[57] CLAIM

The ornamental design for a demagnetizing device, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the demagnetizing device according to the present invention, which is used for demagnetizing the remnant magnetization of a magnetic recording and reproducing head of a recorder;

FIG. 2 is a right side view of the demagnetizing device;

FIG. 3 is a left side view of the demagnetizing device;

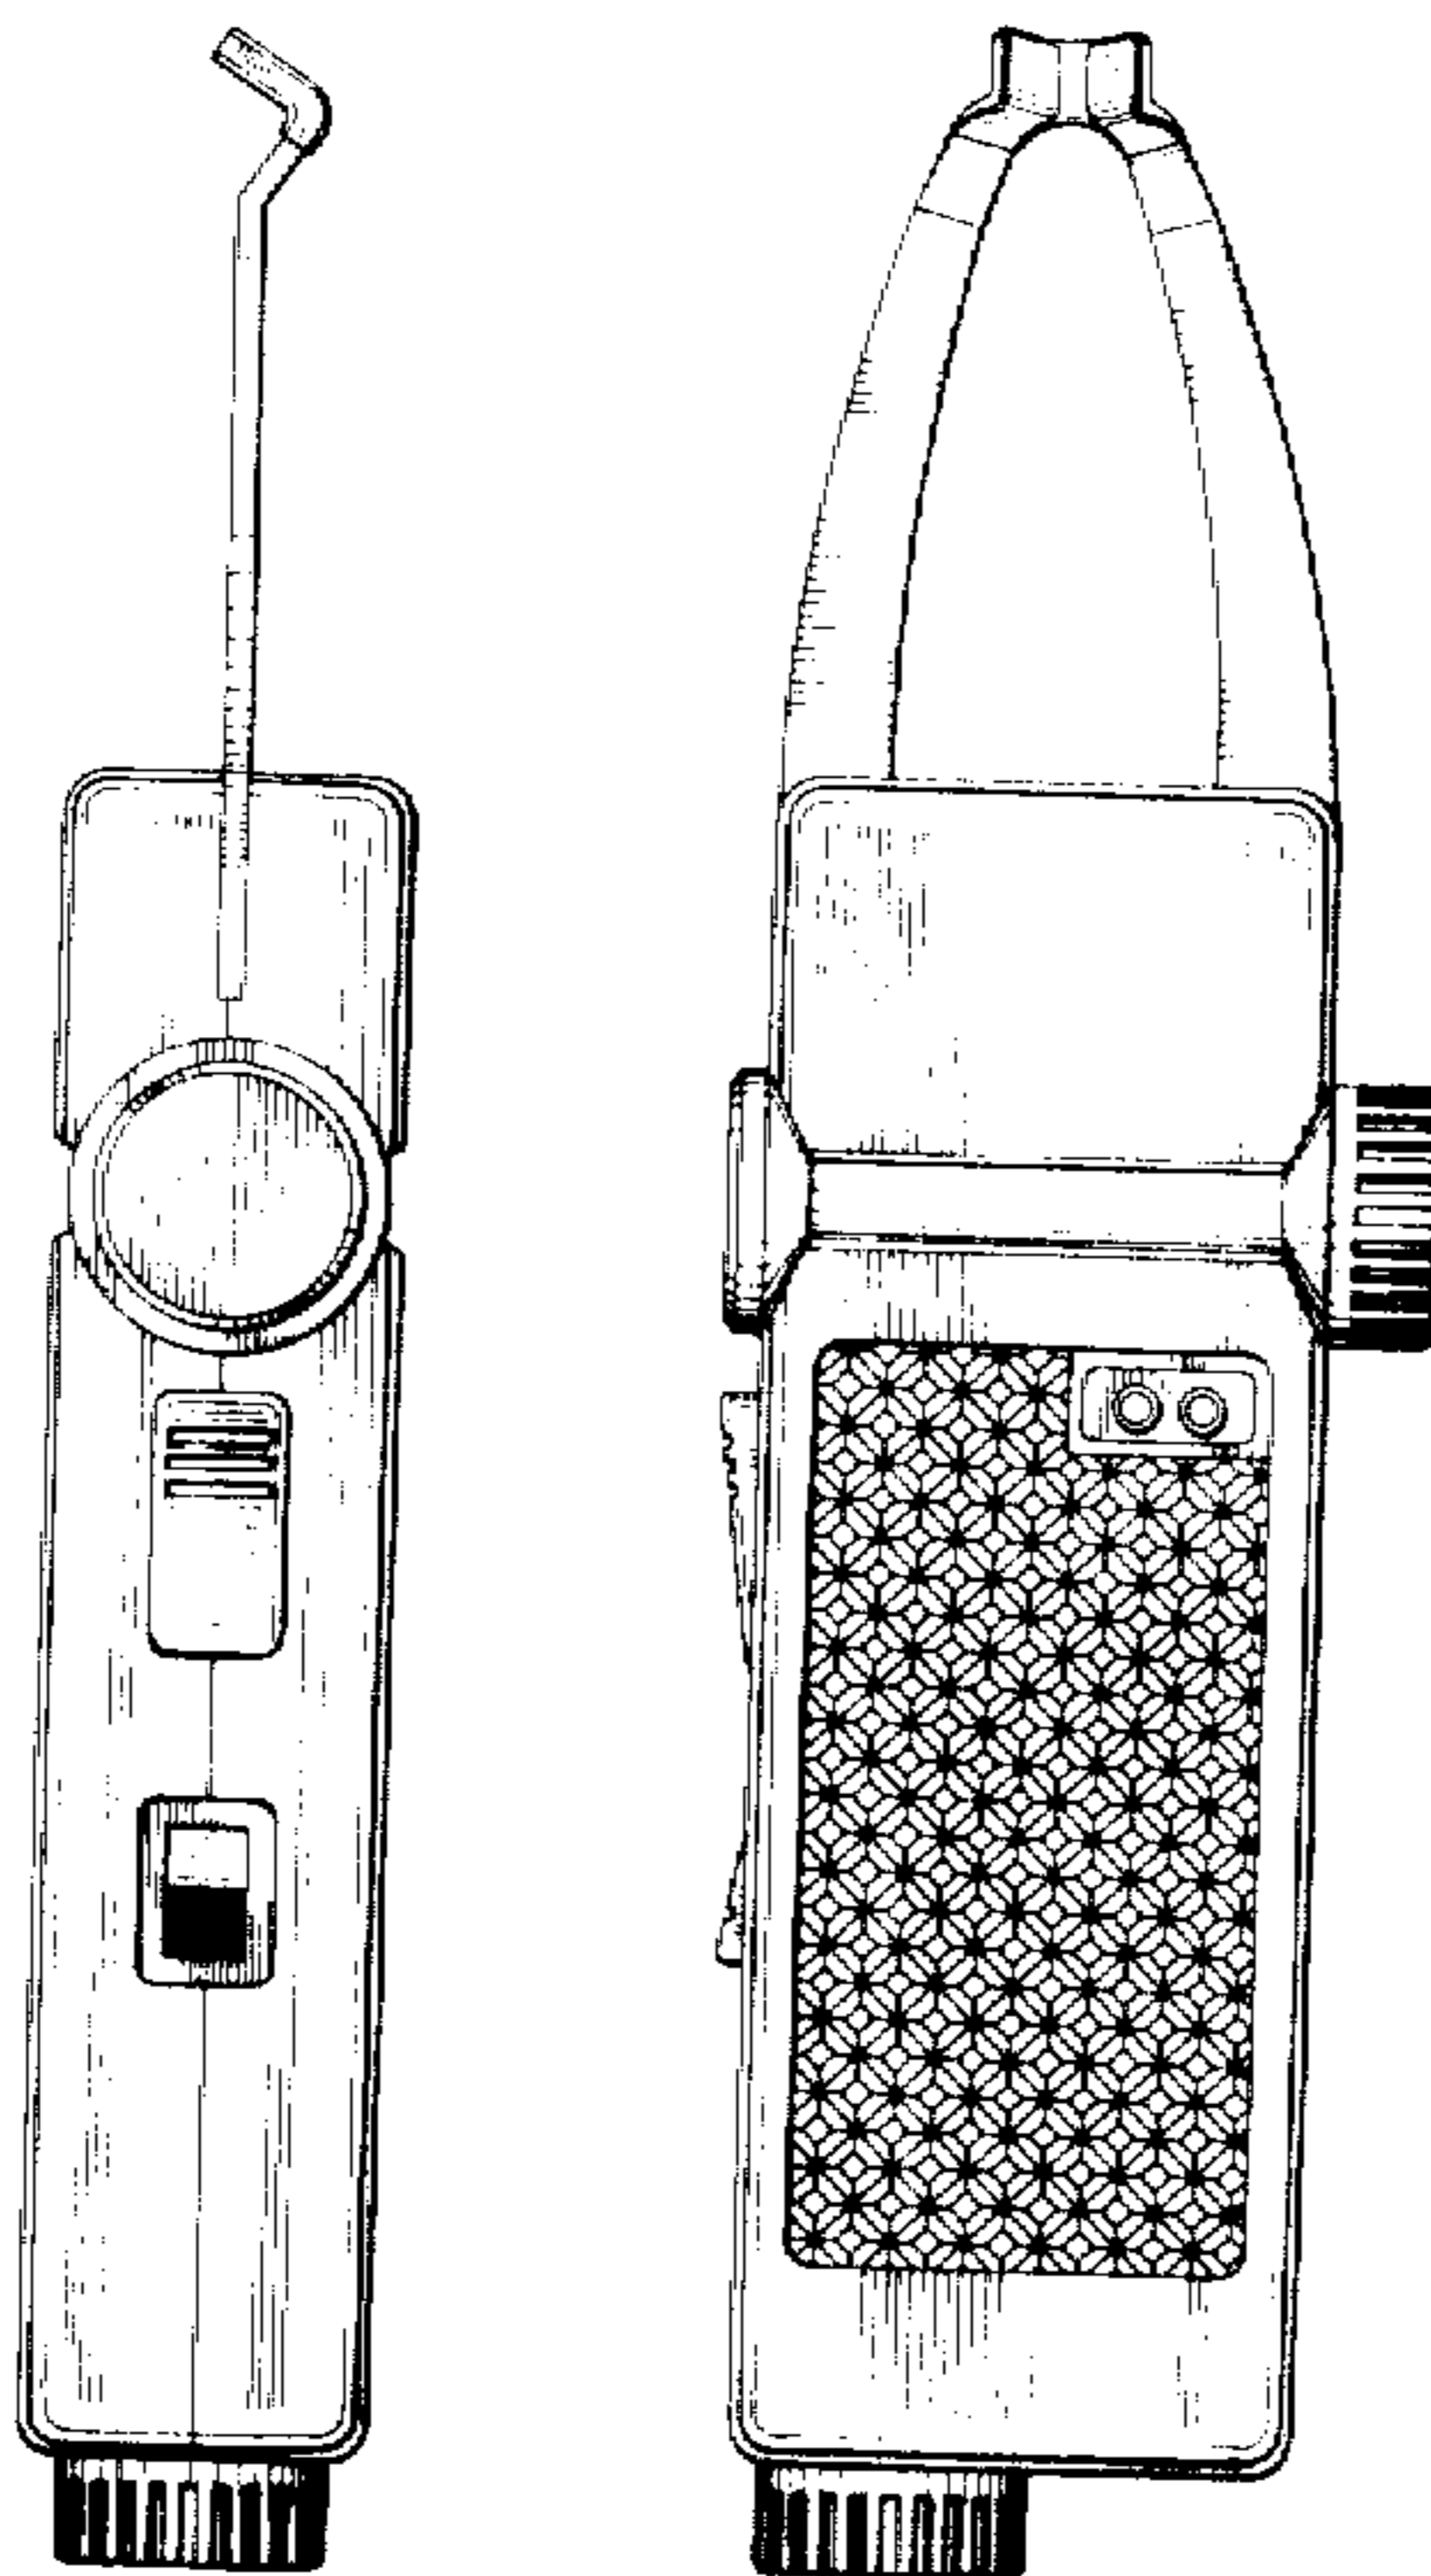

FIG. 4 is a rear view of the demagnetizing device;

FIG. 5 is a plan view of the demagnetizing device;

FIG. 6 is a bottom view of the demagnetizing device;

and

FIG. 7 is a left side view of the demagnetizing device which shows that the magnetic field generating head is movable with respect to the housing portion.
