[57] **CLAIM**

The ornamental design for a plant box, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a plant box showing my new design, with one end plate removed; and FIG. 2 is a side elevation thereof.

The plant box is in the form of a trough provided with at least one end plate. The trough is corrugated, and the characteristic feature of the design resides in the fact that the end plate has a flange and the flange is formed complementarily to the corrugation of the trough.
