[57] **CLAIM**

The ornamental design for an electro-optic display for a timepiece with alarm, as shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of an electro-optic display for a timepiece with alarm showing our new design in a non-energized condition, the rear being unornamented;

FIG. 2 is a typical side elevational view thereof;

FIG. 3 is a front elevational view thereof in a representative energized condition with the alarm activated and displaying the time as 12.34 on Thursday, the 15th of the month, with the "seconds" quadrant indicating 1 to 15 seconds after the minute.

FIG. 1

FIG. 2

FIG. 3
