[57] **CLAIM**

The ornamental design for a food storage container or the like, substantially as is shown and described.

**DESCRIPTION**

FIG. 1 is a top perspective view of the food storage container or the like showing my new design; FIG. 2 is an end elevational view thereof; FIG. 3 is a front elevational view thereof; FIG. 4 is a top plan view thereof; FIG. 5 is a bottom plan view thereof; and FIG. 6 is an enlarged partial cross-sectional view thereof taken along line 6-6 of FIG. 4.

The design is characterized by a peripherally and outwardly extending rim positioned adjacent the open end of the food storage container, which rim projects to a greater extent from the container end side walls exterior surfaces than from the front and rear wall exterior surfaces and the upper surfaces of such rim along its front and rear wall extends slopes slightly downwardly from each end wall to a substantially container center-line juncture.
