[57] CLAIM

The ornamental design for a hemodialysis reservoir or the like, as shown and described.

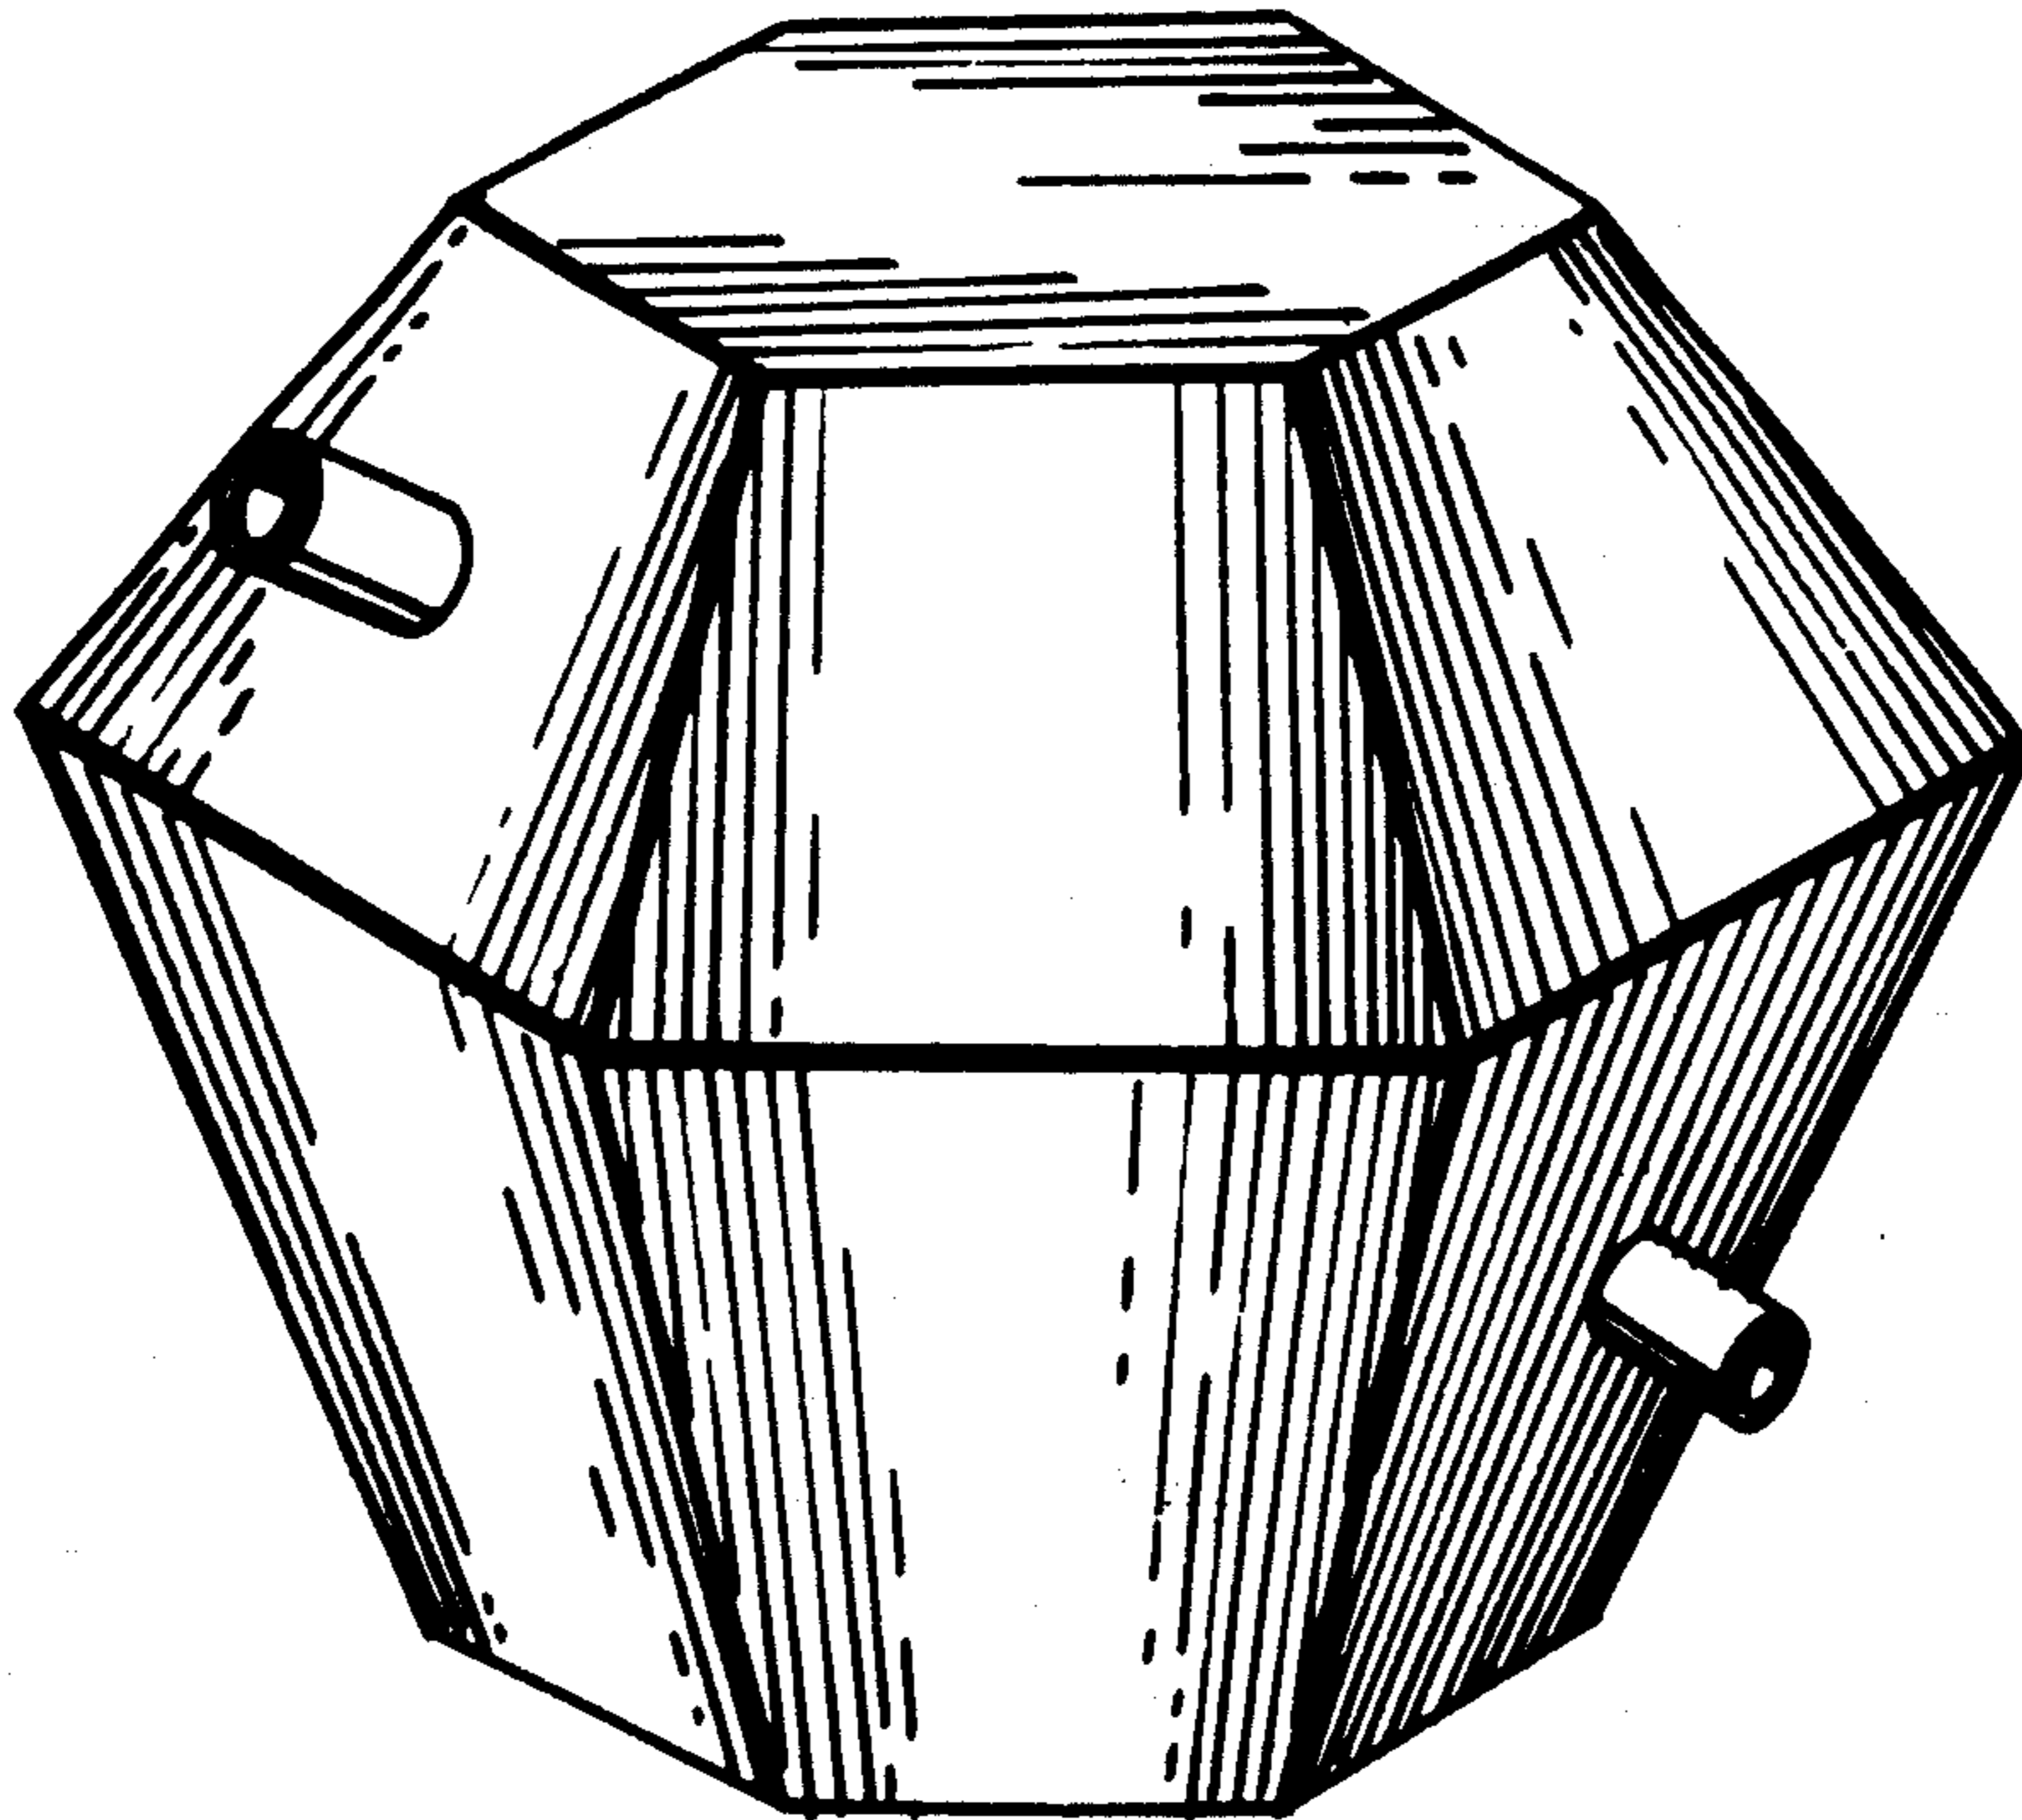

DESCRIPTION

FIG. 1 is an isometric view of the hemodialysis reservoir or the like;

FIG. 2 is a front or face view of said hemodialysis reservoir or the like, which absent the connections would be identical for either face of the reservoir; and

FIG. 3 is a top plan view of said hemodialysis reservoir or the like, which but for the connections would be identical to a bottom view thereof.

