[57] CLAIM

The ornamental design for a CRT terminal stand, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of a CRT terminal stand showing my new design.

FIG. 2 is a perspective view of a second embodiment of a CRT terminal stand showing my new design.

FIG. 3 is a perspective view of a third embodiment of a CRT terminal stand showing my new design.

FIG. 4 is a perspective view of a fourth embodiment of a CRT terminal stand showing my new design.

FIG. 5 is a side elevational view of the first embodiment as shown in FIG. 1, the opposite side being a mirror image.

FIG. 6 is a front elevational view of said first embodiment.

FIG. 7 is a rear elevational view of said first embodiment.

FIG. 8 is a top plan view of said first embodiment.

FIG. 9 is a side elevational view of the second embodiment as shown in FIG. 2, the opposite side being a mirror image.

FIG. 10 is a front elevational view of said second embodiment.

FIG. 11 is a rear elevational view of said second embodiment.

FIG. 12 is a top plan view of said second embodiment.

FIG. 13 is a side elevational view of the third embodiment as shown in FIG. 3, the opposite side being a mirror image.

FIG. 14 is a front elevational view of said third embodiment.

FIG. 15 is a rear elevational view of said third embodiment.

FIG. 16 is a top plan view of said third embodiment.

FIG. 17 is a side elevational view of the fourth embodiment as shown in FIG. 4, the opposite side being a mirror image.

FIG. 18 is a front elevational view of said fourth embodiment.

FIG. 19 is a rear elevational view of said fourth embodiment.

FIG. 20 is a top plan view of said fourth embodiment.
