[57] CLAIM

The ornamental design for an H-clip or similar article, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the H-clip of the present invention showing the rounded ribs.

FIG. 2 is a front elevational view of the H-clip.

FIG. 3 is an end elevational view of the H-clip.

FIG. 4 is a bottom view of the H-clip.

The H-Clip or similar article of this invention is characterized by two pair of parallel elongated ribs which protrude from the bridge section and extend front-to-rear, the ribs of one pair being adjacent one another and protruding to a first side of the bridge section and being between the ribs of the other pair which protrude from a second side of the bridge section.
