[57] CLAIM

The ornamental design for a control panel for combina-  
tion lock and the like, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a control panel for a  
combination lock and the like embodying my design;  
FIG. 2 is a top plan view of the control panel of FIG. 1;  
FIG. 3 is a side elevational view as seen from the bot-  
tom of FIG. 2, the appearance of the opposite side being  
similar but reversed; and  
FIG. 4 is an end view as seen from the right of FIG. 3,  
the appearance of the opposite end being similar.  
The structure shown in phantom lines in the drawings,  
which is hidden from view when the control panel is in  
its intended environment, is merely illustrative of a type  
of construction which may be employed with the con-  
trol panel. The structure shown in phantom lines forms  
no part of the design sought to be patented. Also, the  
particular initials "PCL" shown in the drawings are for  
illustrative purposes, and it is not intended that the  
design be limited to these particular initials.
