[57] CLAIM

The ornamental design for a tire, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire showing my new design;

FIG. 2 is an elevational view of the side shown in FIG. 1:

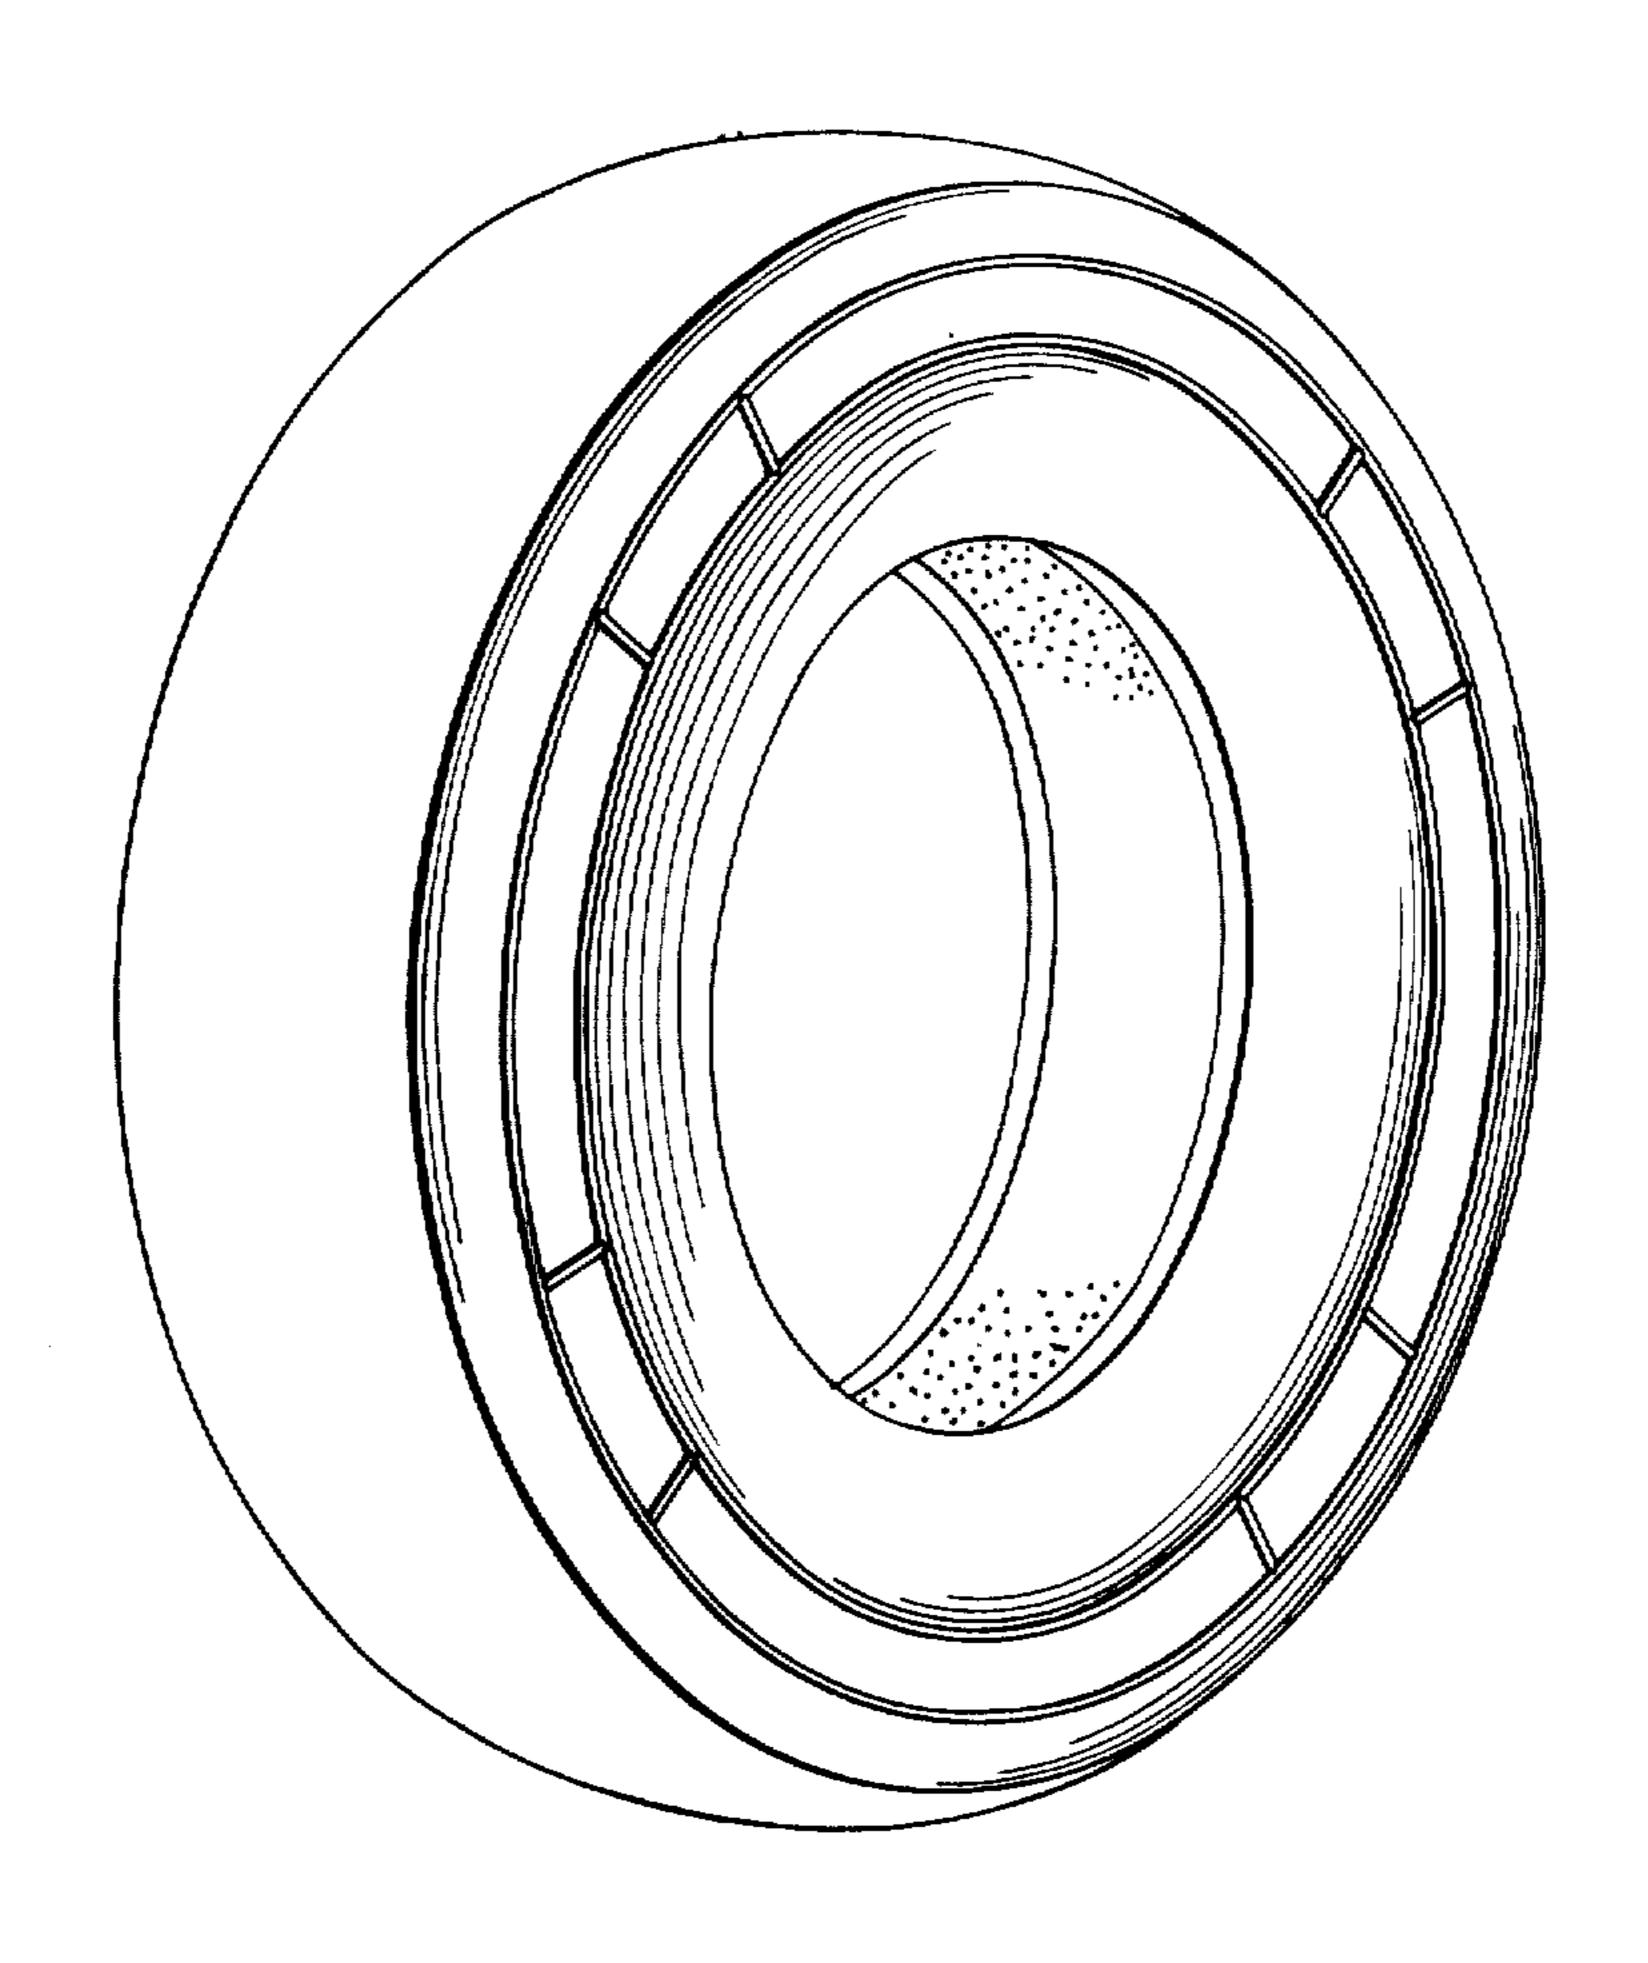

FIG. 3 is an enlarged fragmentary sectional view thereof taken along line 3—3 in FIG. 1;

FIG. 4 is a perspective view thereof showing the side opposite to that shown in FIG. 1;

