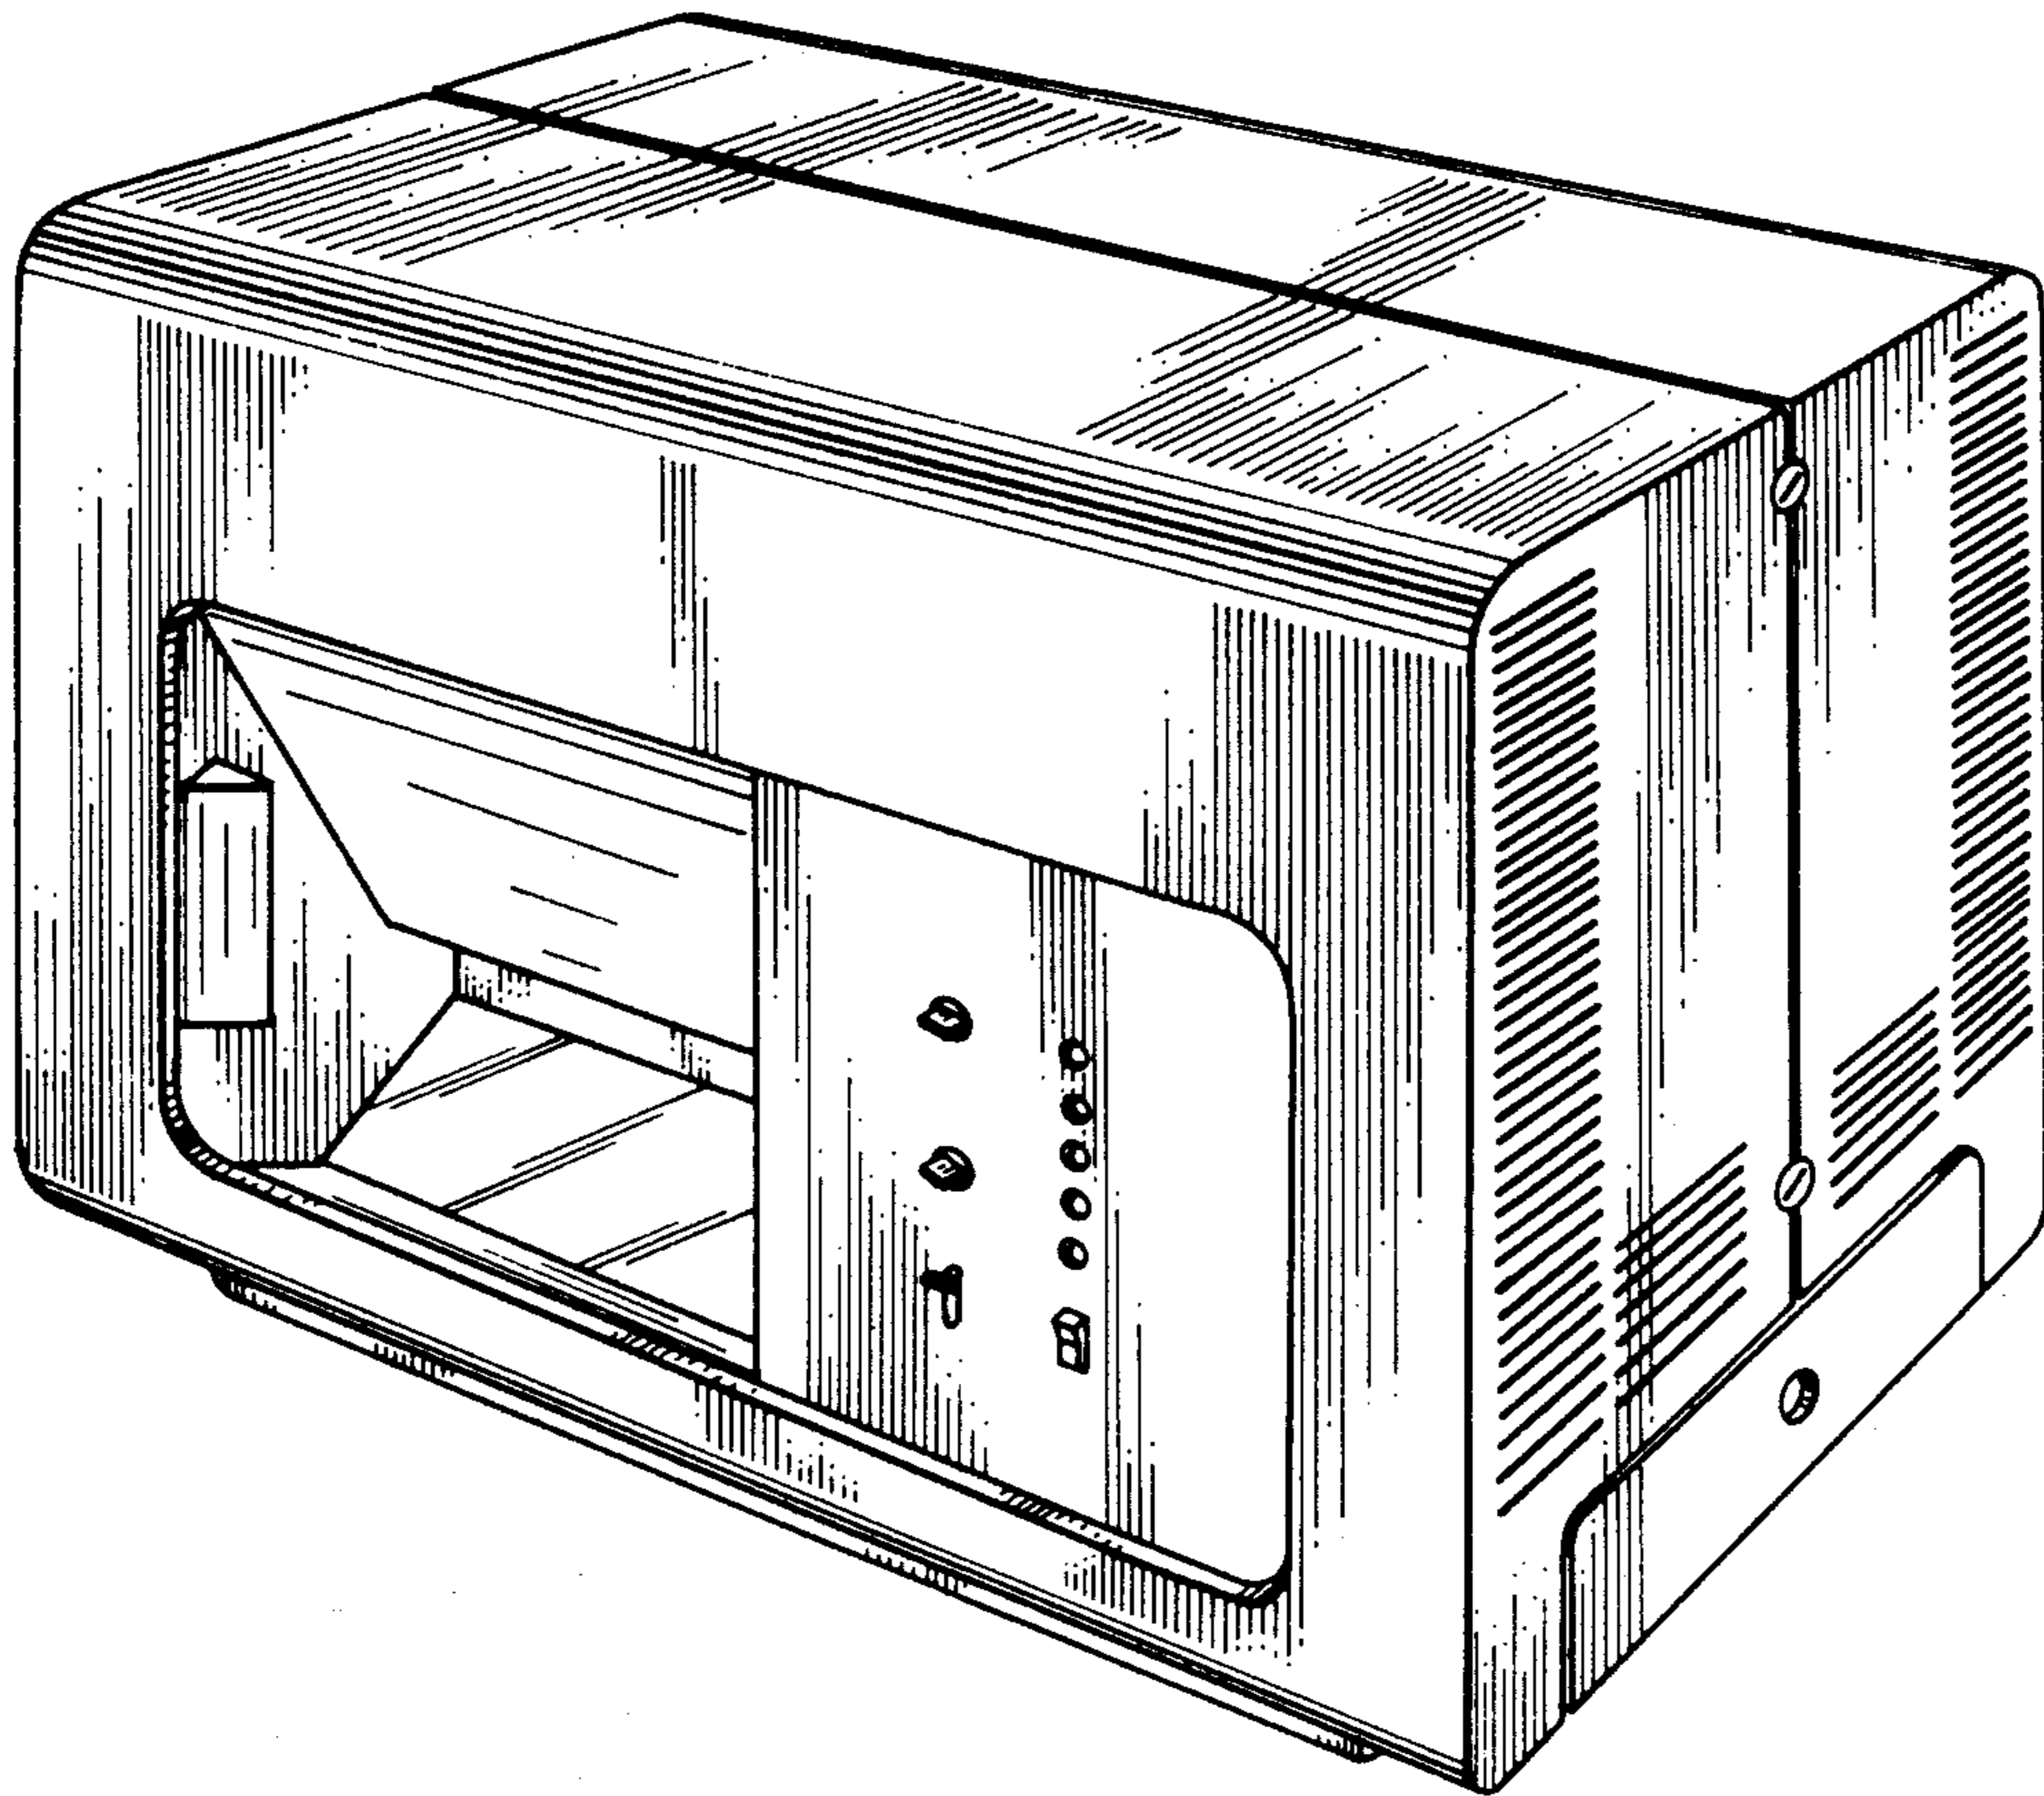

