[57] CLAIM

The ornamental design for a portable multiple-toilet building, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a portable multiple-toilet building embodying my new design, this view showing

the front and right side with the toilet compartment doors closed;

FIG. 2 is a perspective view of said building showing the right side and rear thereof;

FIG. 3 is an elevational view of the right side of said building with the toilet compartment door thereon open 90 degrees, the left side view being a mirror-image thereof;

FIG. 4 is a perspective view of the rear and part of the right side of said building, with the nearer of the two privacy wings removed and a fragment of the rear wall broken out to disclose the interior portion of the urinal room thereof;

FIG. 5 is a top plan view of the building with the toilet compartment doors closed;

FIG. 6 is a top sectional view of the building taken along the line 6-6 of FIG. 3, with the toilet compartment doors shown open 45 degrees;

FIG. 7 is an elevational view of the right side of said building with the urinal room portion shown in the folded-in mode and the steps stored within the toilet compartments and their doors fully closed, the appearance given when being transported;

and FIG. 8 is a perspective view of a portable multiple-toilet building in the folded-in mode and showing the rear and right side thereof.

The bottom of the portable multiple-toilet building embodying my design shown in the drawing is substantially plain and unornamental.

The broken line showing of the turbine ventilator is for illustrative purposes only.