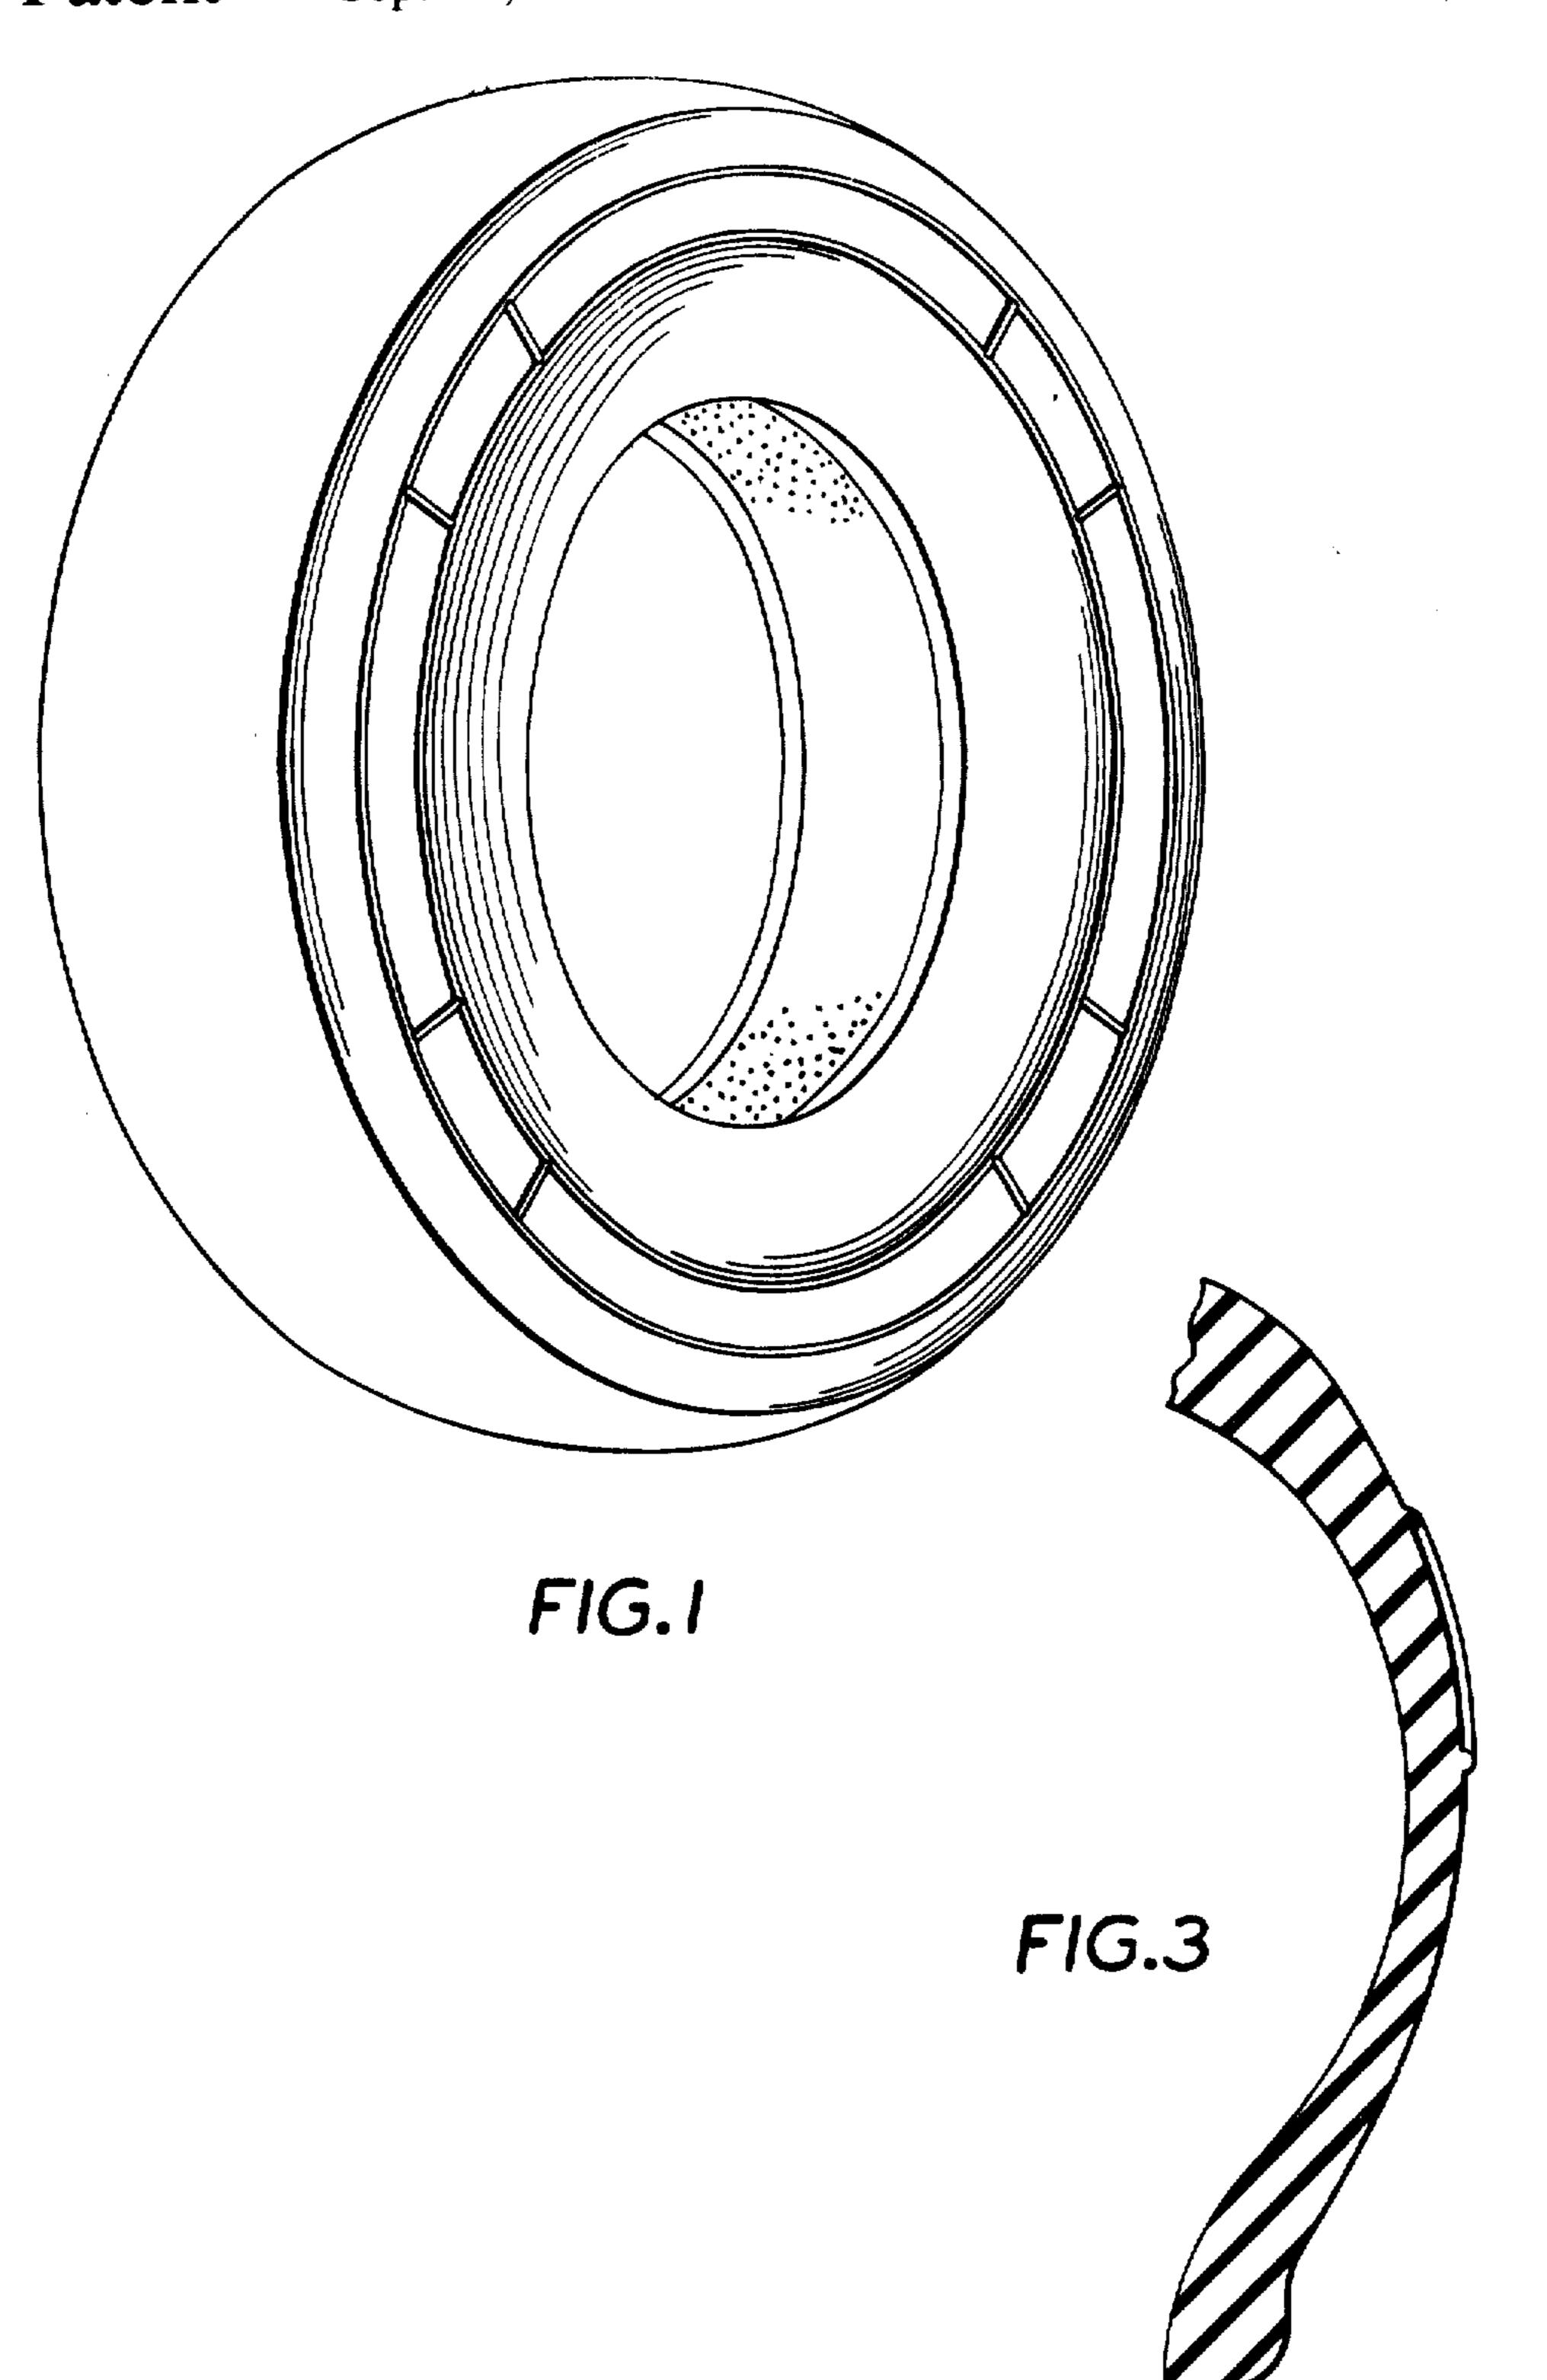

FIG. 5 is an elevational view of the side shown in FIG. 4; and

FIG. 6 is an enlarged fragmentary sectional view taken along line 6—6 in FIG. 4.