FIG. 1

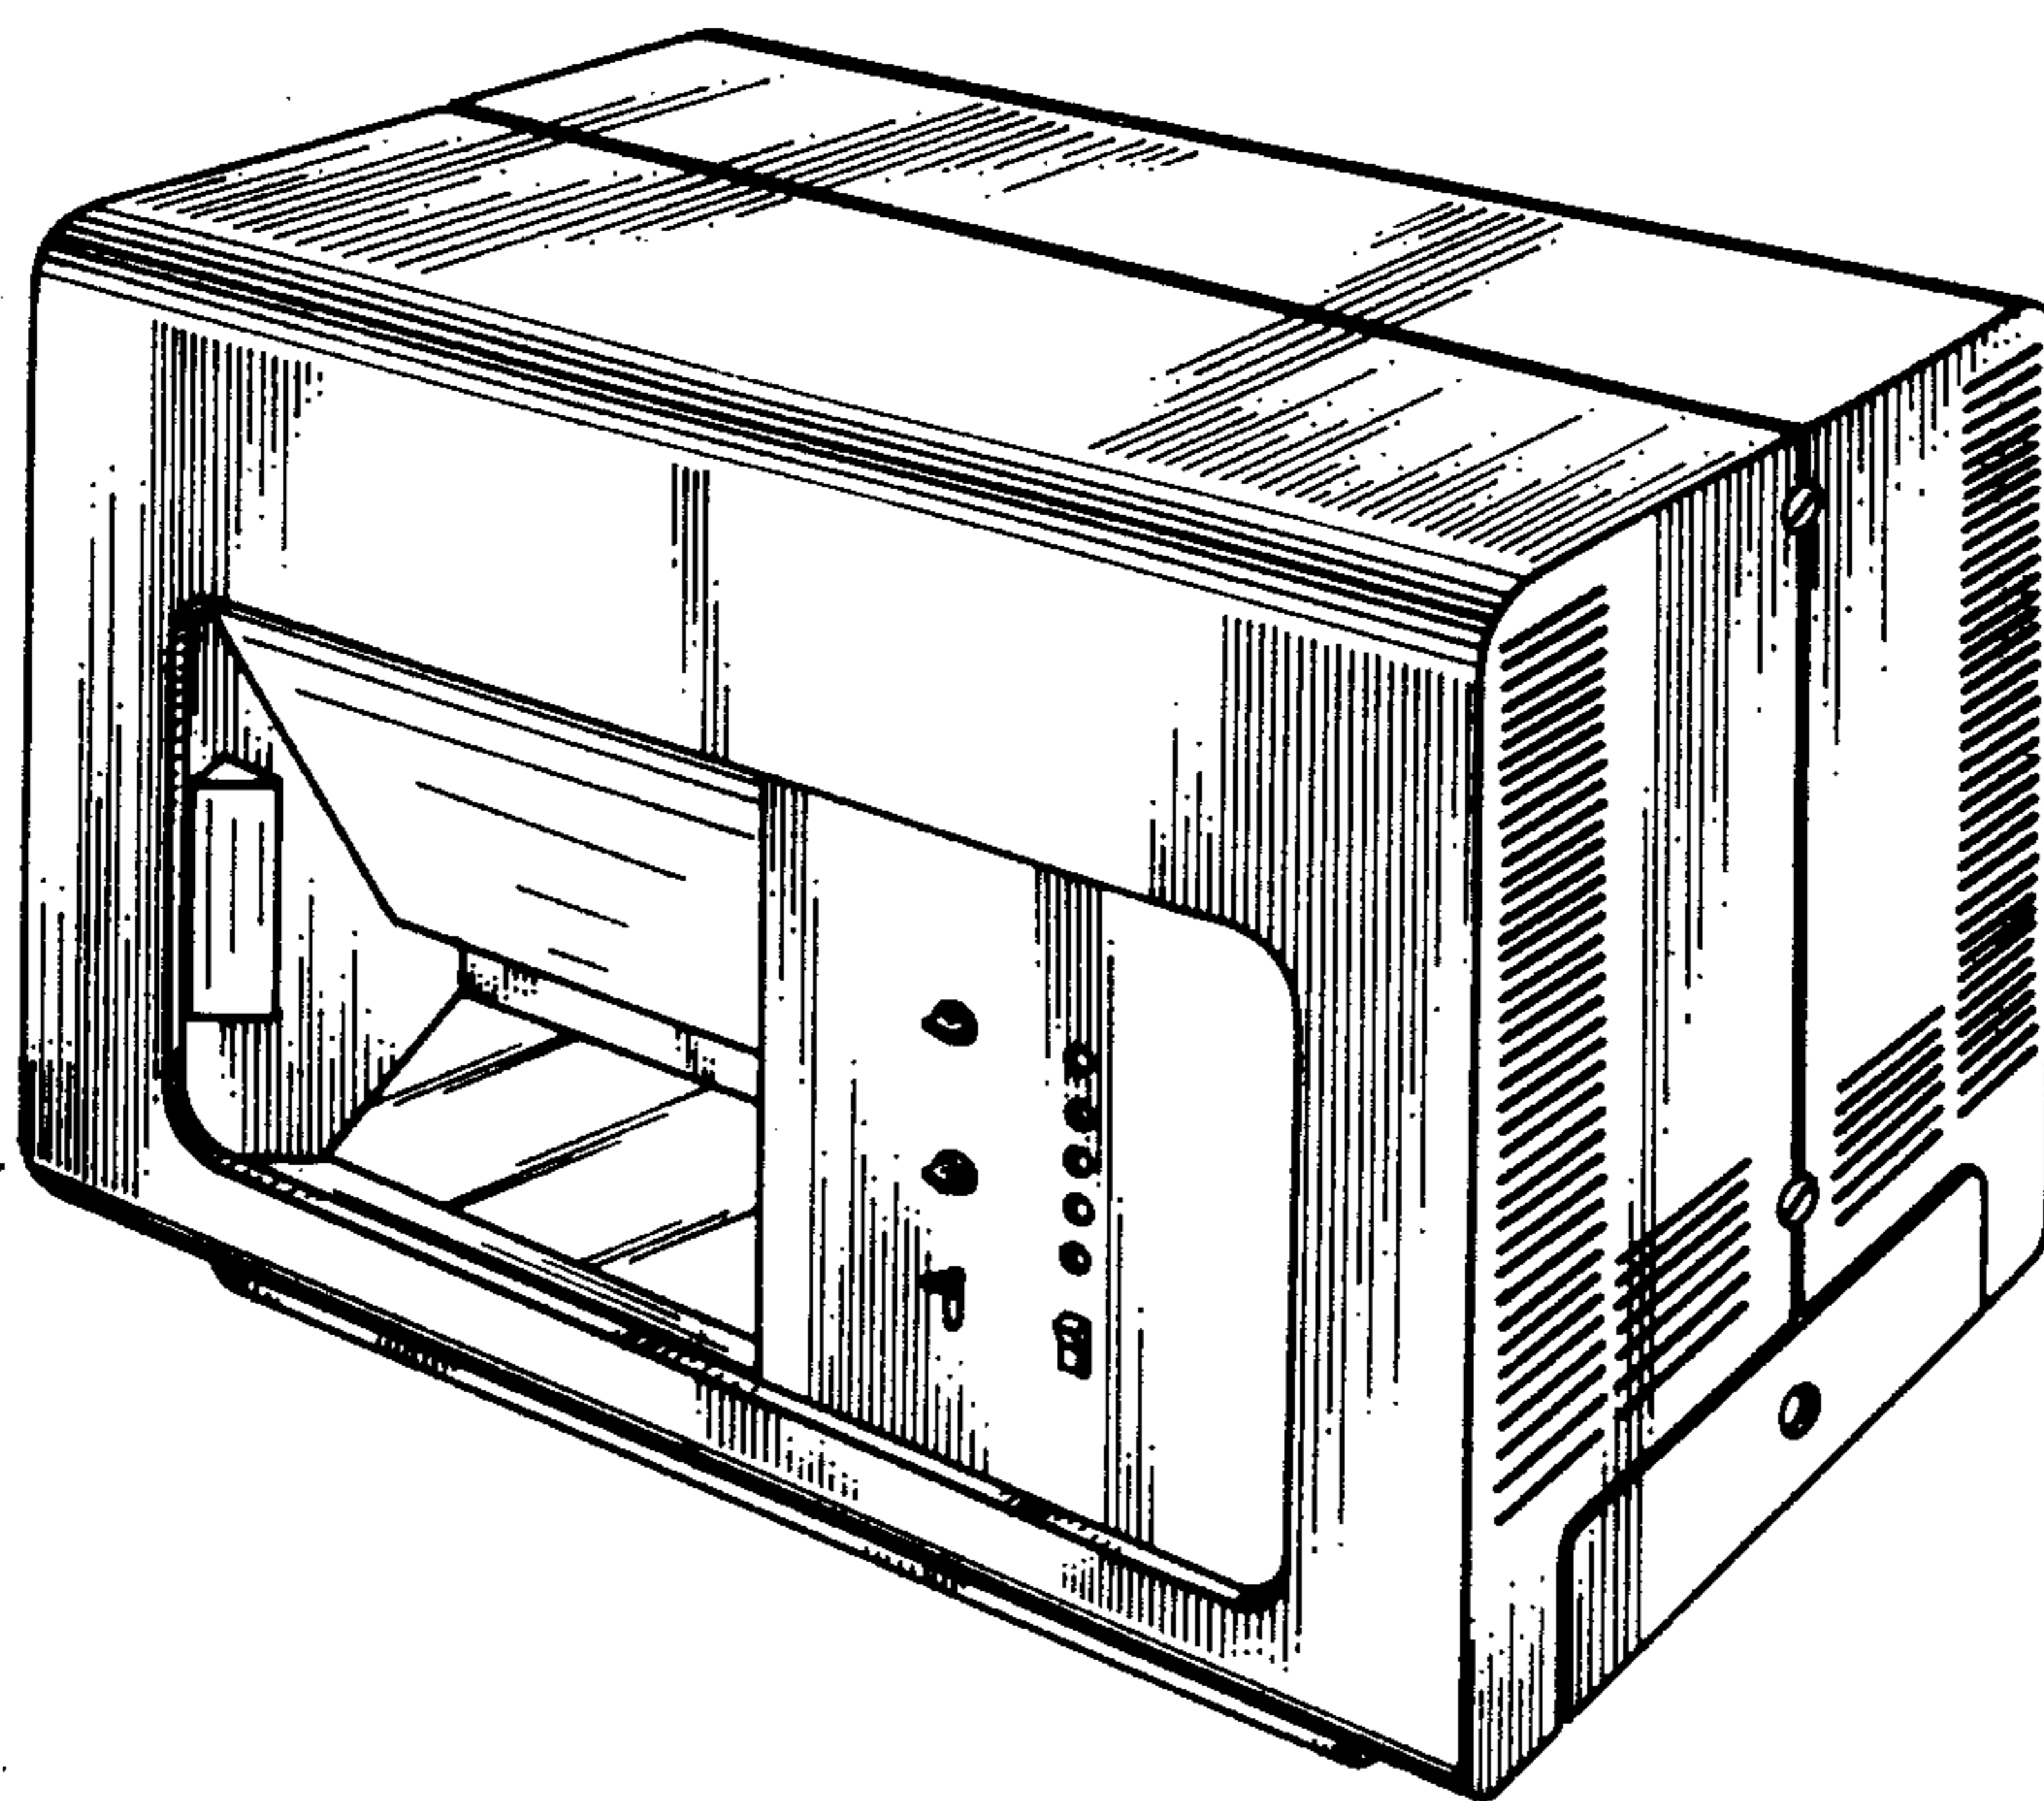

