[57] CLAIM

The ornamental design for medical tubing, as shown.

DESCRIPTION

FIG. 1 is a fragmentary side view of the medical tubing showing our new design, the flexible tubing being bent in a U-shaped position being fragmentarily shown for convenience of illustration;

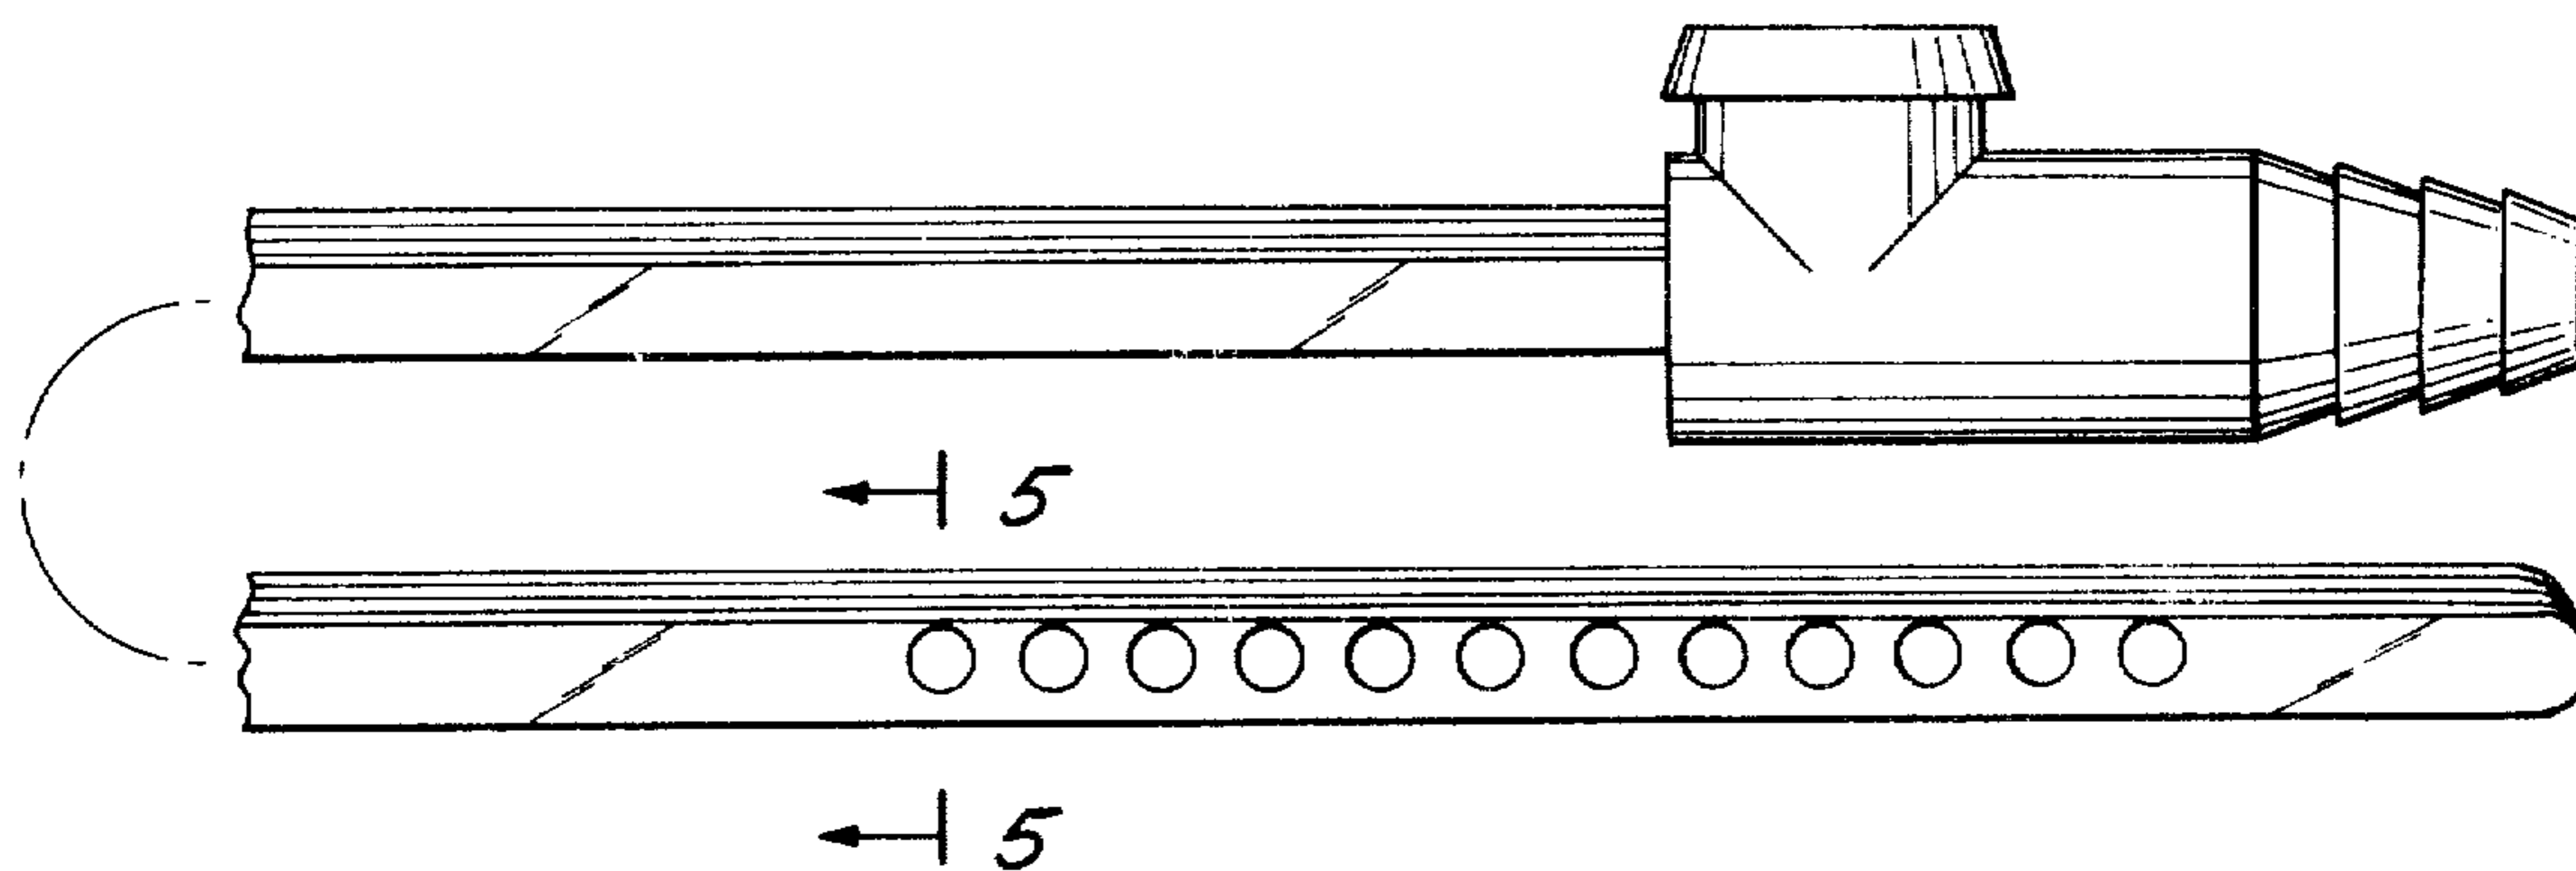

FIG. 2 is a fragmentary top view thereof, the tubing being fragmentarily shown for convenience of illustration;

FIG. 3 is a fragmentary bottom view thereof, the tubing being fragmentarily shown for convenience of illustration;

FIG. 4 is a right hand view thereof;

FIG. 5 is an enlarged cross-sectional view thereof, taken on line 5—5 in FIG. 1.