The characteristic feature of my design resides in the plurality of sequentially-adjacent modules along the sidewall of the tire defined by a pair of spaced circumferential ribs, connected by predetermined angularly-spaced substantially radial ribs, all of said ribs depending from the base surface of the sidewall and being of the same color as said surface.

U.S. Patent Sep. 27, 1983 Sheet 1 of 4 Des. 270,723

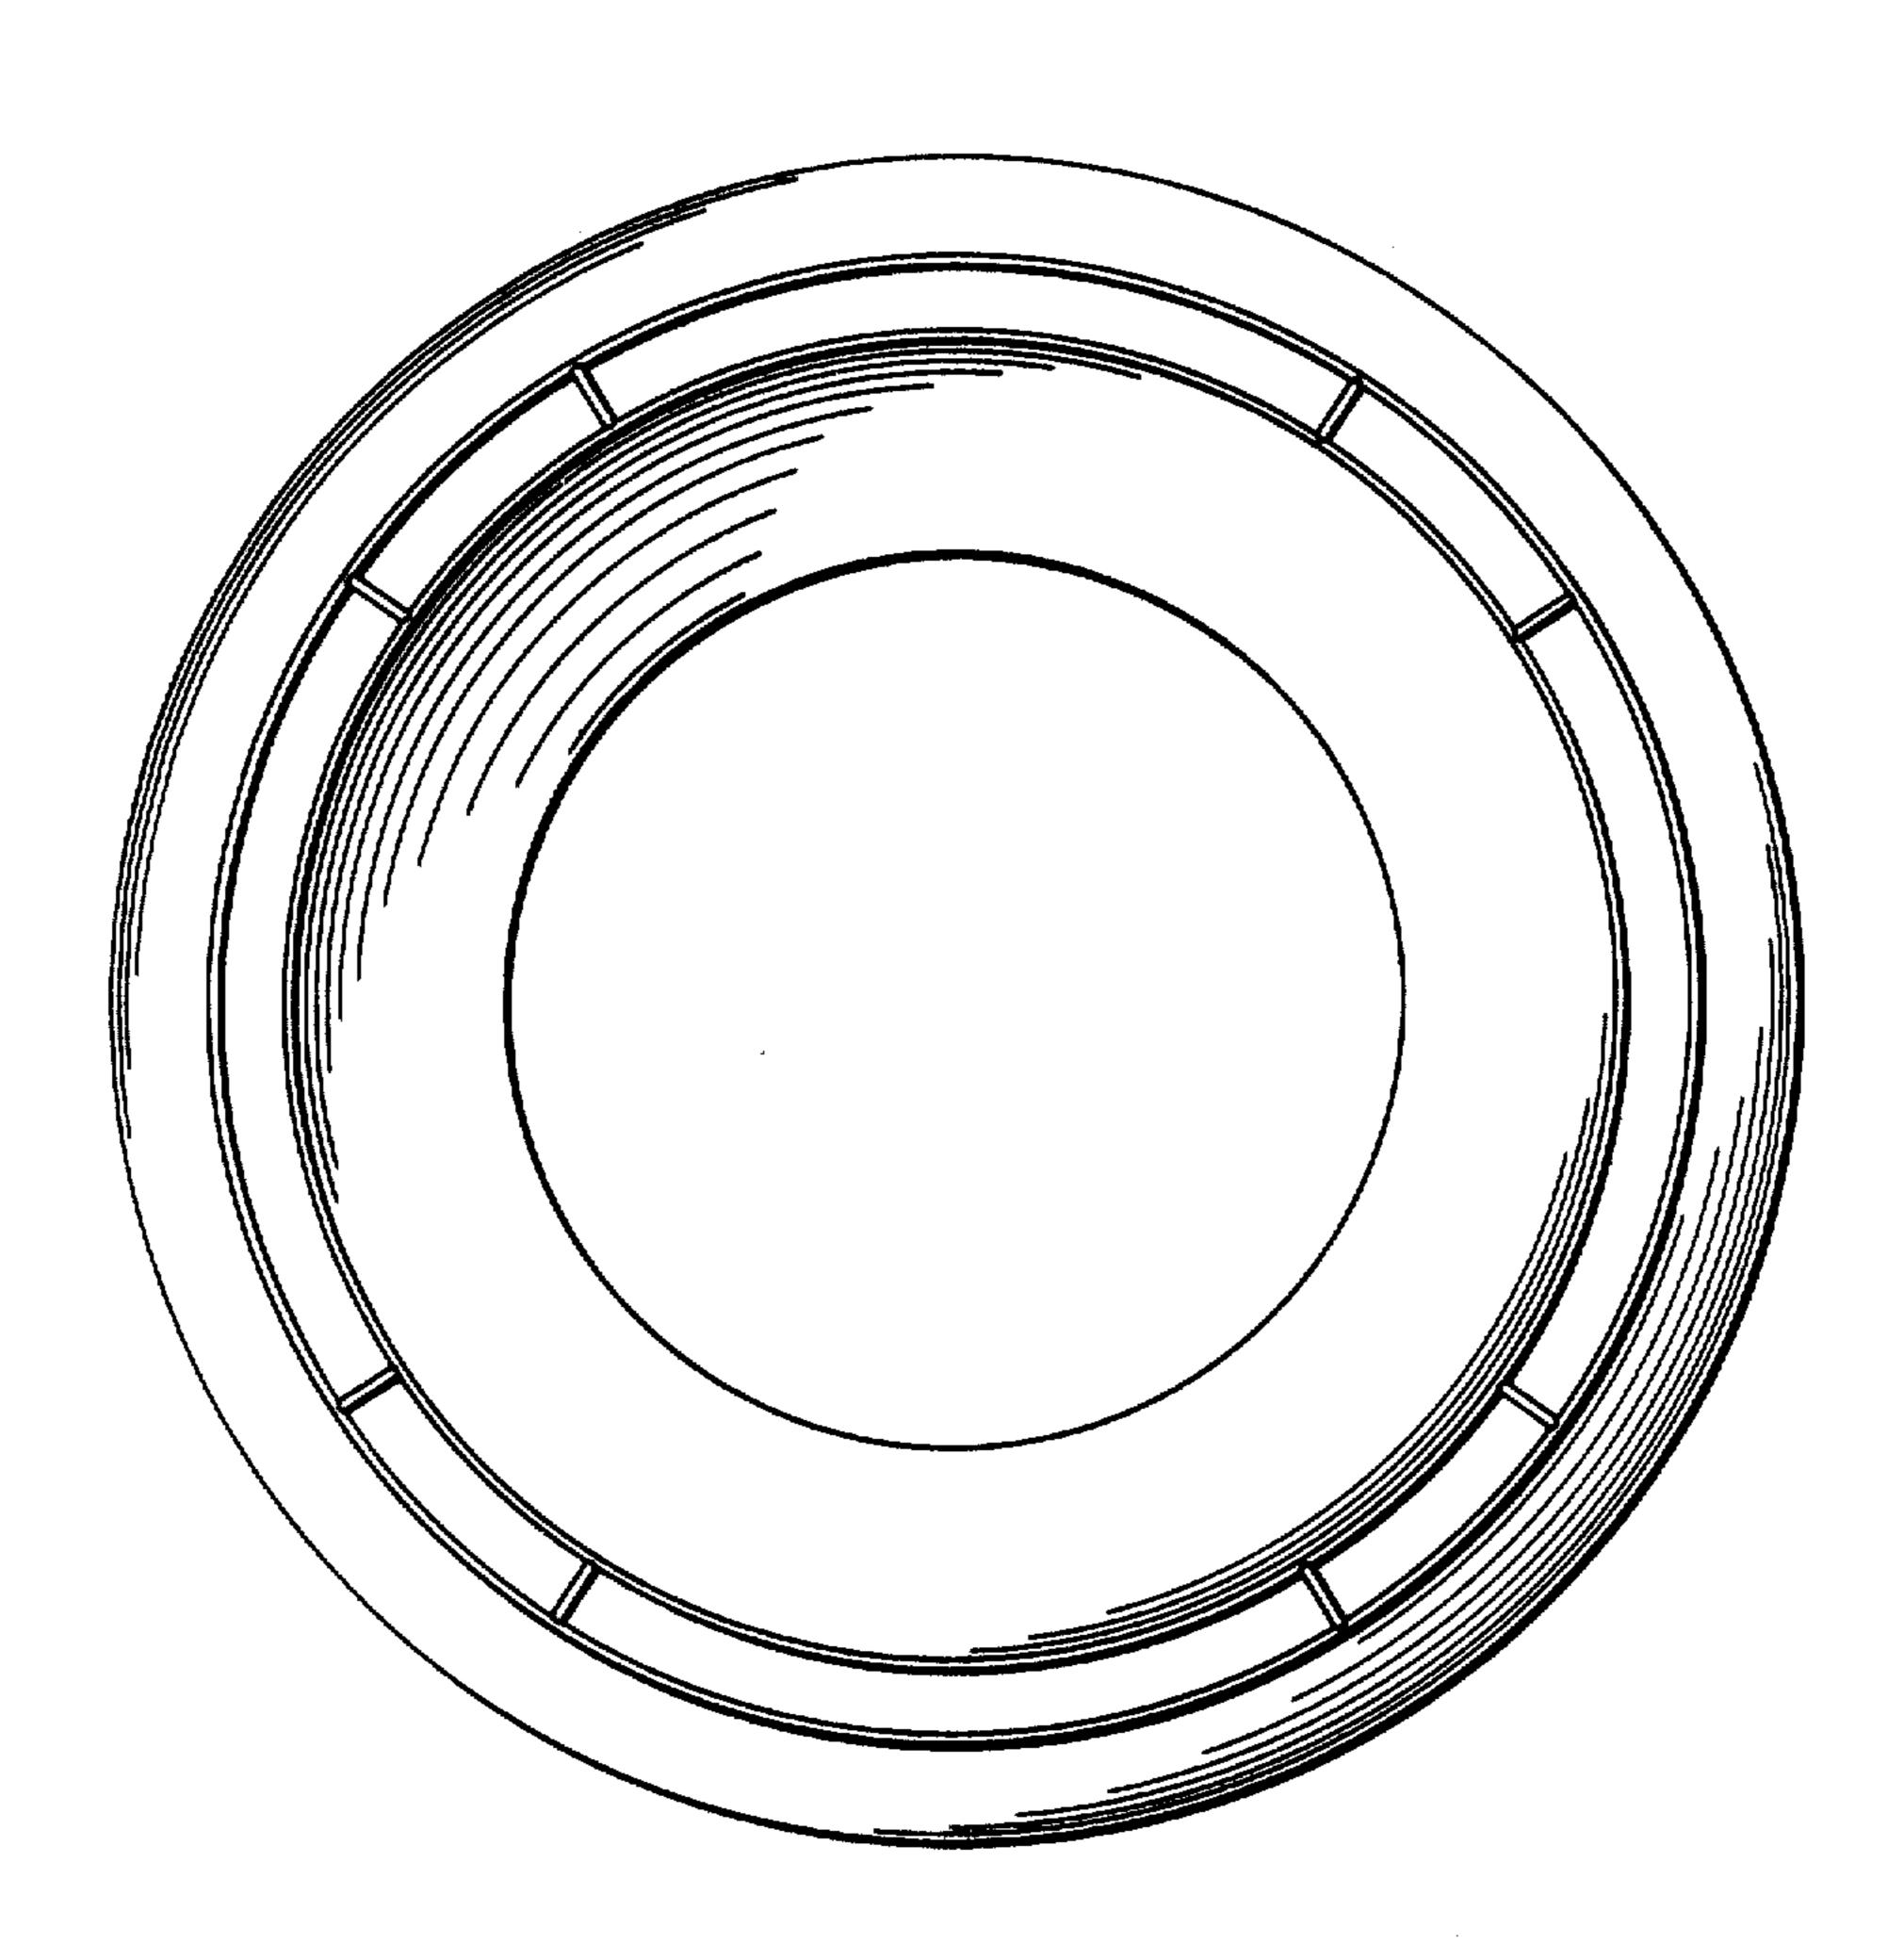

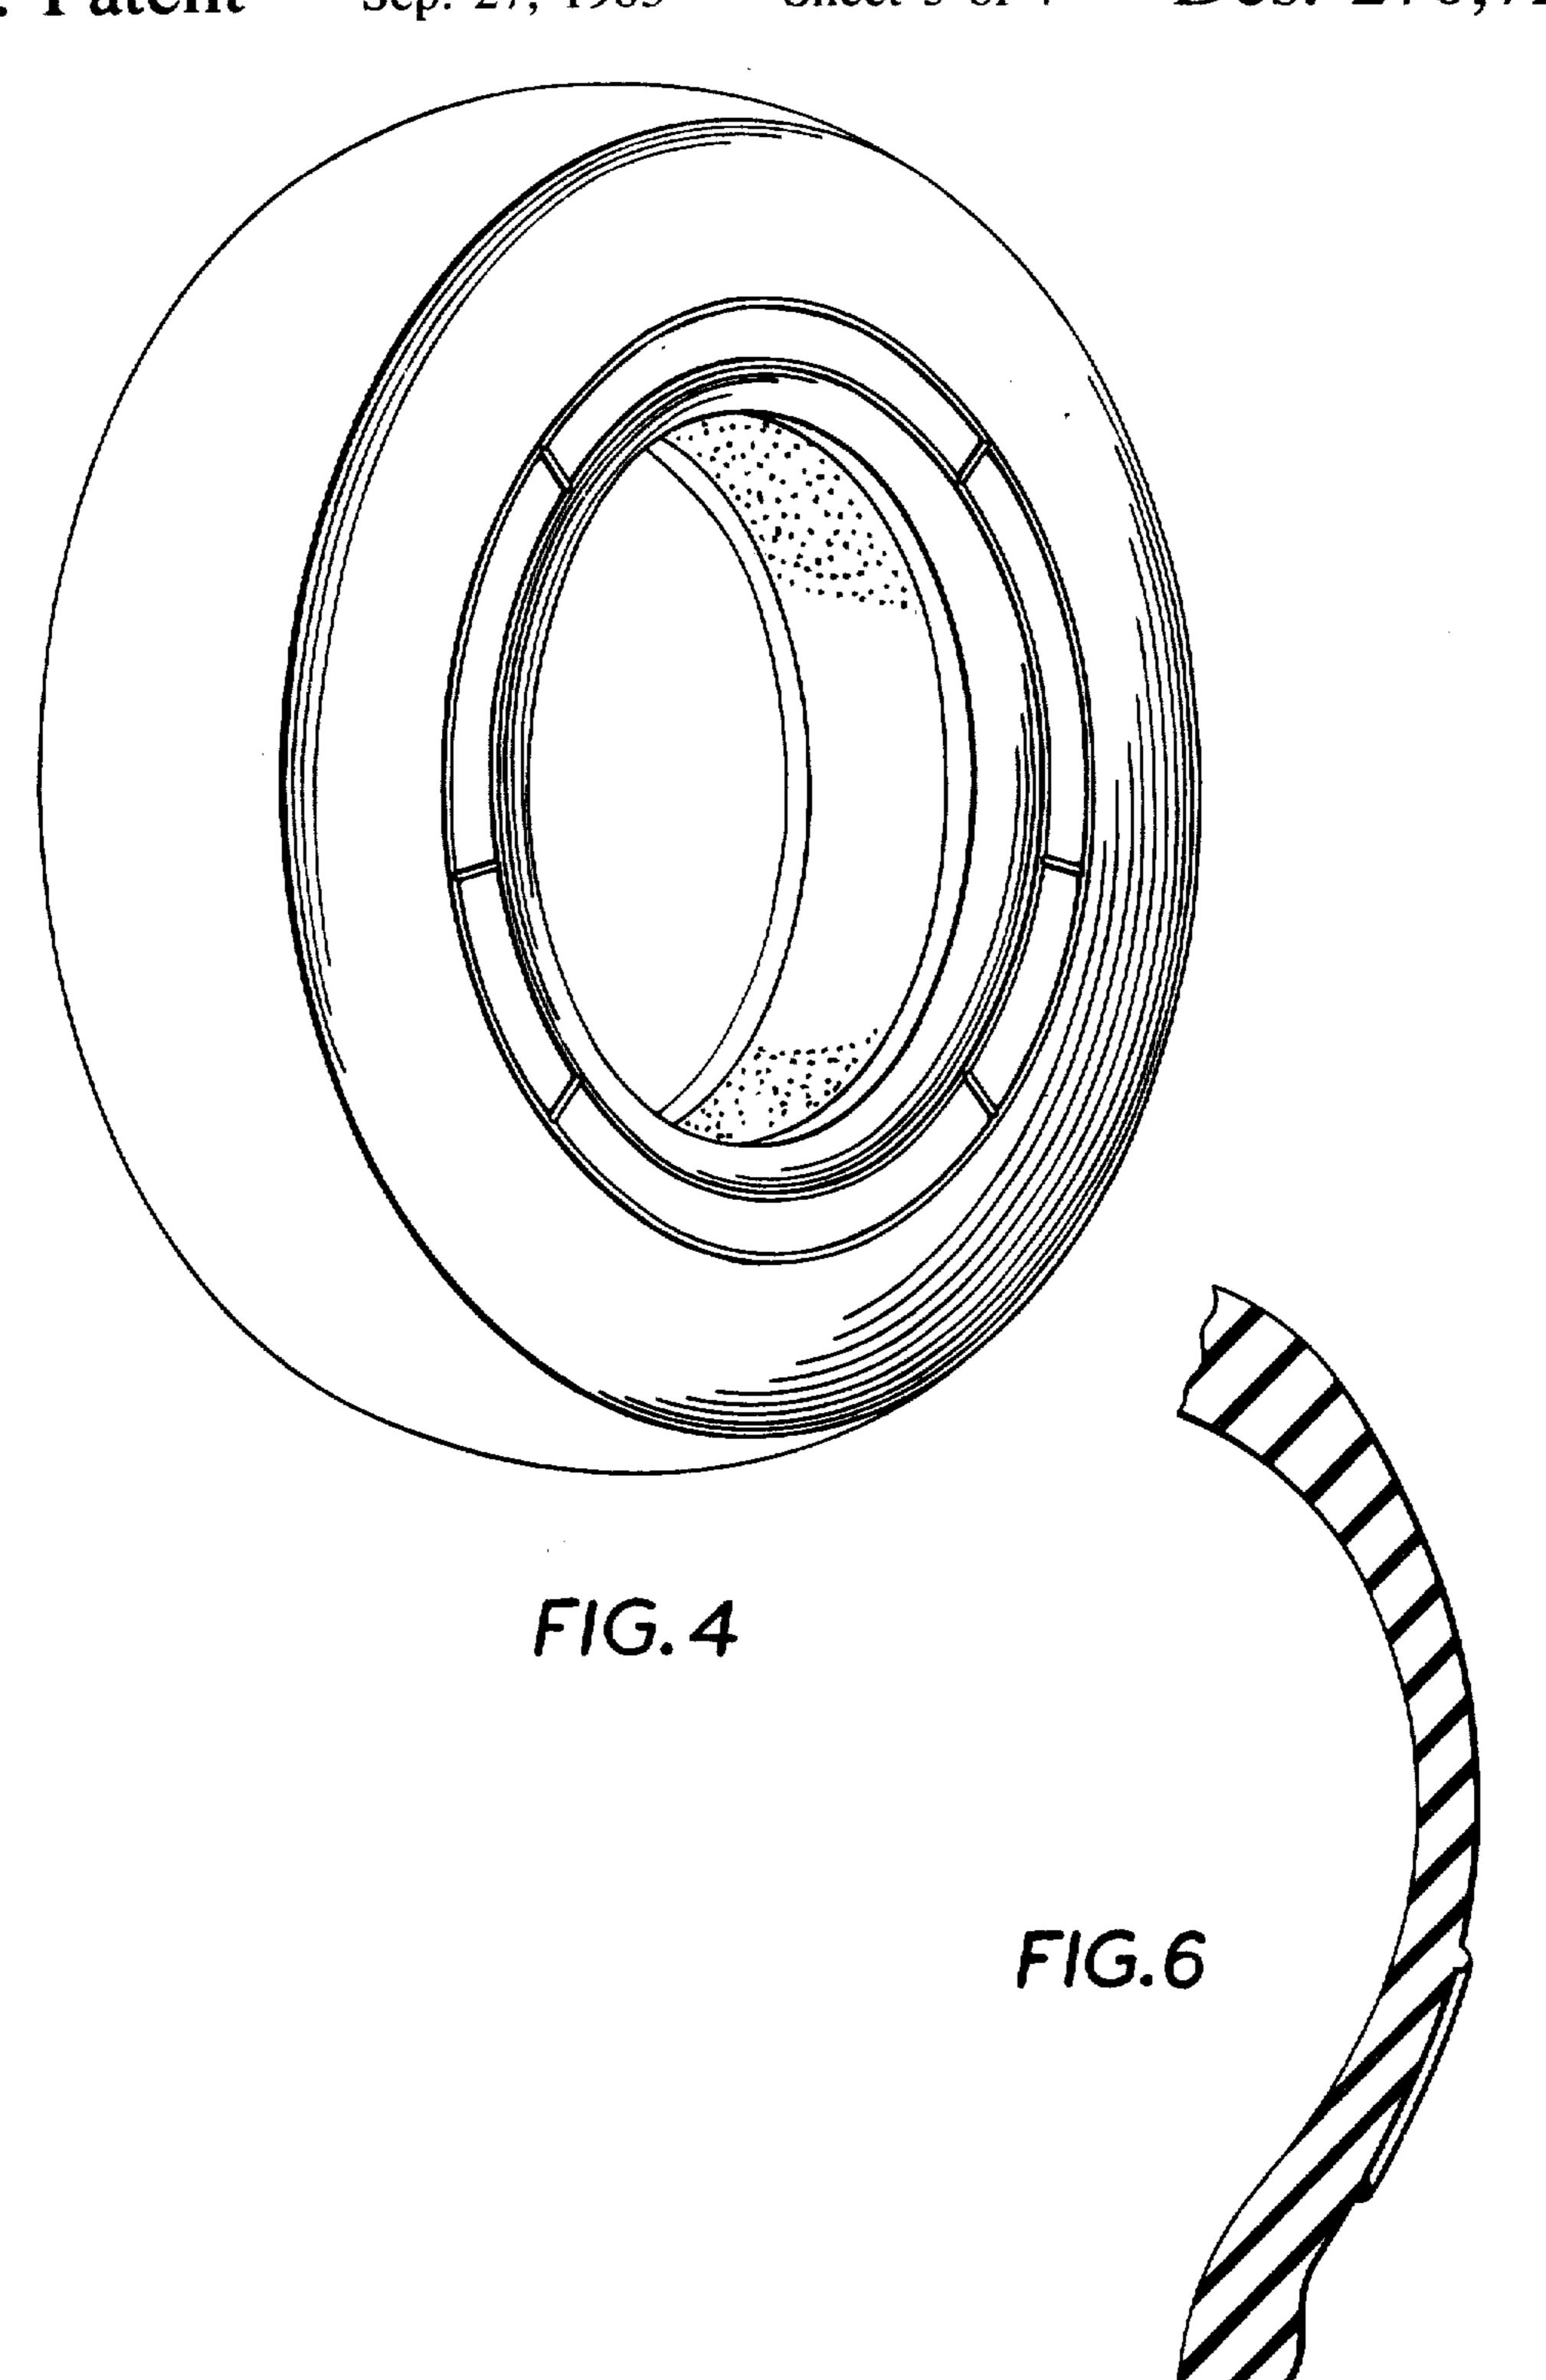