The characteristic feature of our design resides in the inlet and outlet connection in combination with the fourteen-faced polyhedron reservoir housing.

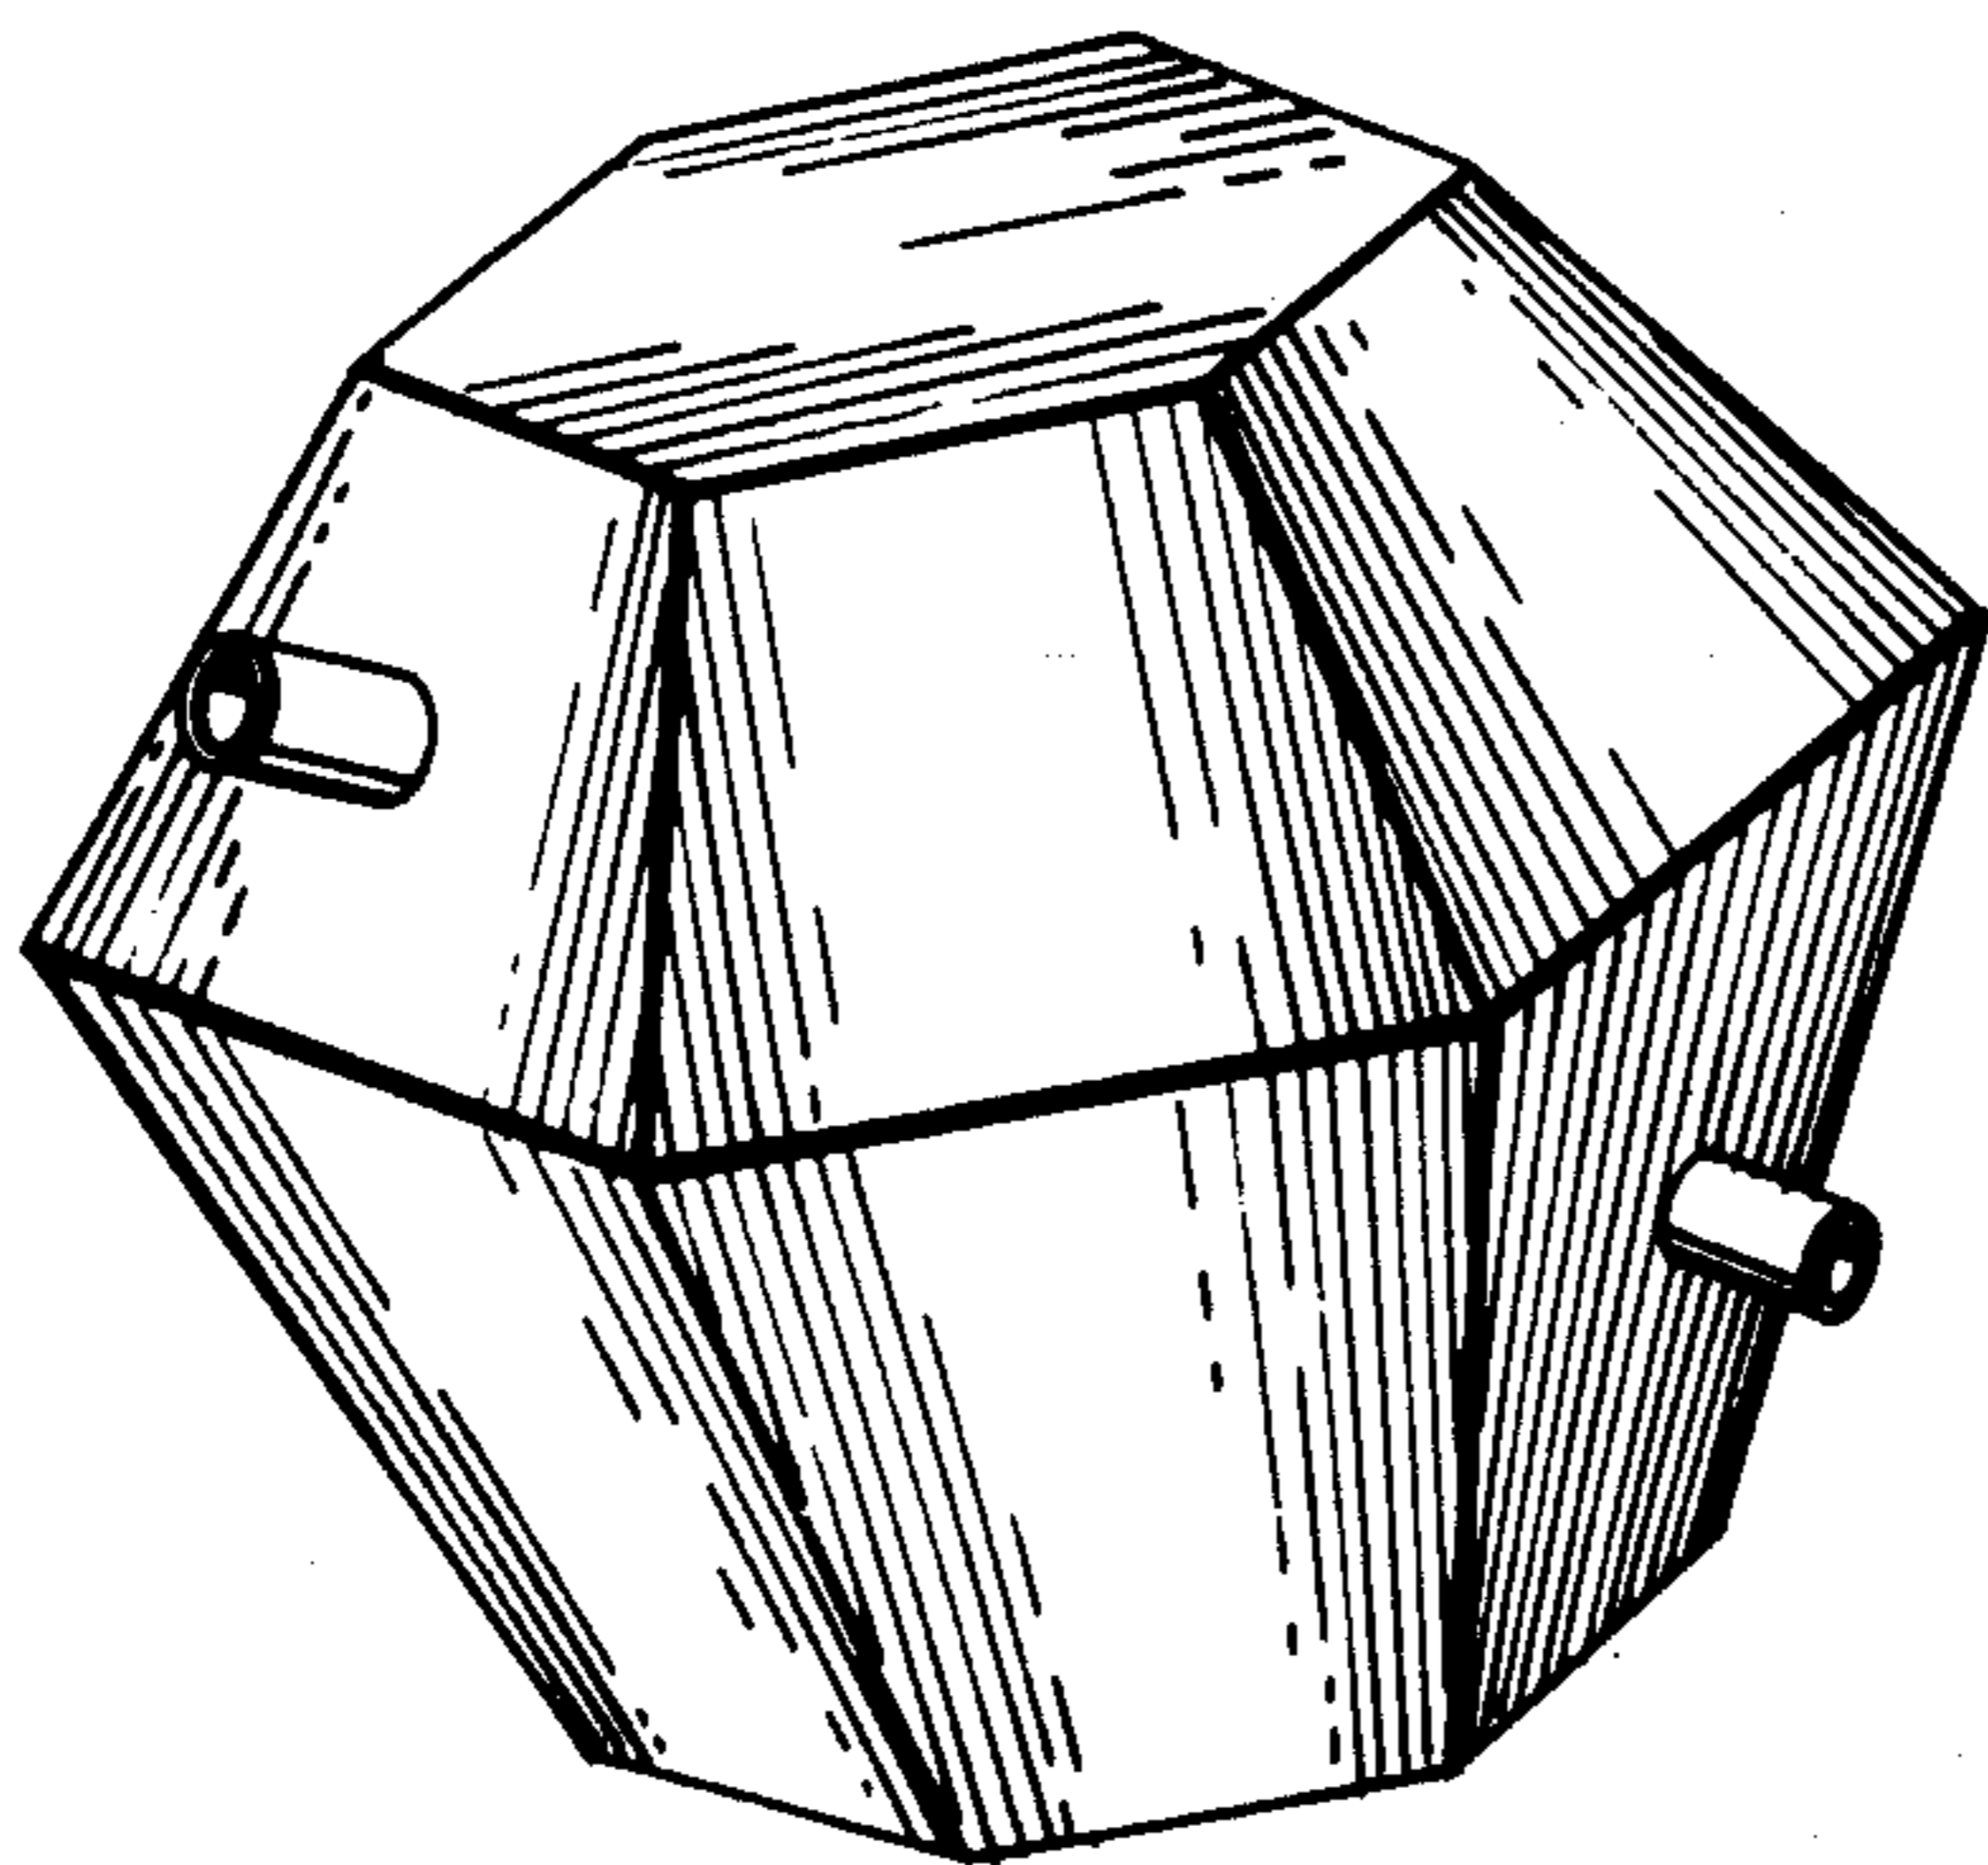

FIG. 1