In FIG. 1, the omitted intermediate portion has a constant transverse cross-sectional configuration which is the same as FIG. 5 except that there are no transverse openings as in FIG. 5.

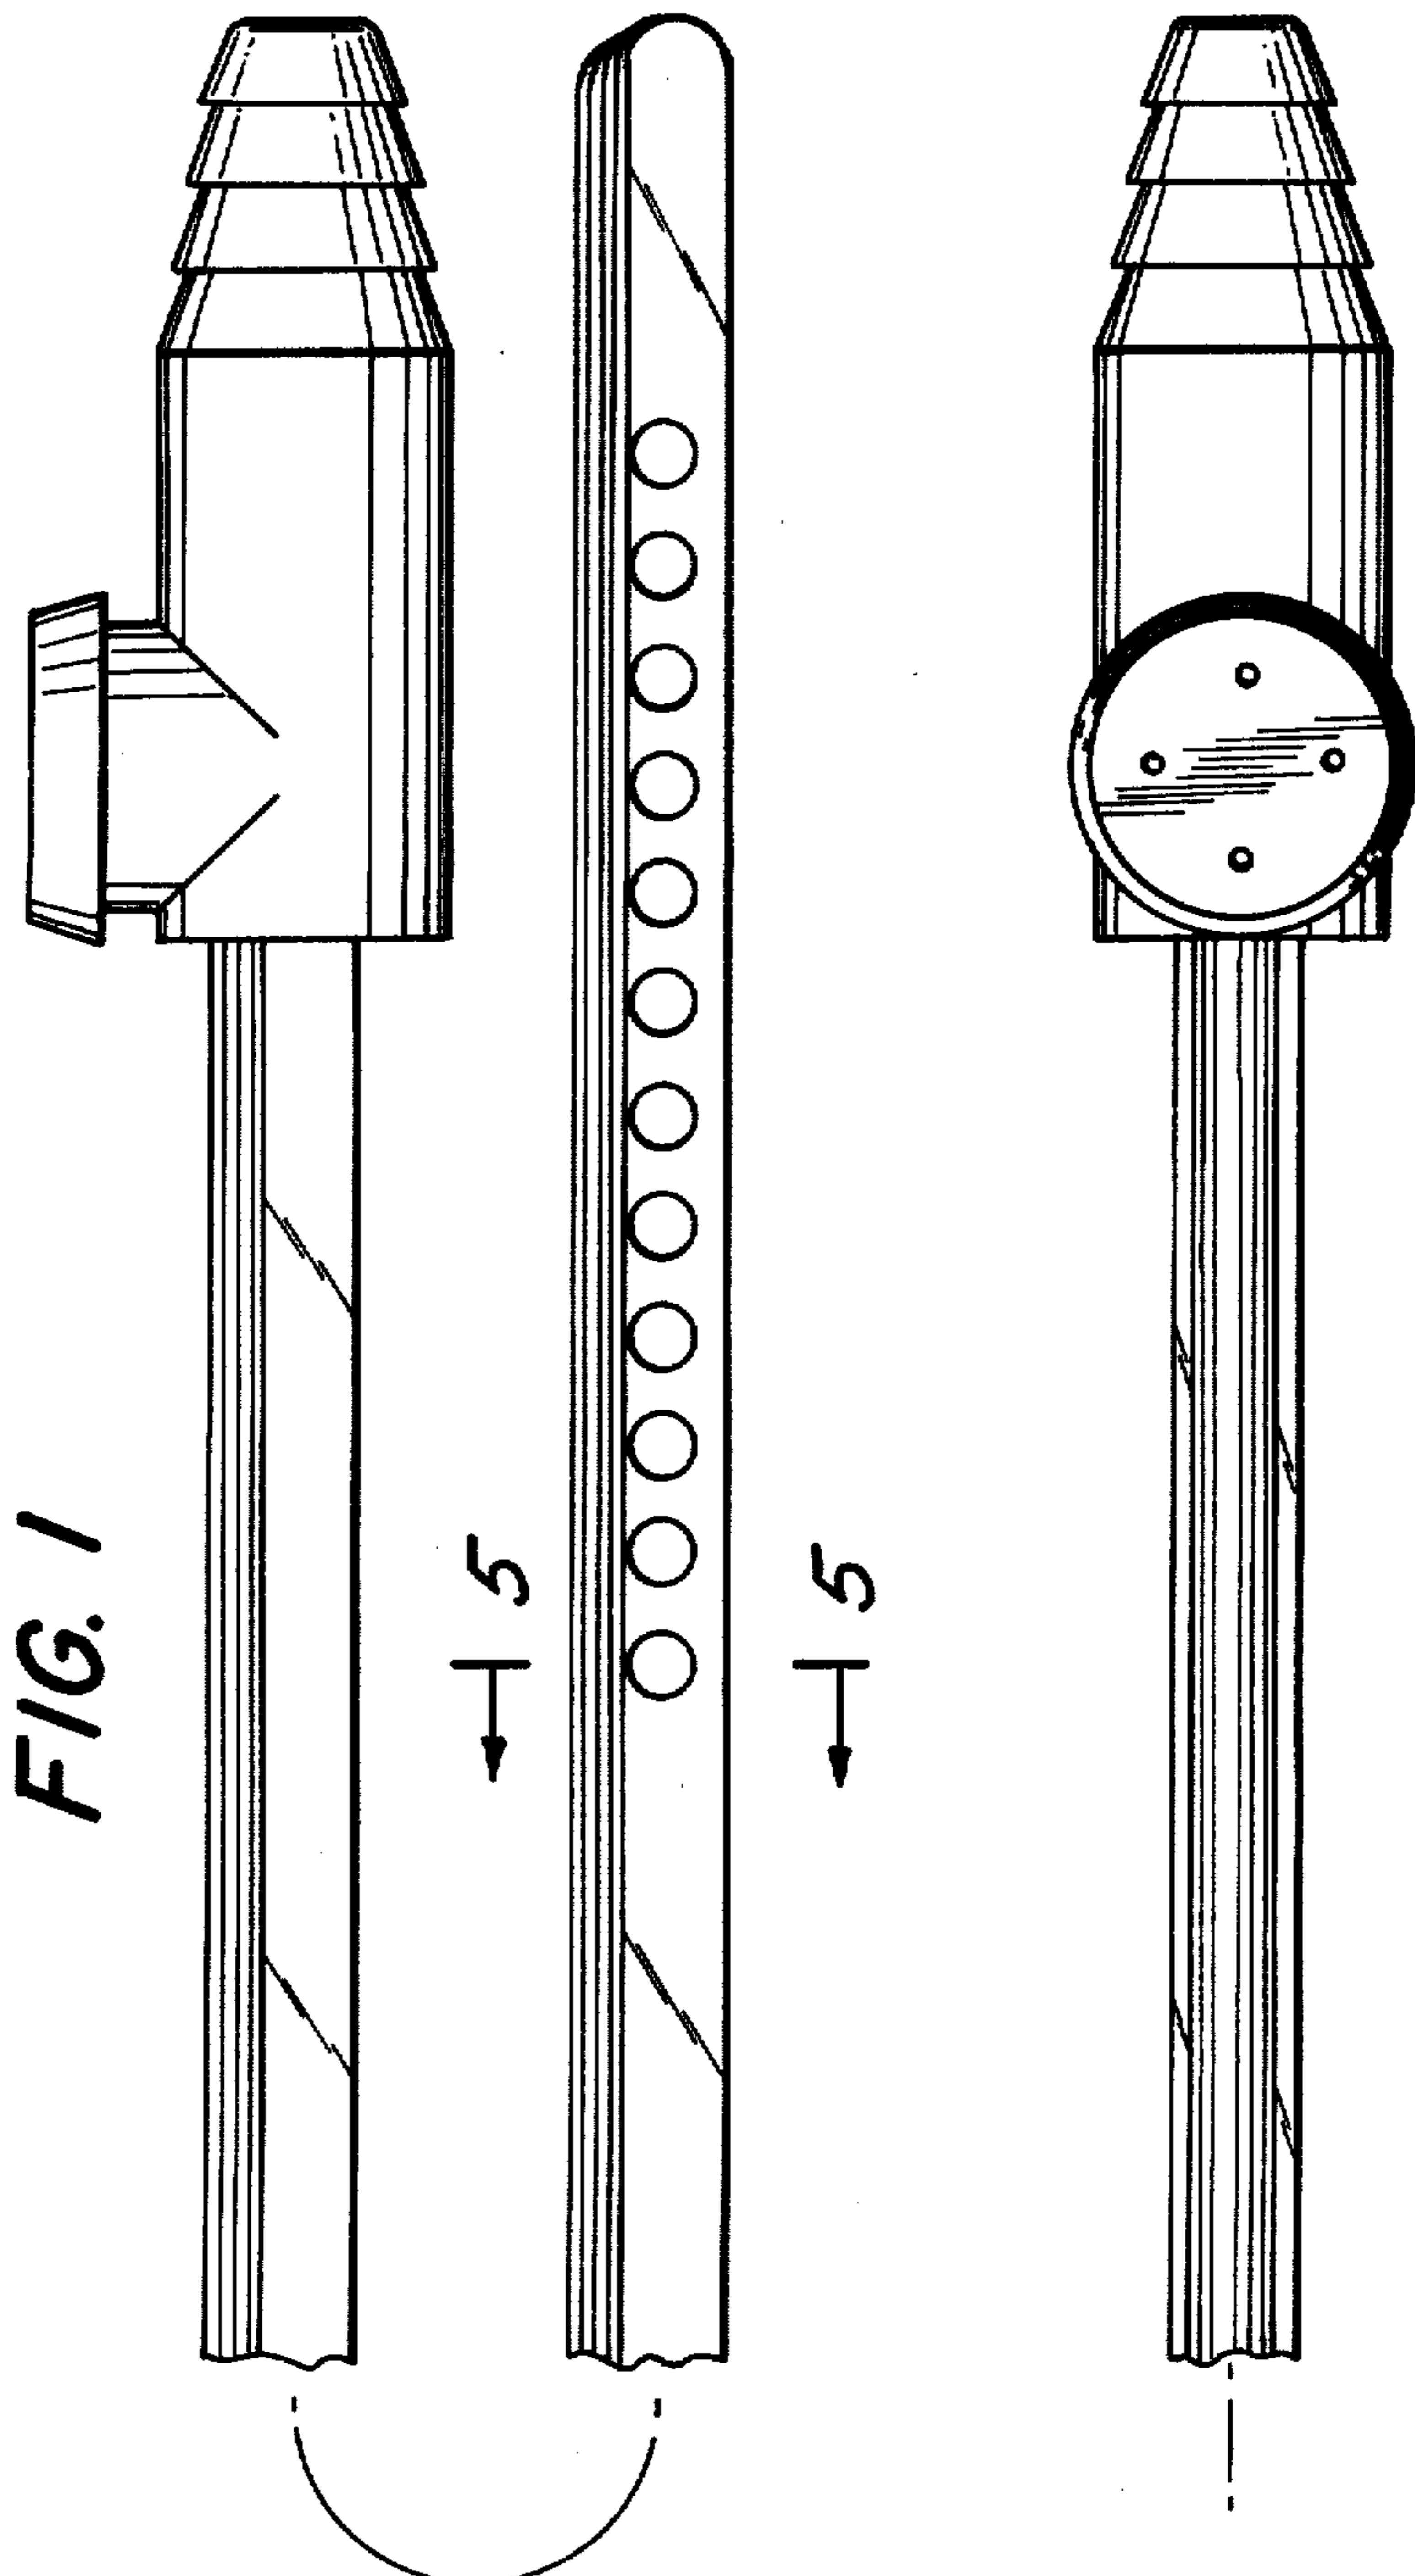

