[57] CLAIM

The ornamental design for a bottle, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a bottle showing my new design;

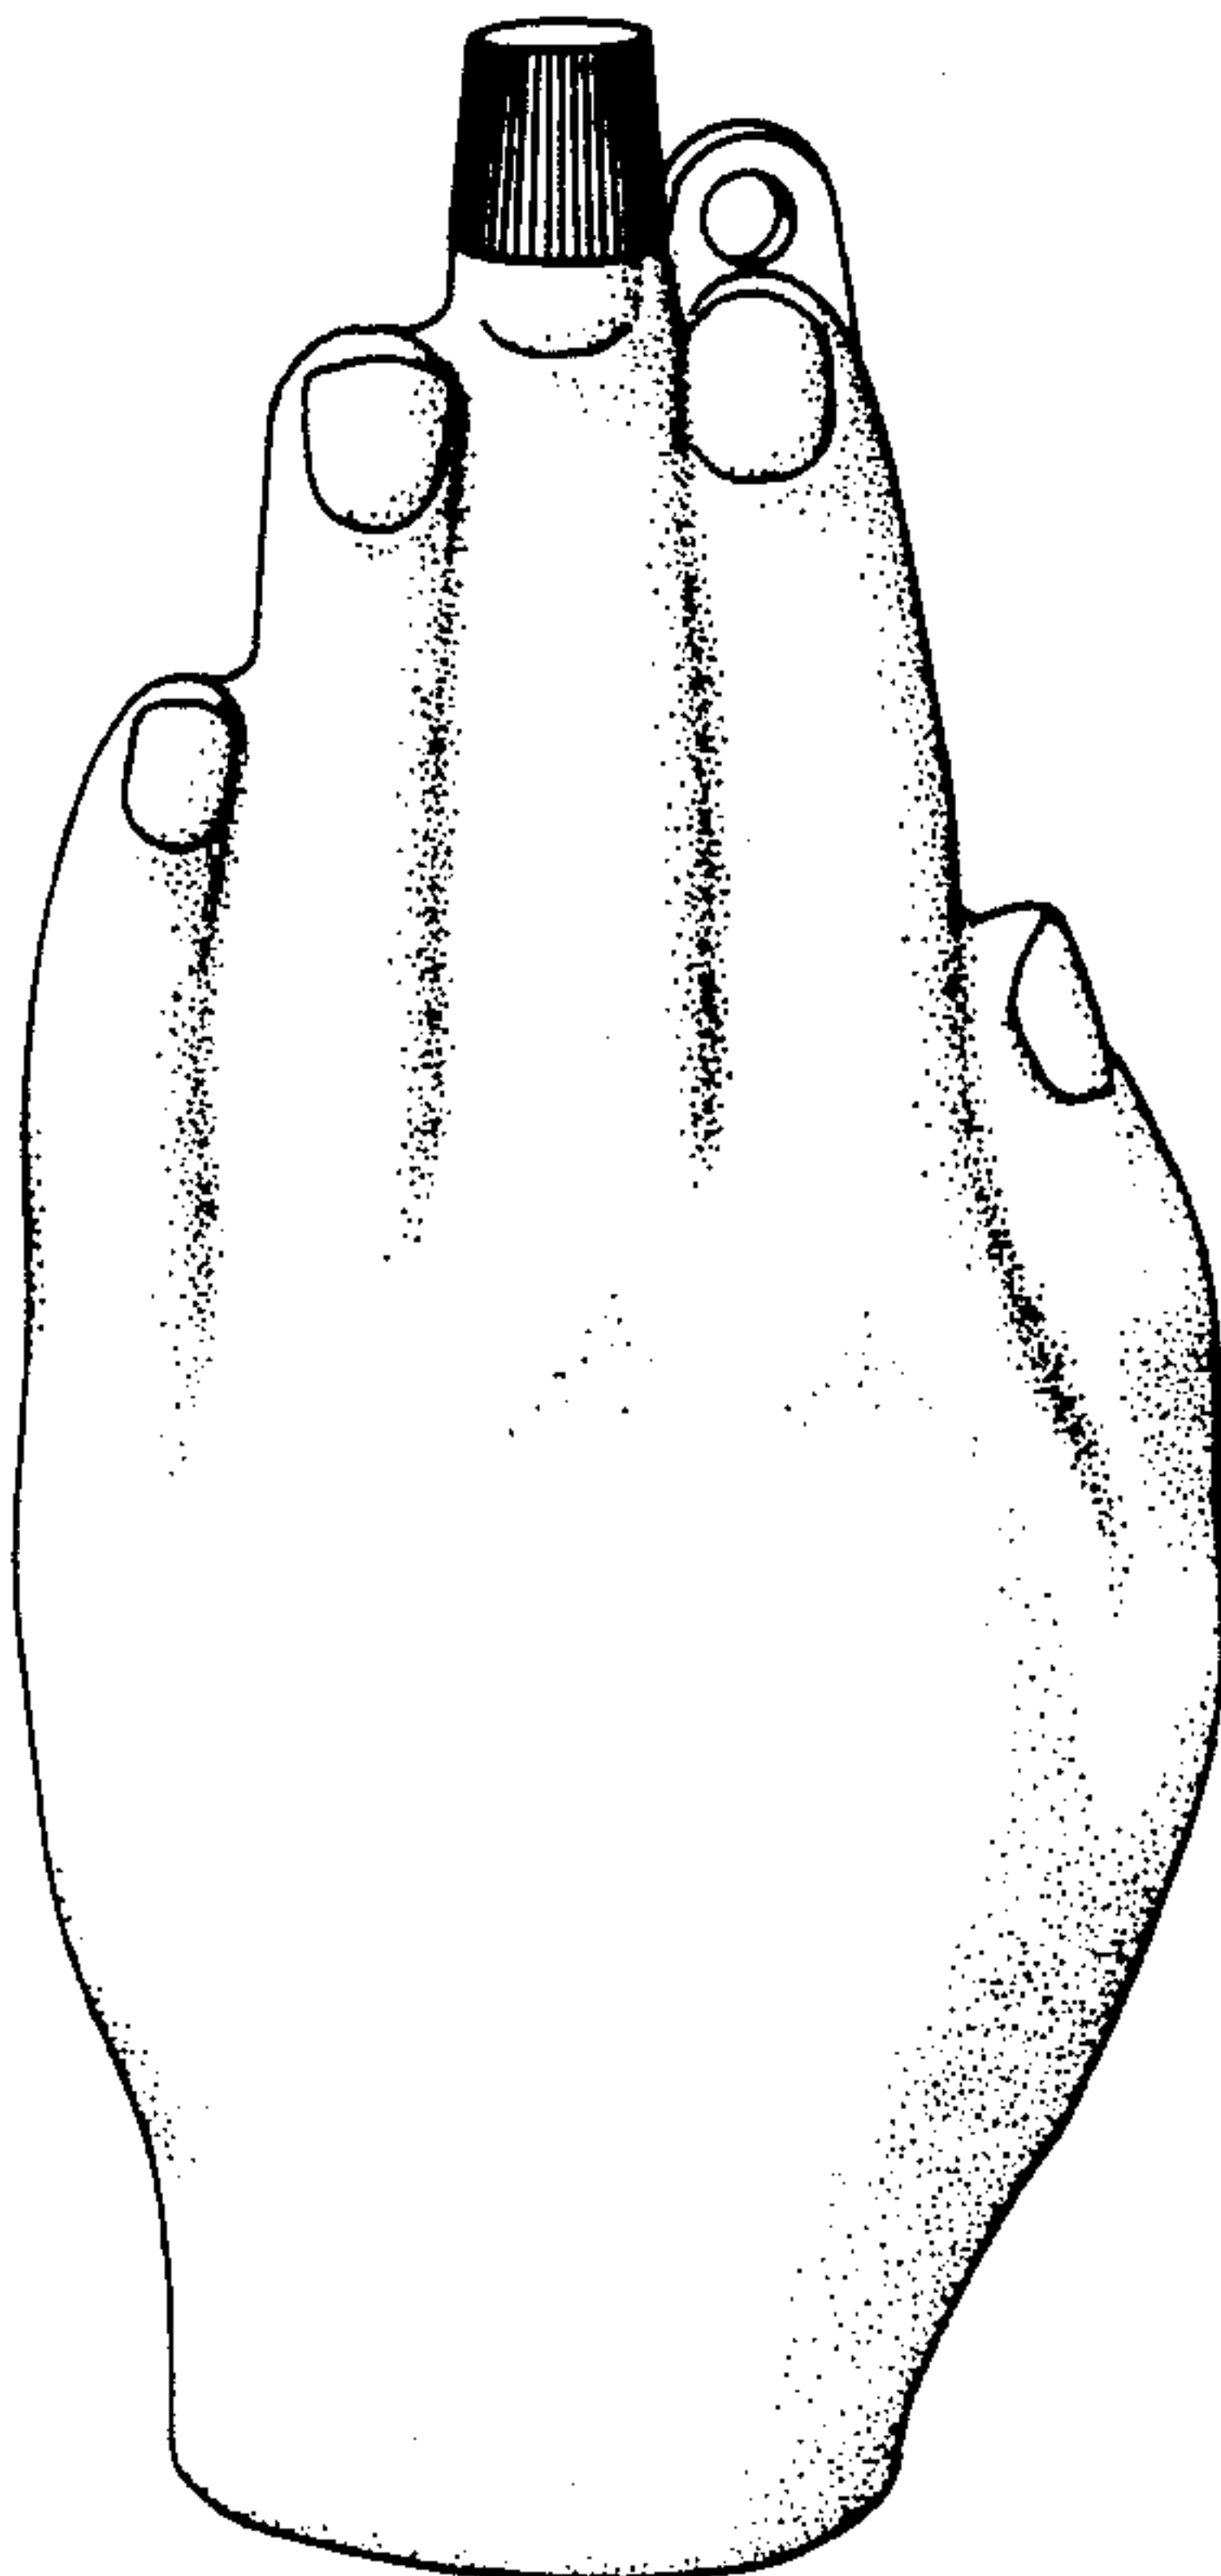

FIG. 2 is a back elevational view.

FIG. 3 is a side elevational view looking in the direction of the arrows 3—3 of FIG. 1;

FIG. 4 is a side elevational view looking in the direction of the arrows 4—4 of FIG. 1.

FIG. 5 is a top plan view looking in the direction of the arrows 5—5 of FIG. 1.

The characteristic feature of my design resides in the configuration of a container in the form of a hand with the dispensing opening located at the uppermost extremity of the middle finger with the opening cap in effect replacing the upper portion of the middle finger in combination with a hanging tab closely adjacent the cap and emanating from the extremity of the finger nearest the thumb, with the fingernail on the finger carrying the tab still visible and discernible, all as shown in the drawings.