FIG.2

U.S. Patent Sep. 27, 1983 Sheet 3 of 4 Des. 270,723

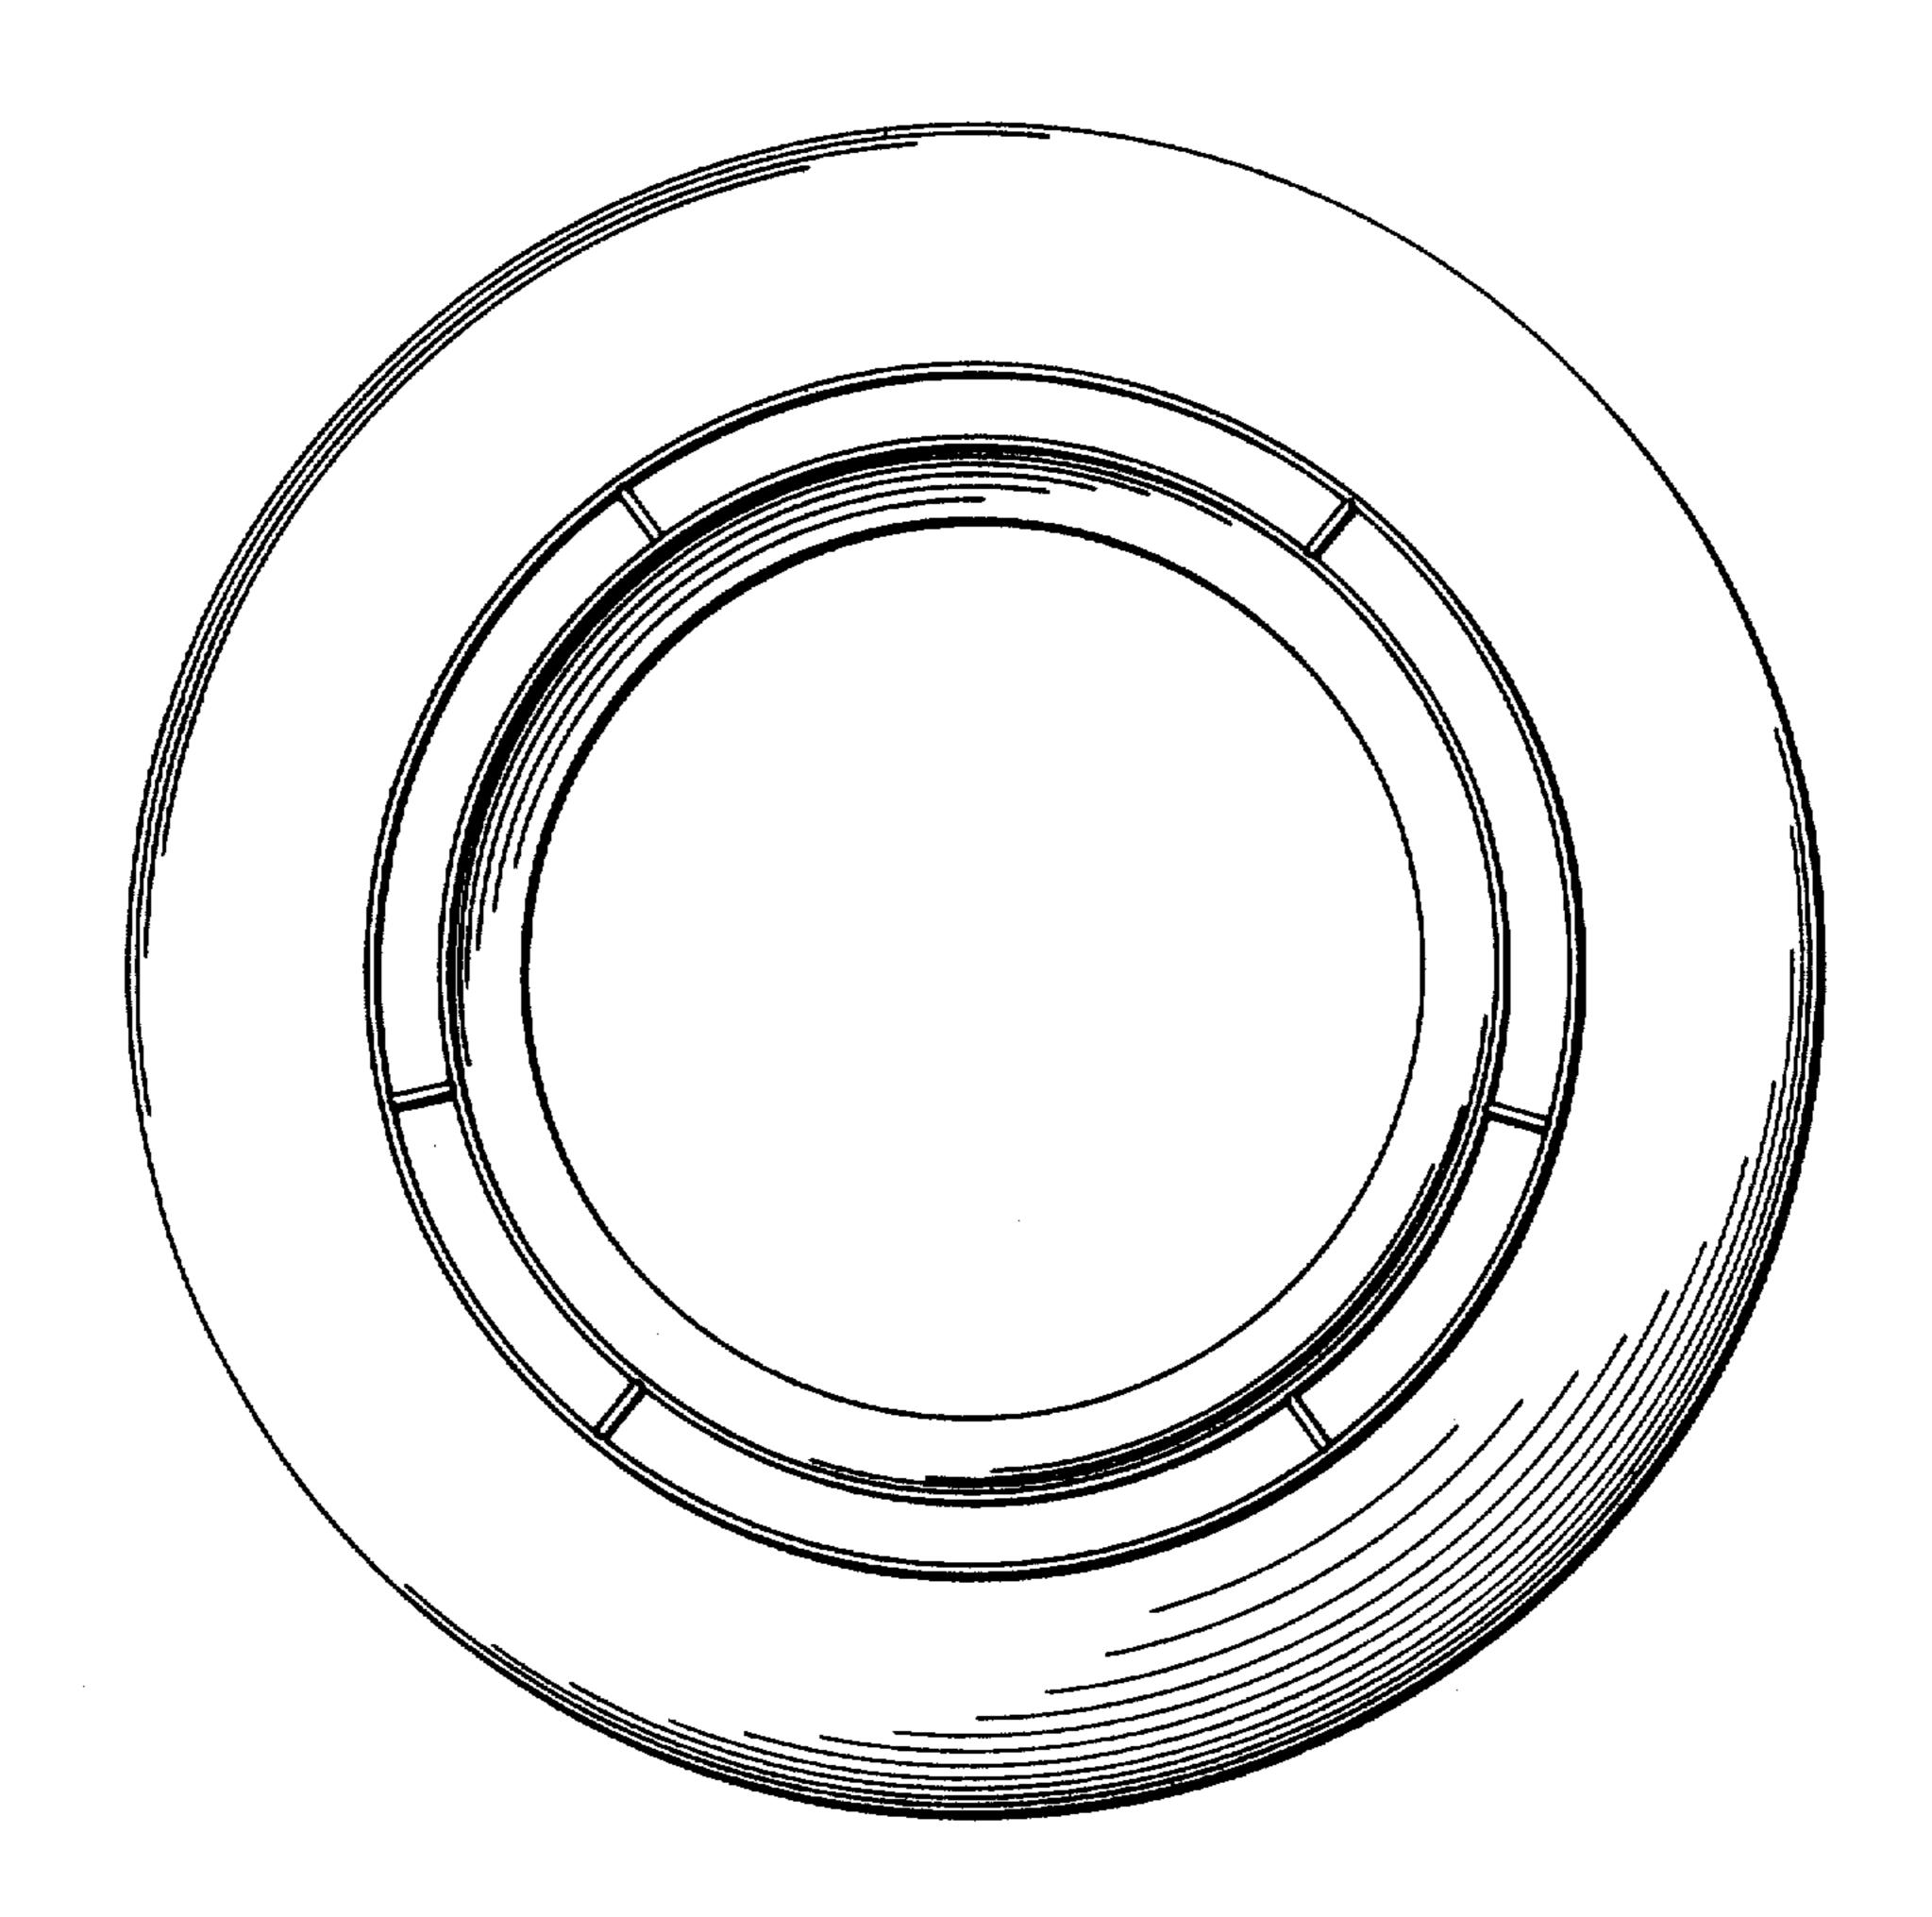

FIG.5