FIG. 1

FIG. 2

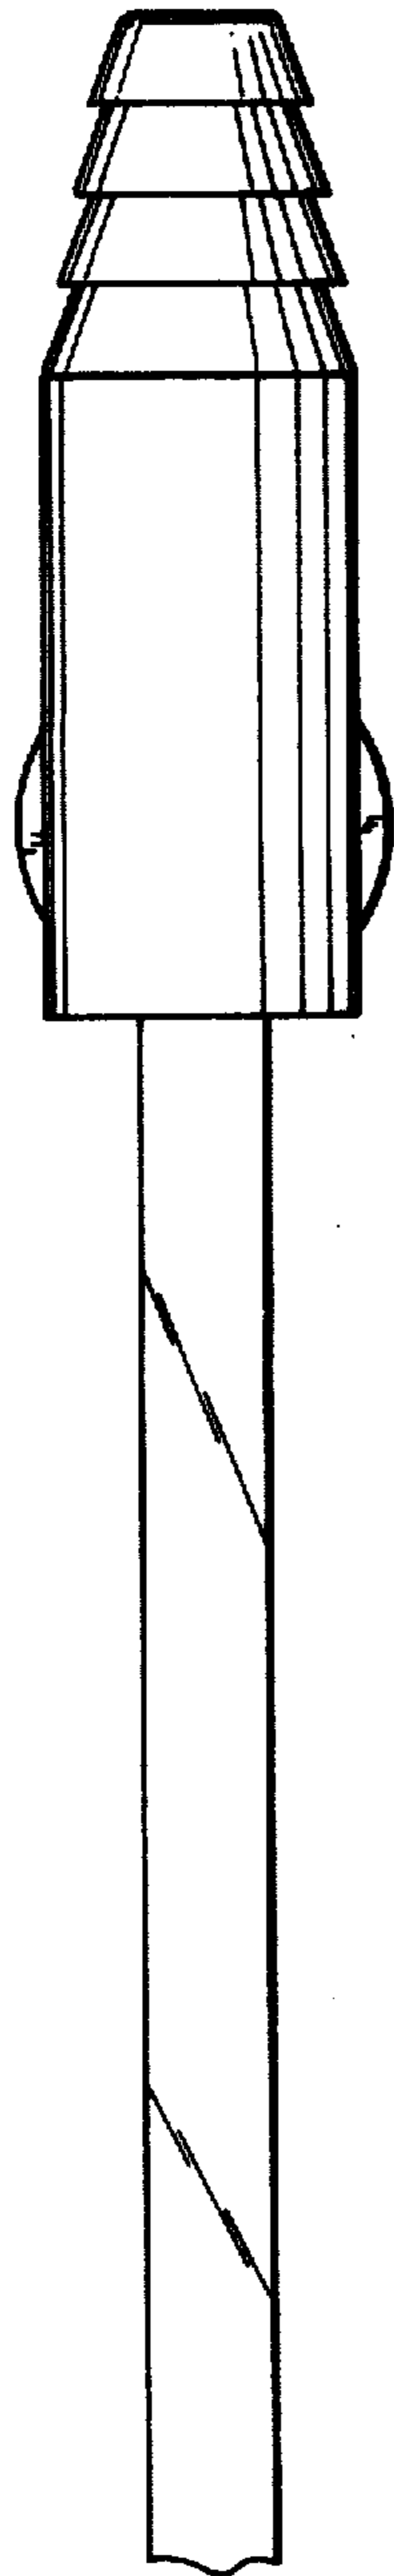

FIG. 3