FIG. 2

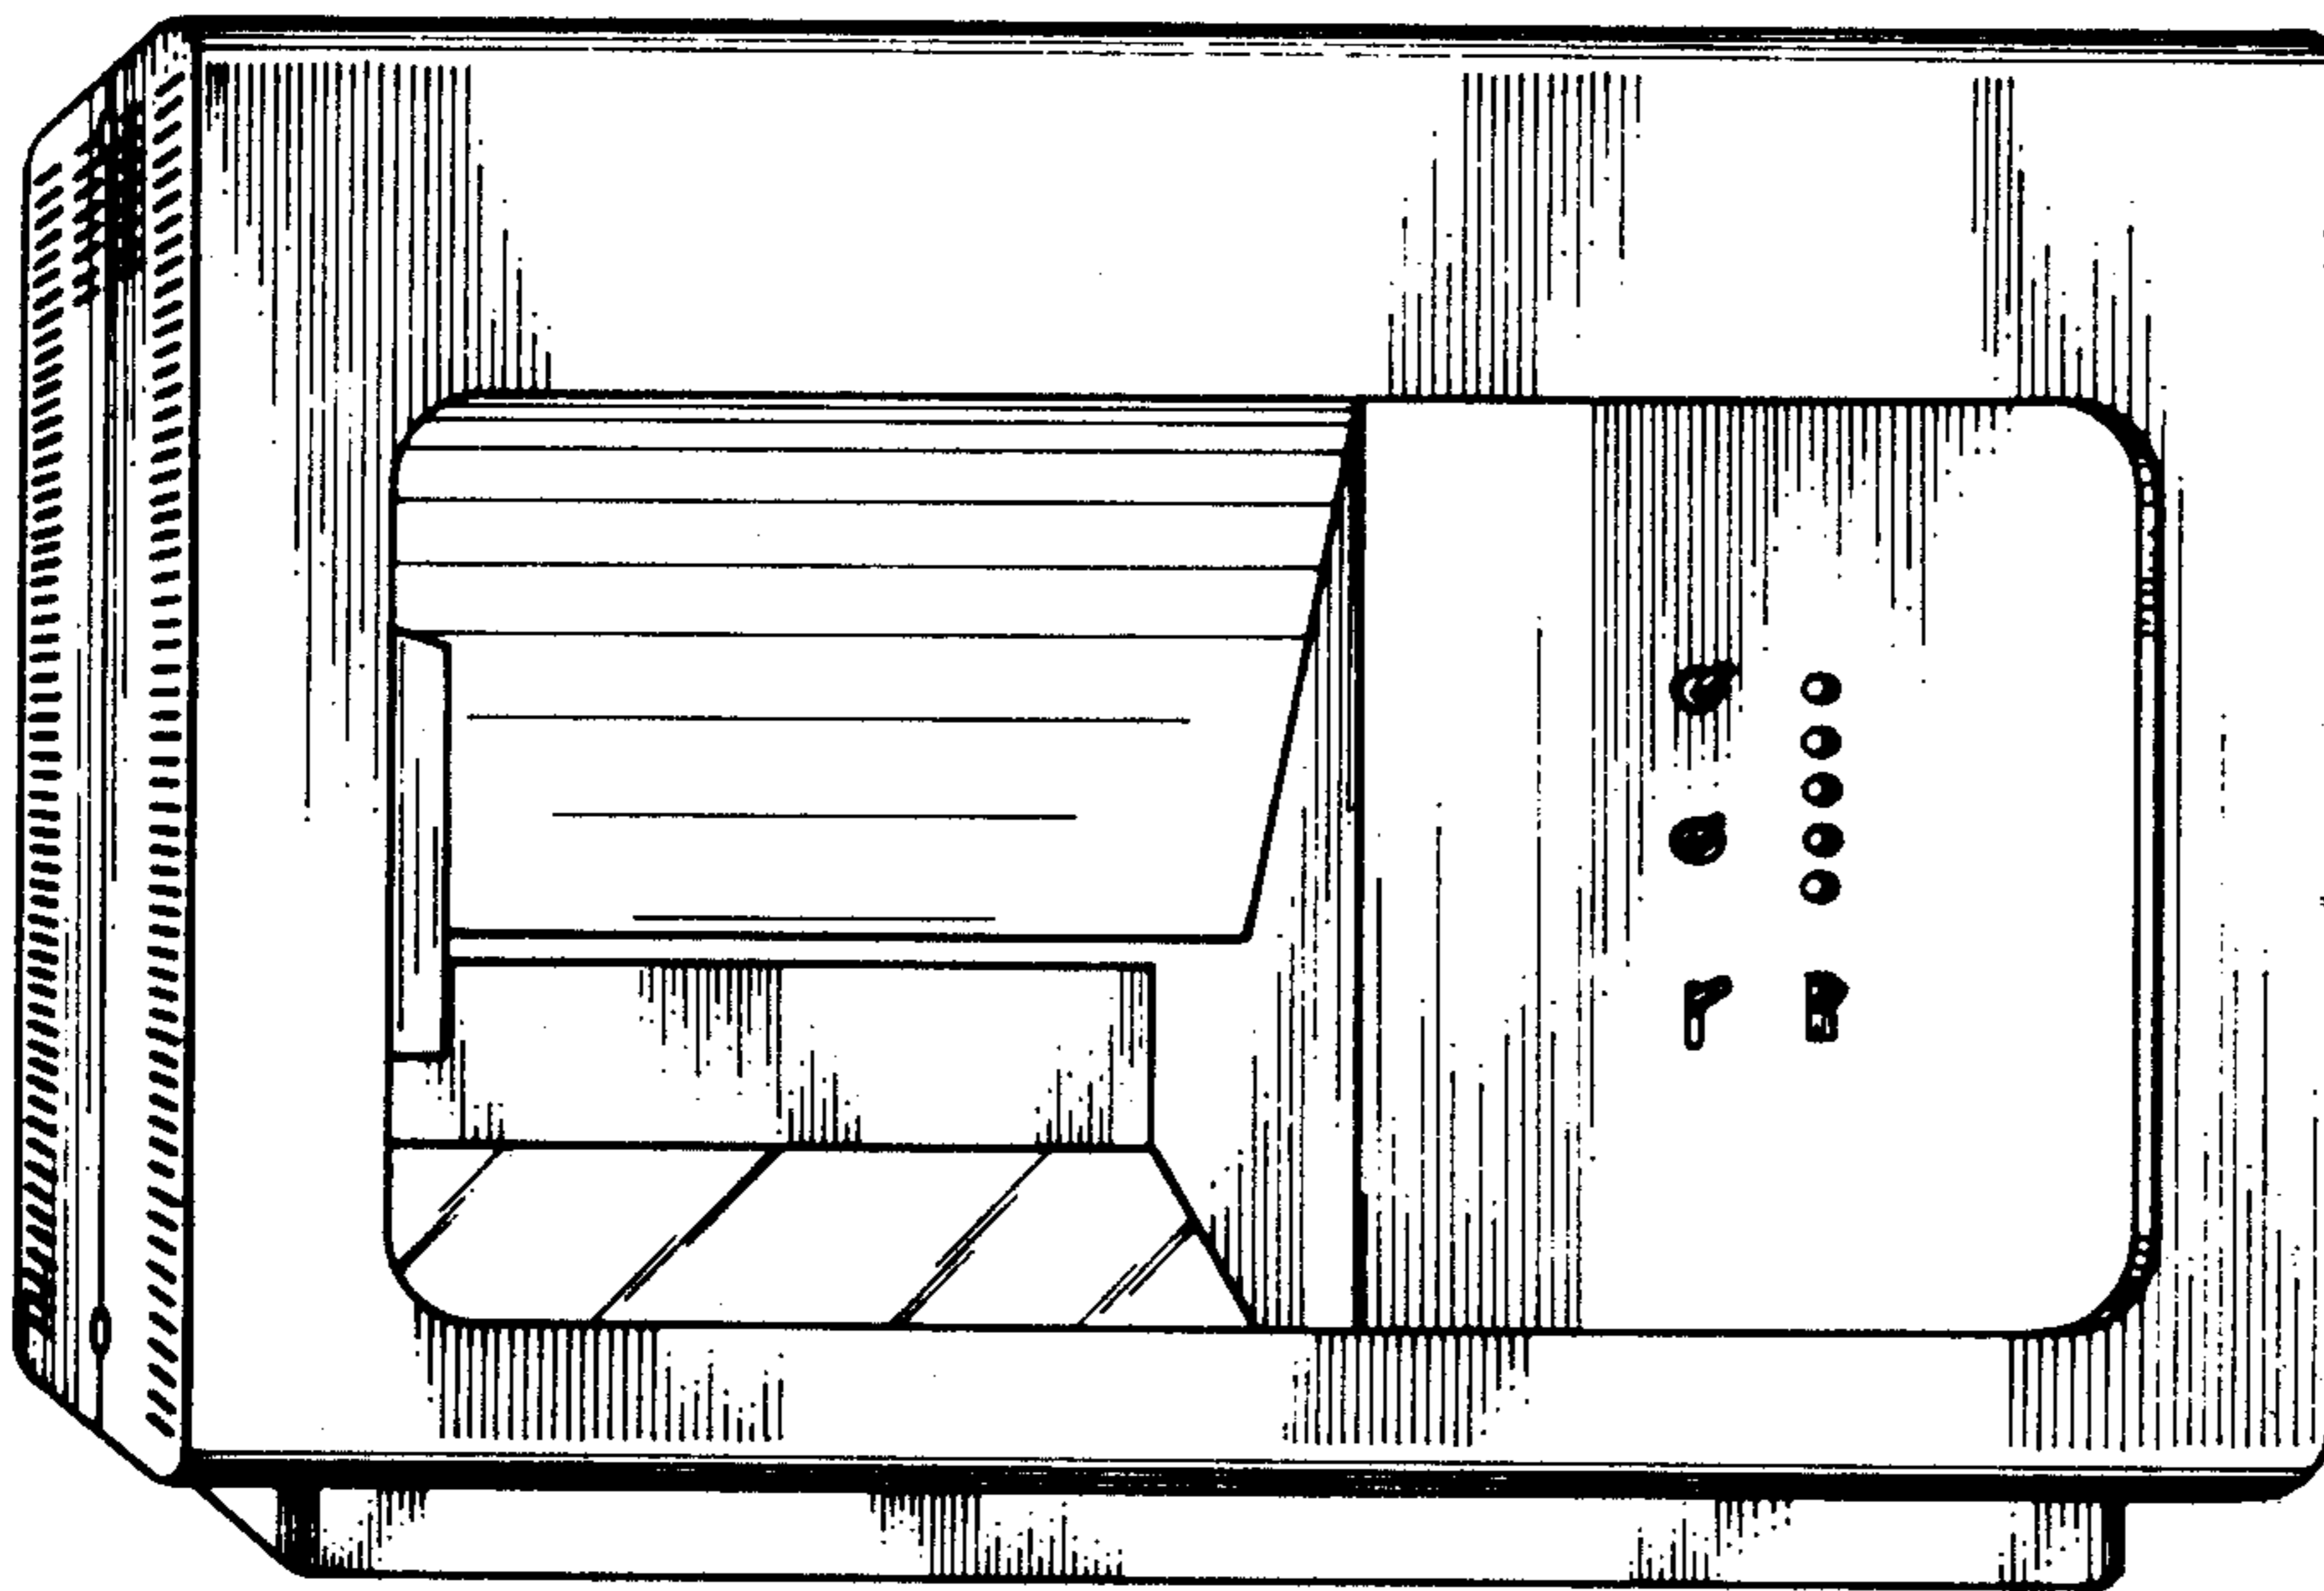

