[57] CLAIM

The ornamental design for a video game control unit, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a video game control unit showing my new design;

FIG. 2 is a rear elevational view of the video game control unit;

FIG. 3 is a top plan view of the video game control unit; FIG. 4 is a bottom plan view of the video game control unit;

FIG. 5 is an elevational view of one side of the video game control unit;

FIG. 6 is an elevational view of the other side of the video game control unit;

FIG. 7 is a sectional view of the video game control unit taken along the line 7—7 of FIG. 1 on an enlarged scale; FIG. 8 is a sectional view of the video game control unit taken along the line 8—8 of FIG. 3;

FIG. 9 is a front elevational view of a video game control unit incorporating the features of a second embodiment of my design;

FIG. 10 is a rear elevational view of the second embodiment;

FIG. 11 is a top plan view of the second embodiment;

FIG. 12 is a bottom plan view of the second embodiment;

FIG. 13 is an elevational view of one side of the second embodiment;

FIG. 14 is an elevational view of the other side of the second embodiment;

FIG. 15 is a sectional view of the second embodiment taken along the line 15—15 of FIG. 9 on an enlarged scale; and

FIG. 16 is a sectional view of the second embodiment taken along the line 16—16 of FIG. 11.

The standard power cord is shown fragmentarily for convenience of illustration.
