[57] CLAIM

The ornamental design for a communication apparatus enclosure, substantially as shown and described.

DESCRIPTION

FIG. 1 is a front and side perspective view from above of a communication apparatus enclosure showing our new design, with its door slightly open;

FIGS. 2, 3, 4, 5 and 6 are respectively top plan, front elevational, bottom plan, back elevational, and side elevational views of the door as seen independently of the apparatus enclosure, and with the side opposite to FIG. 6 being essentially a mirror image of FIG. 6;

FIGS. 7, 8, 9, 10 and 11 respectively, are front, side and top perspective, top plan, front elevational, bottom plan, and side elevational views of the enclosure without the door; with the side opposite to FIG. 11 being essentially a mirror image of FIG. 1; and

FIG. 12 is a back elevational view of FIG. 1.

The broken line portion in the above figures are shown for illustrative purposes only.
