[57] CLAIM

The ornamental design for a pair of combined rigid temples and flexible integrated ear clips for hearing aid spectacles, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a pair of combined rigid temples and flexible integrated ear clips for hearing aid spectacles showing my new design;

FIG. 2 is a side elevation view thereof showing my new design.

The frame front and ear mold are shown in broken lines for illustrative purposes only.

The characteristic features of my design reside in rigid hearing aid temples having integrated flexible ear clips one of which is hollow and connected to an ear mold fitting.

FIG. 1

FIG. 2