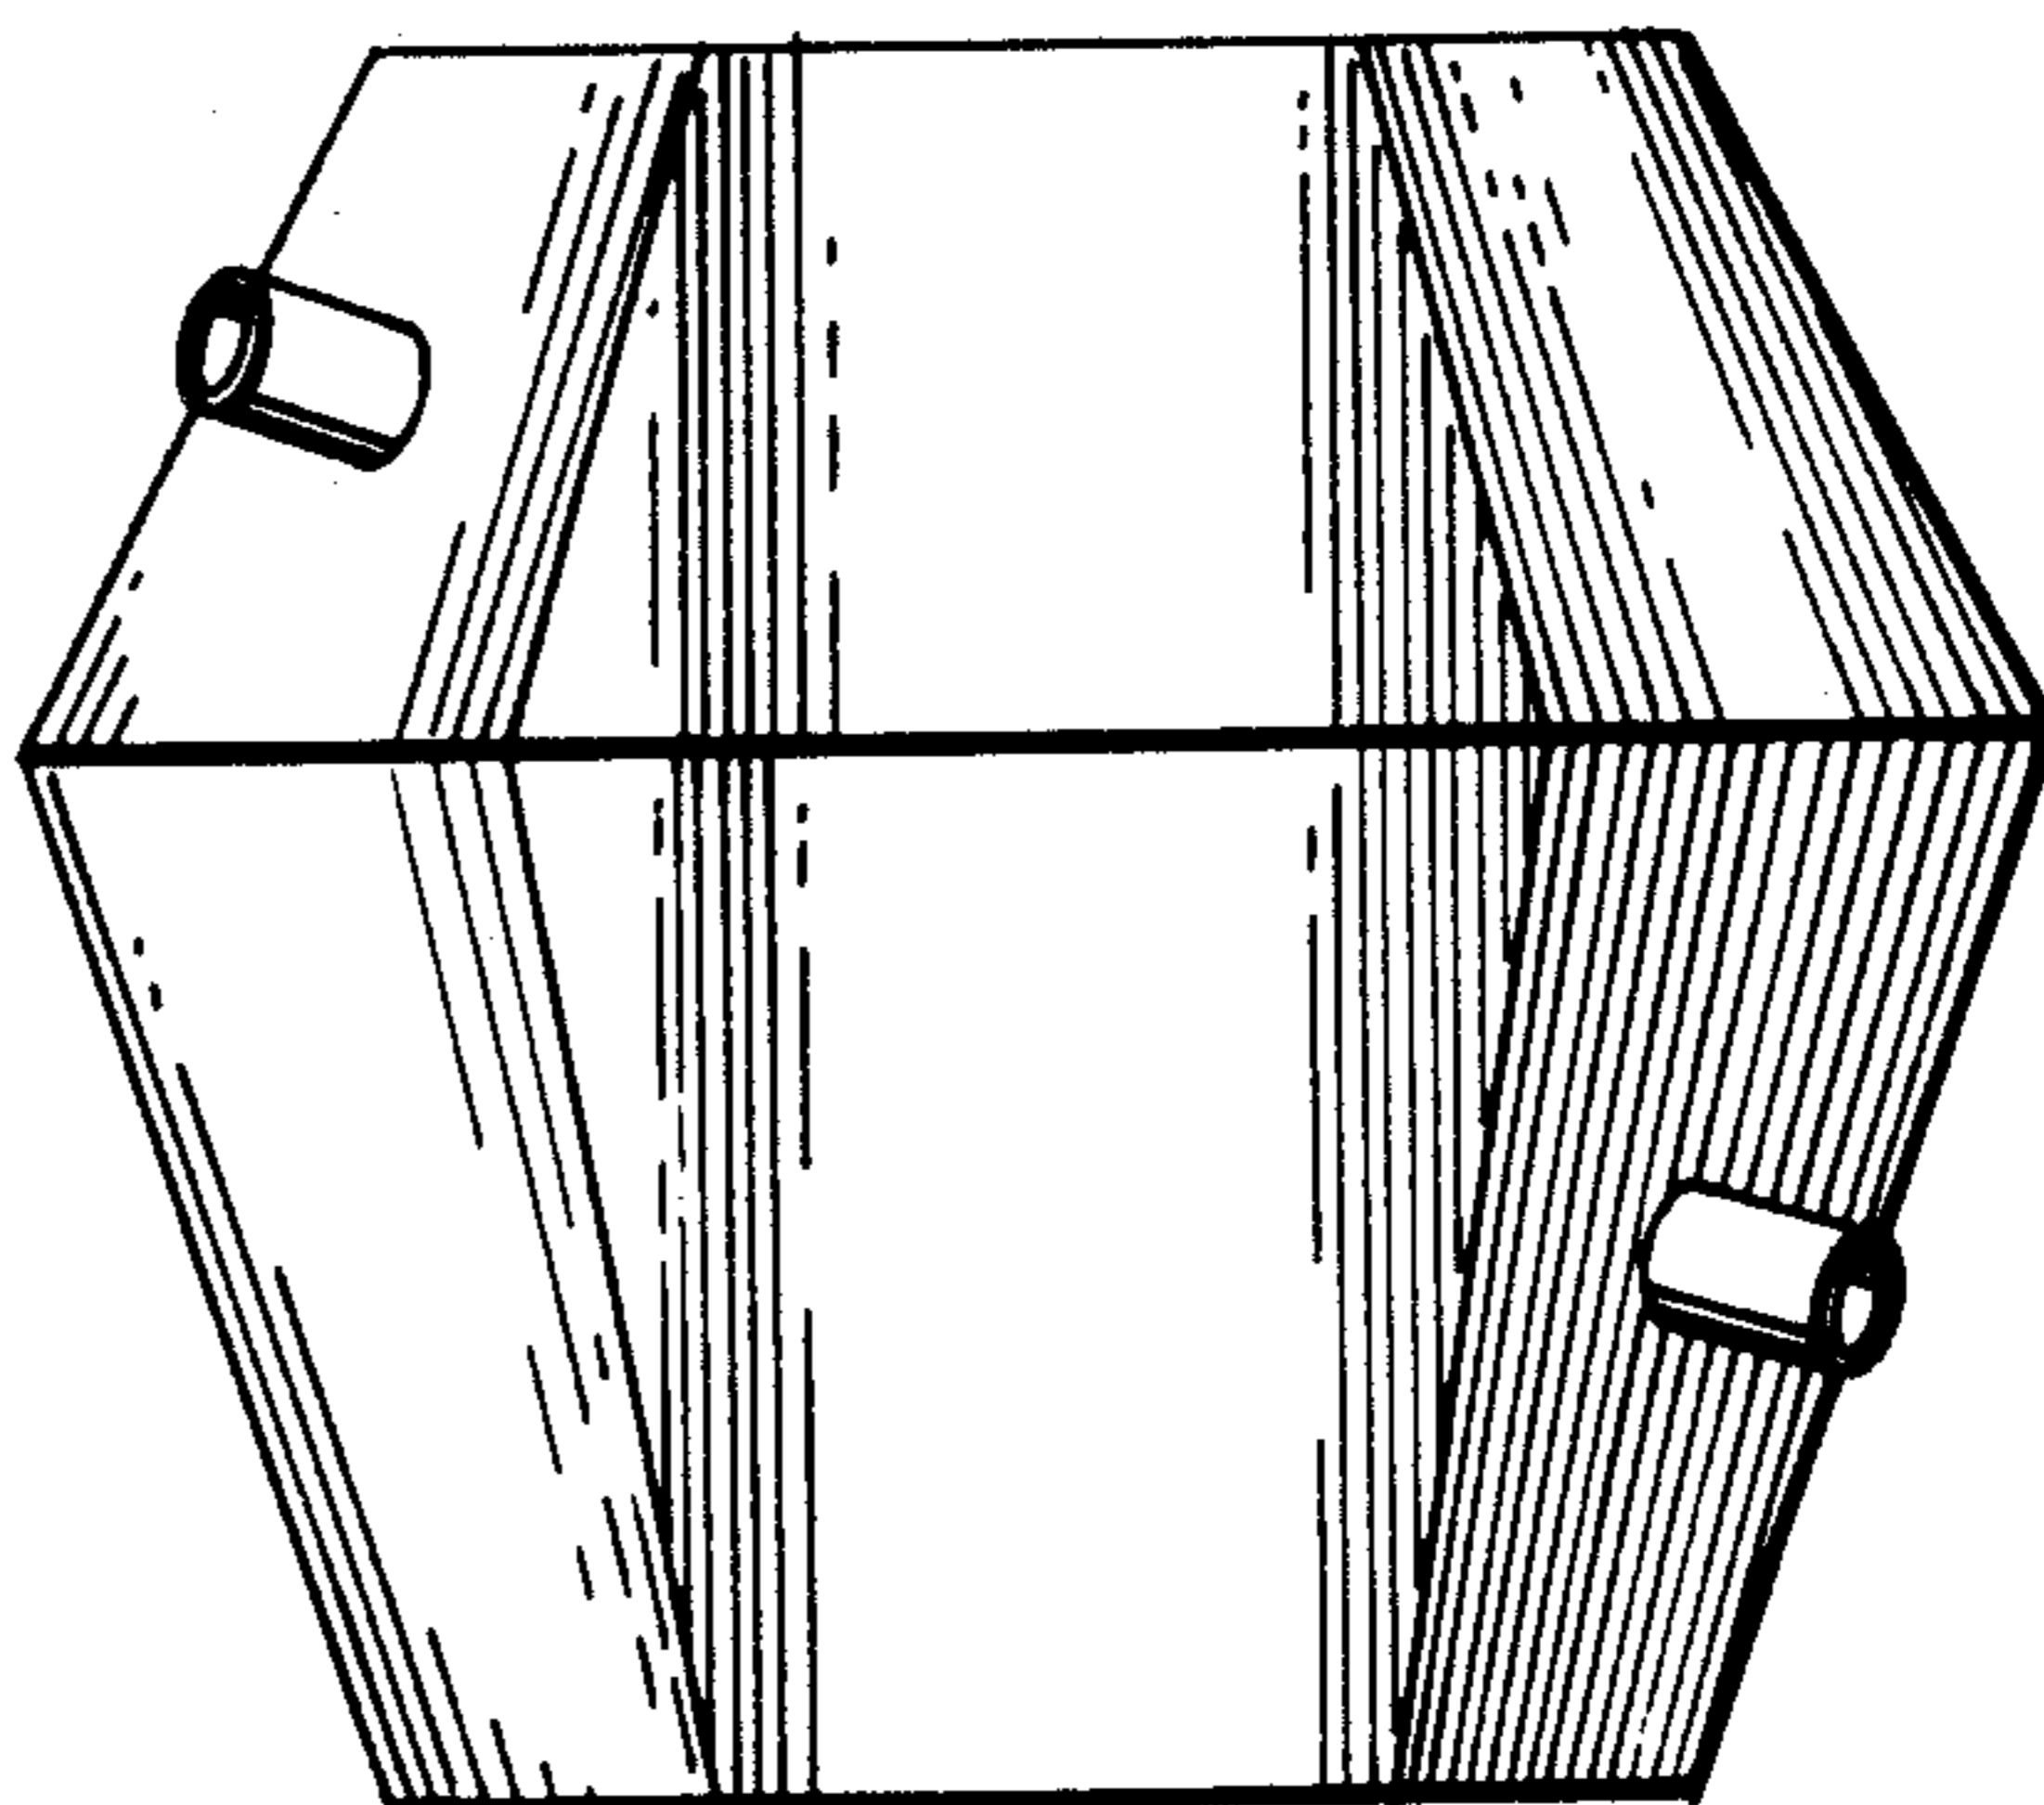

FIG. 2

