[57] CLAIM

The ornamental design for a case for an information display terminal or the like, substantially as shown and described.

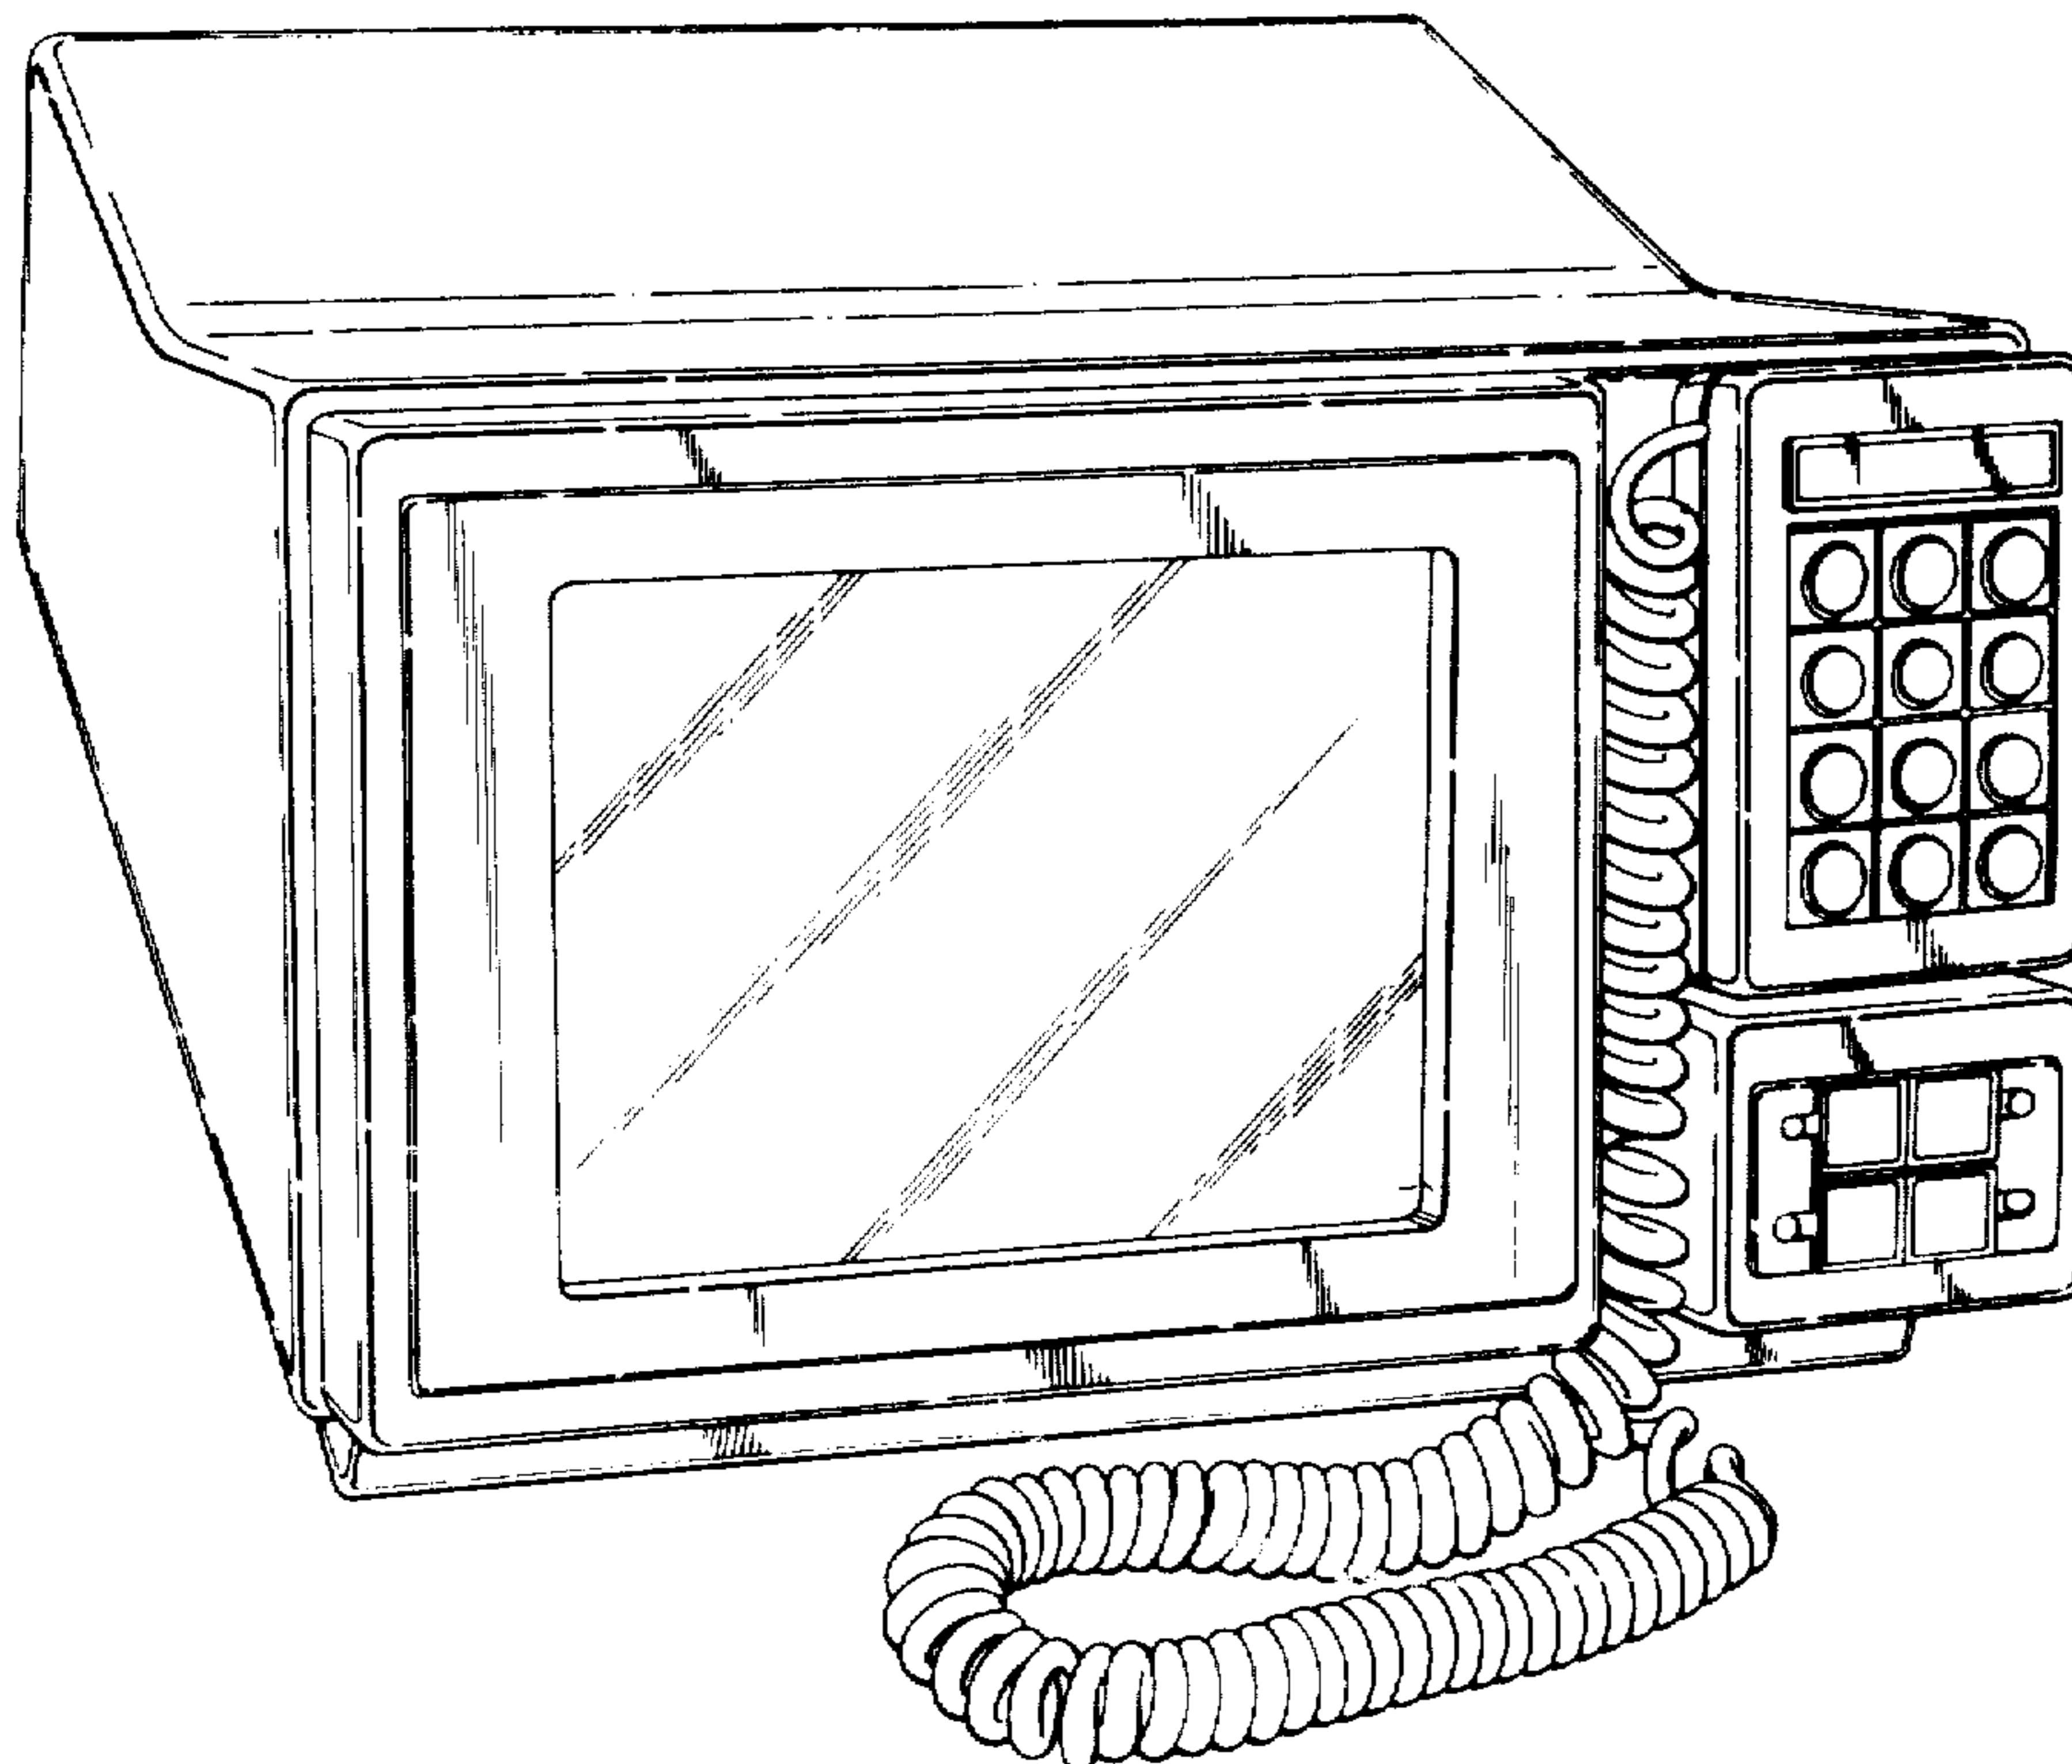

DESCRIPTION

FIG. 1 is a front perspective view of the case for an information display terminal or the like with its control box in place.

FIG. 2 is a different perspective view of the case on a reduced scale, this time shown with the control box removed; and

FIG. 3 is a side perspective view of the case on a reduced scale, again shown with the control box removed.

The rear and bottom sides of the case are plain and conventional.