FIG. 3

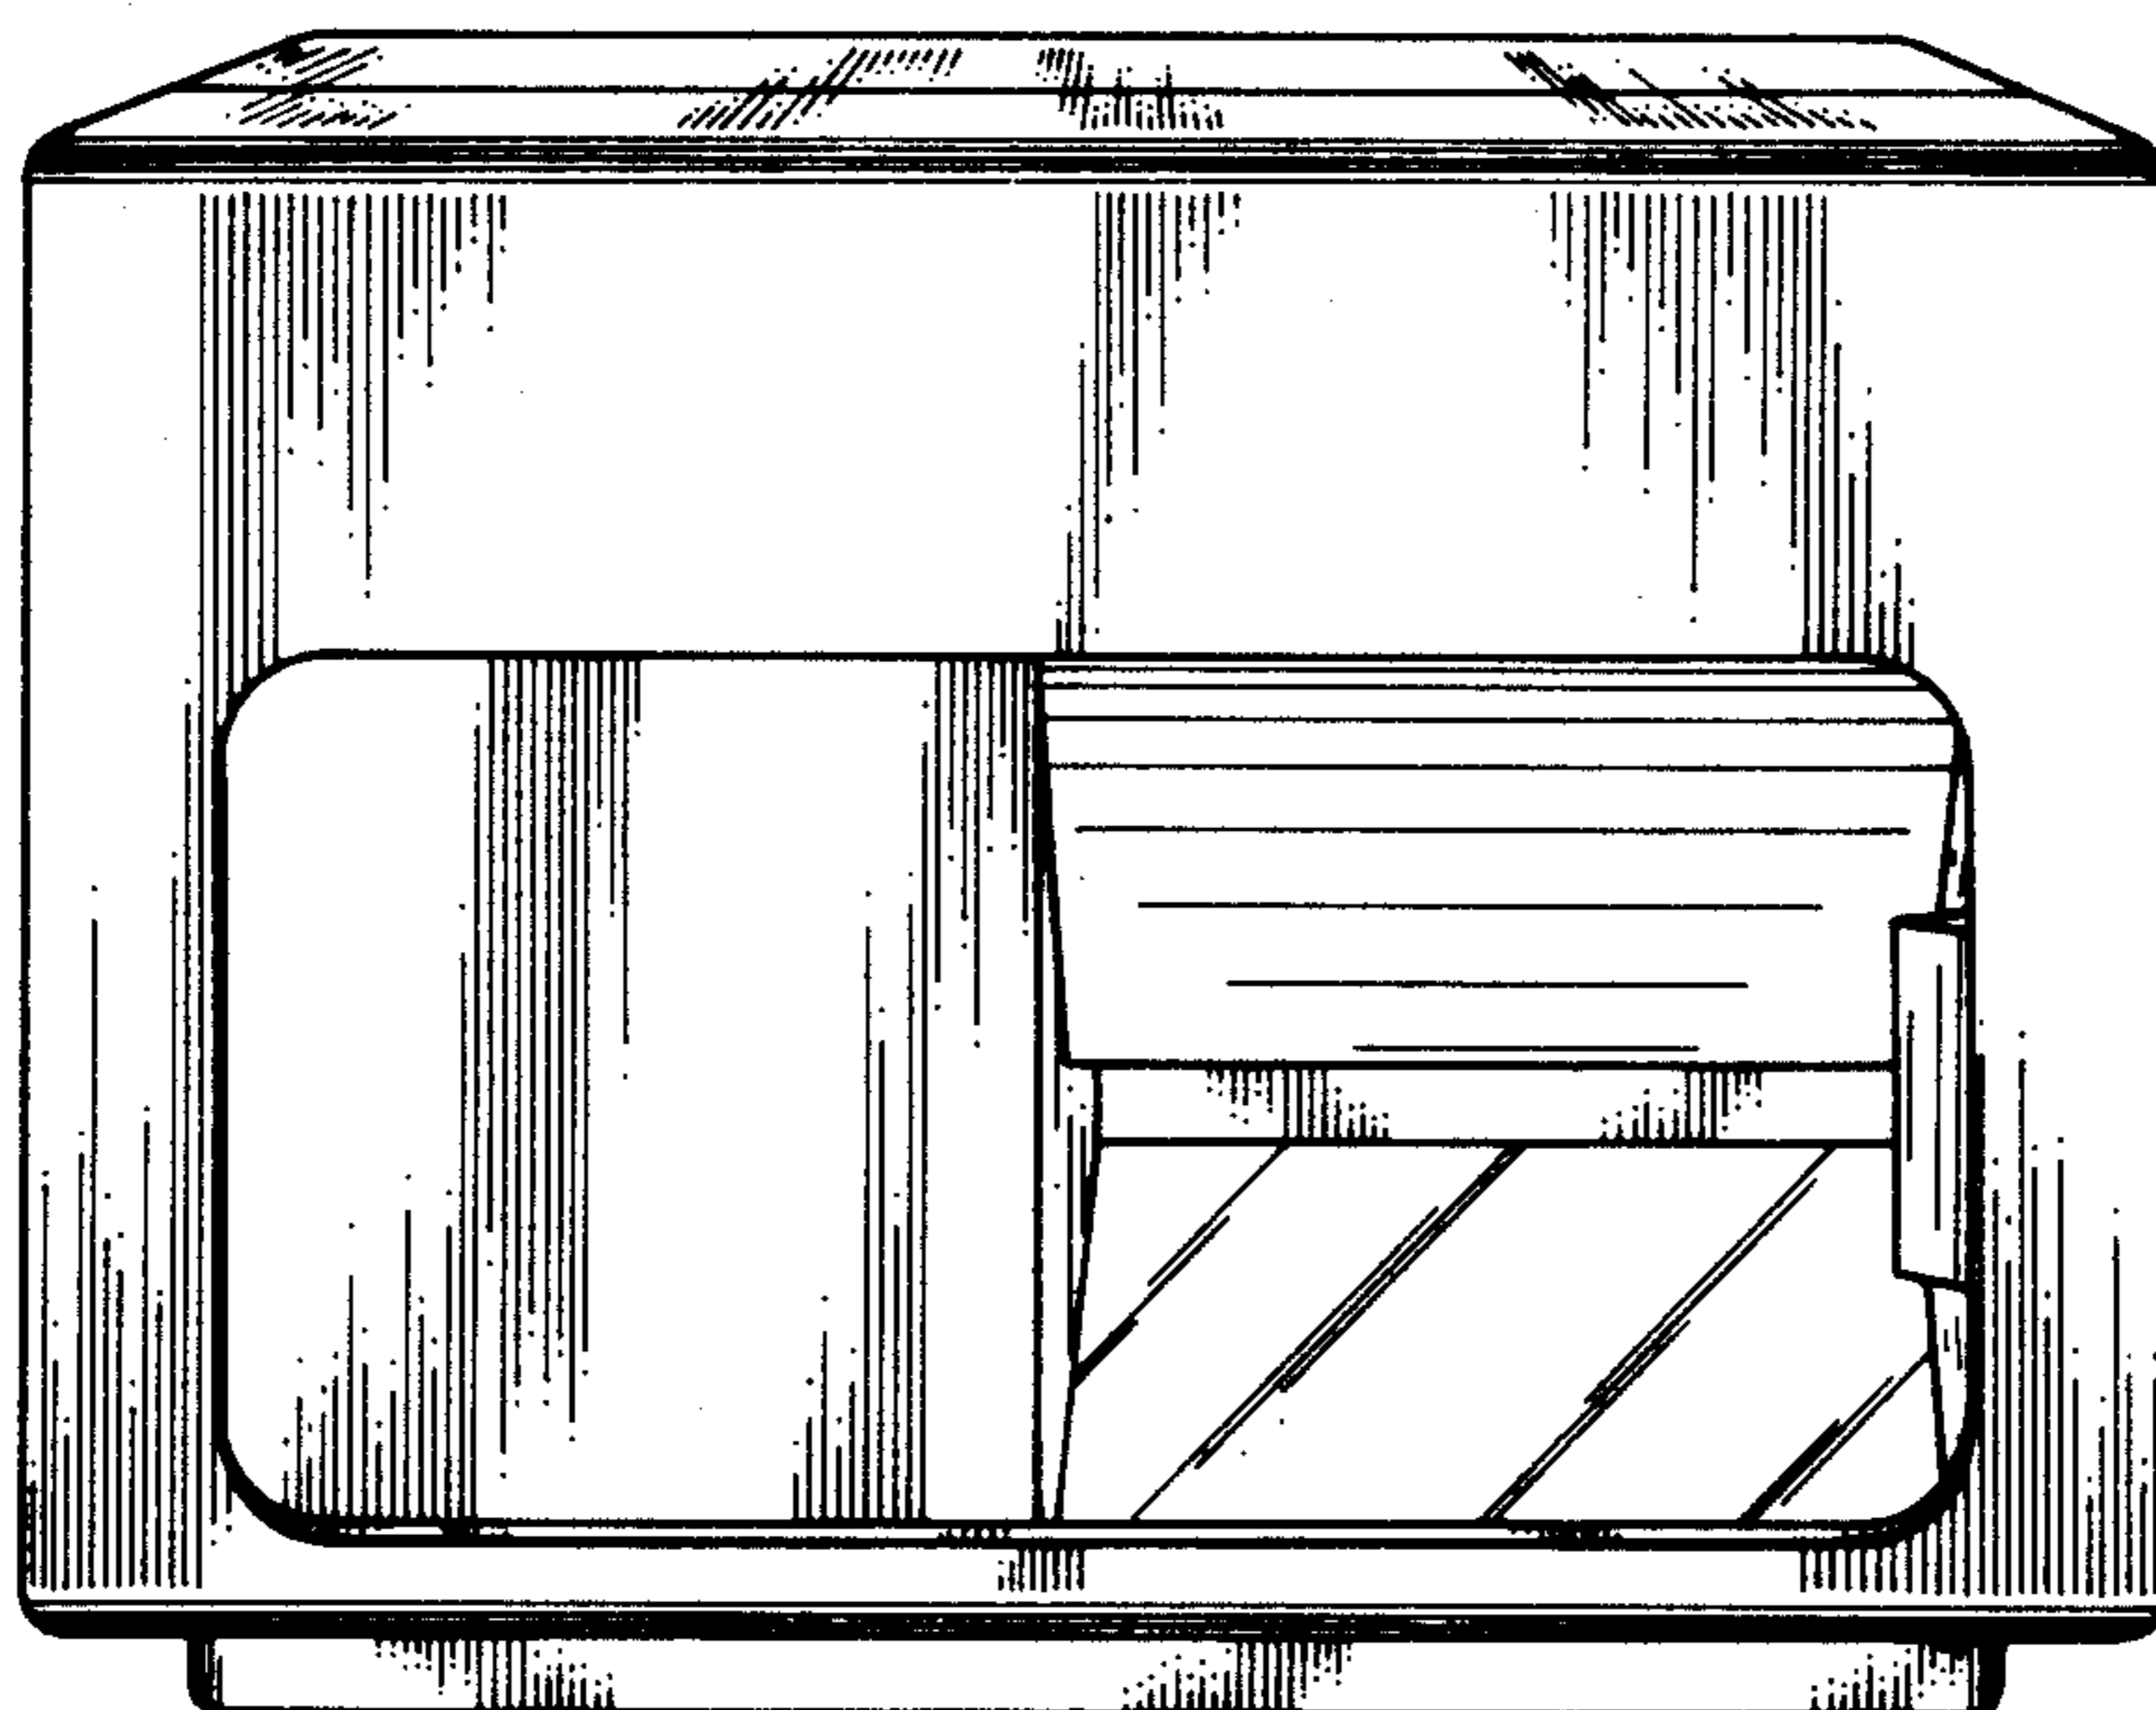

FIG. 4