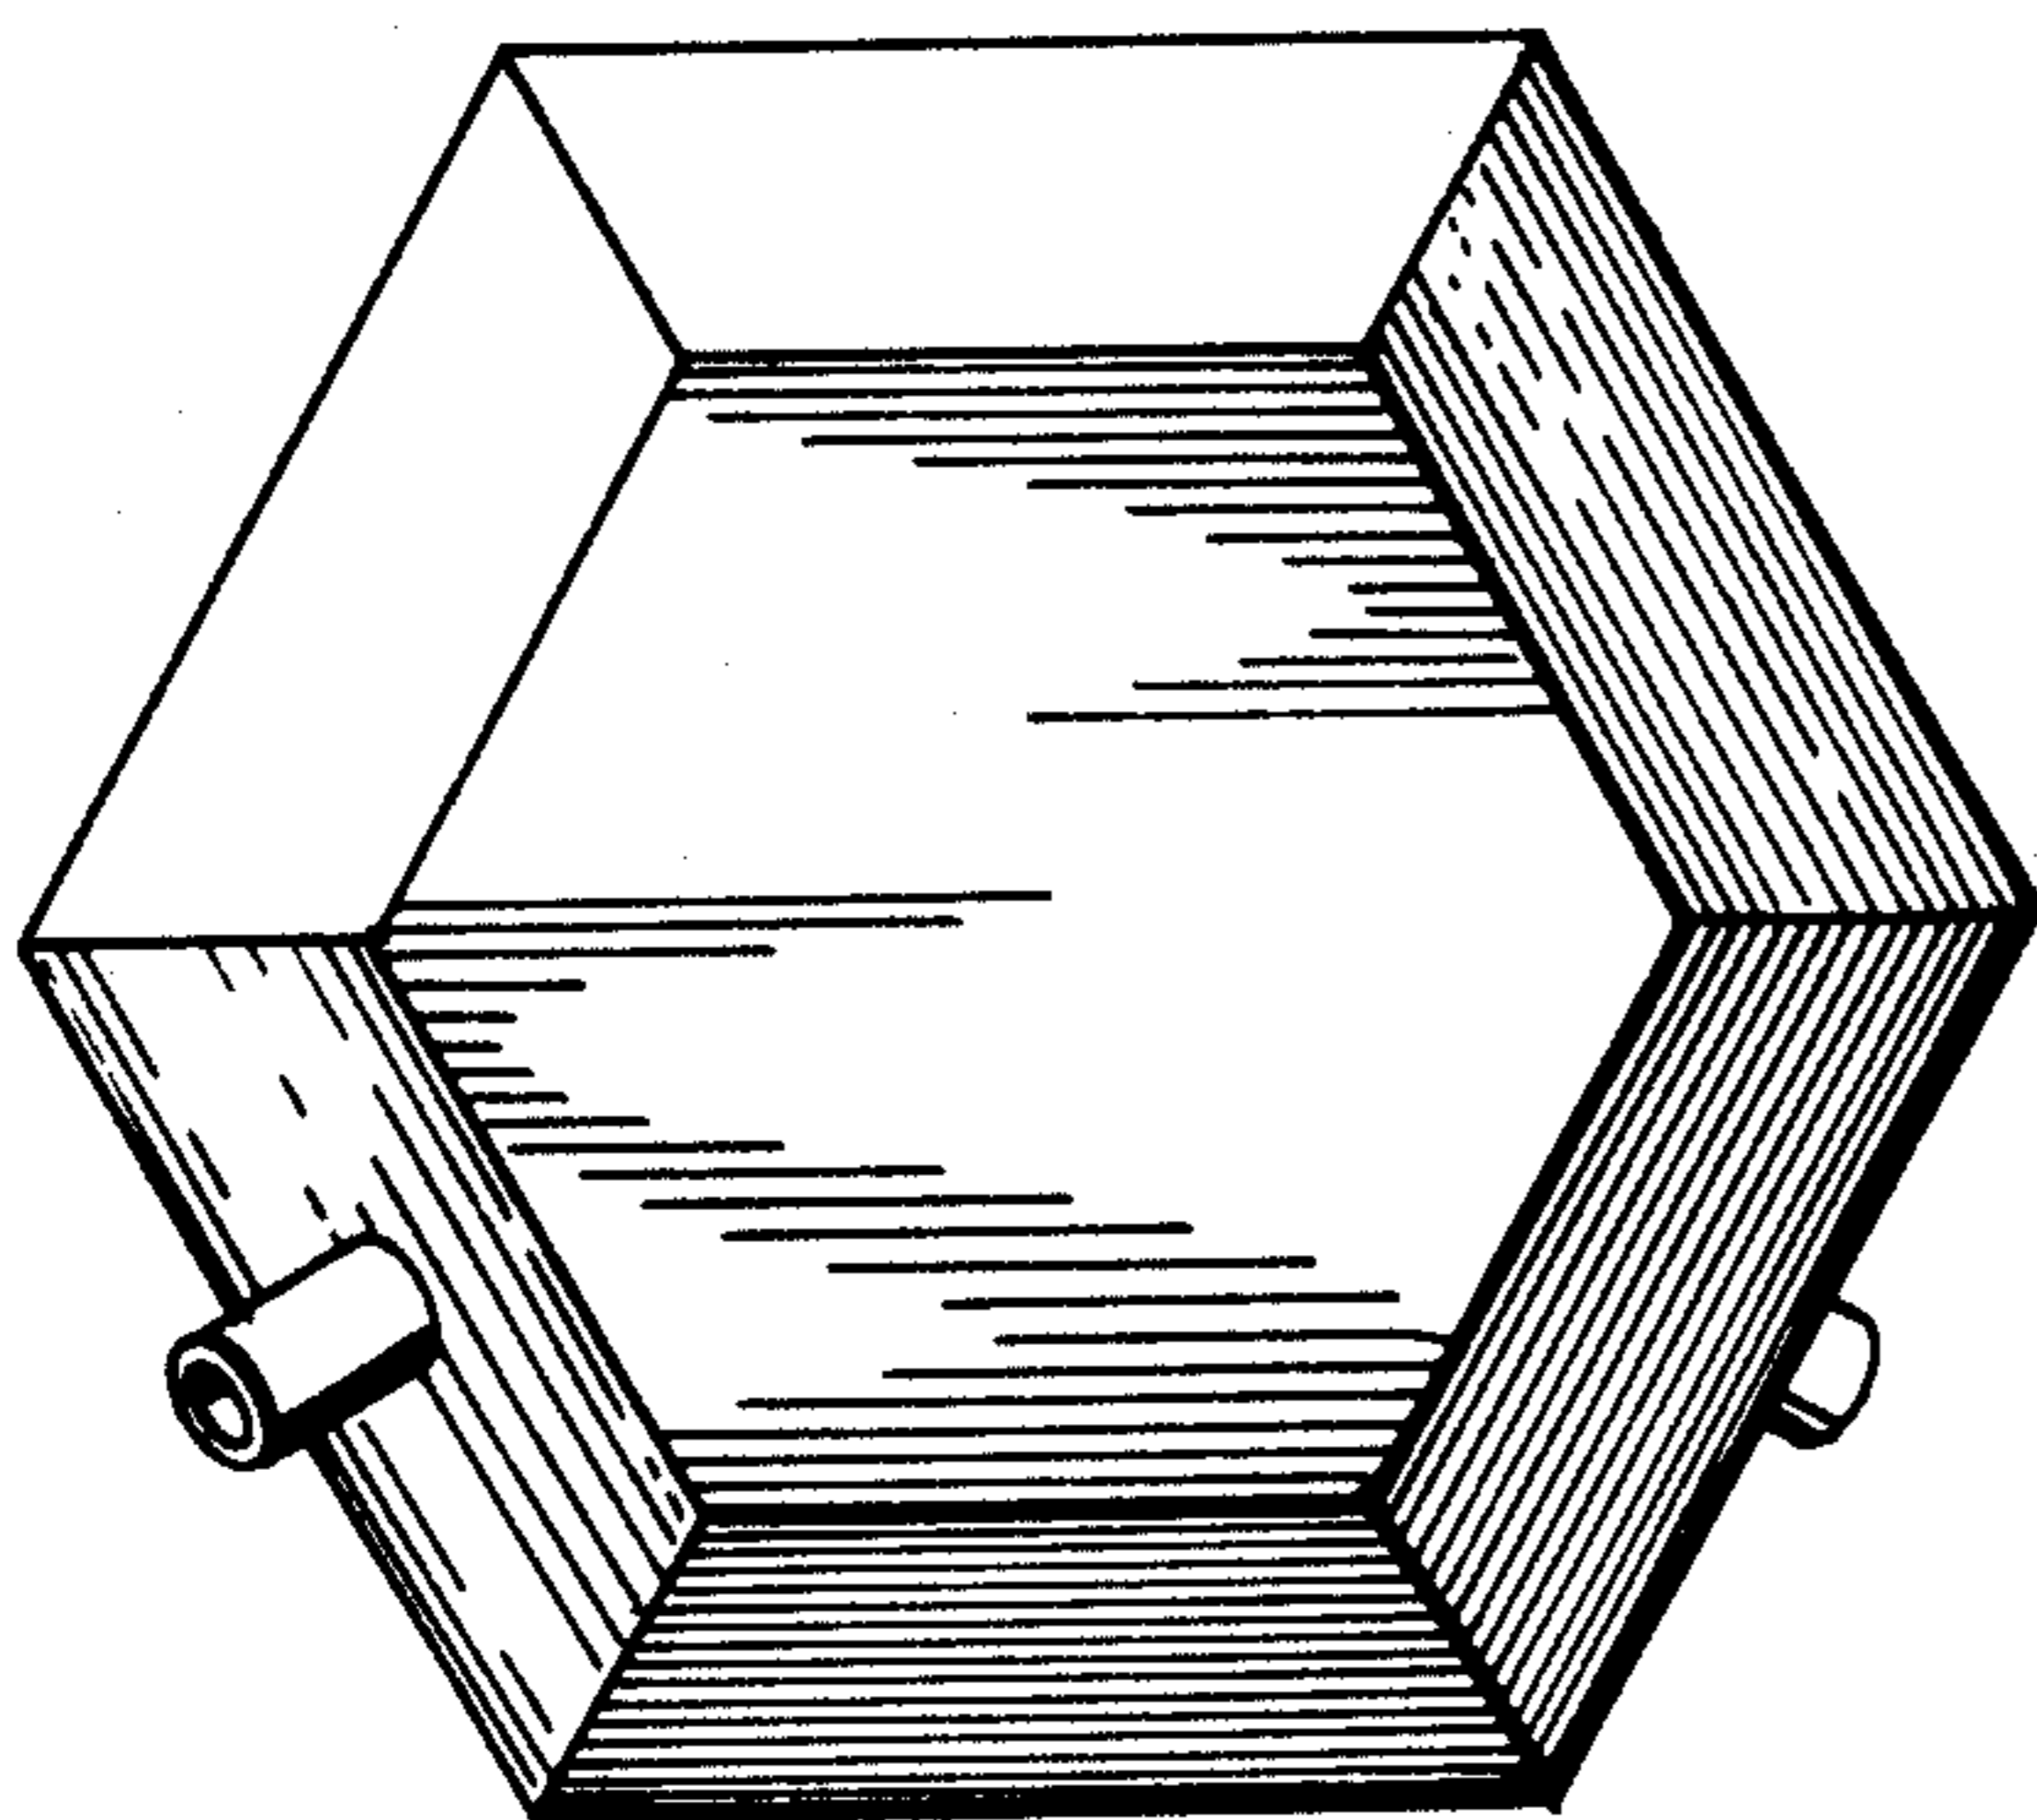

FIG. 3
